King Heating Products Inc. presents:

Eco-King PP Venting

Eco-King is proud to provide high quality made in Europe Polypropylene (PP) vent material. Simple to install with a push seal system using an external locking clamp and viton seal. ULC S636 approved and thus for use in applications with up to 110°C (230°F) flue gases. Concentric applications have an aluminum outer pipe for air intake combined with an inner PP pipe for flue exhaust. Various sizes are available including 2”/4”, 3”/5” and 4”/6” for concentric applications and 2” to 6” for single pipe applications So far concentric material can be used on a variety of high-efficiency condensing boilers and water heaters. Single pipe can be used on any high efficiency condensing boiler or water heater as we have PVC, CPVC and stainless steel adapters.
Finally, we have flexible PP liners that are ideal for home retro fits as they easily fit into existing chimneys

Concentric Terminals

Single Pipe Extensions
