

HERA ARMS

HIGHGRADE EUROPEAN RESEARCH FOR SMALL ARMS

PRODUCT CATALOGUE 2012

TRIARIII

The new world of pistol carbine conversions is now here. The Triarii has been designed to meet the functions and needs of today's law enforcement/military, agency and sport shooter. The click and fire system has been developed to ensure that response time is reduced and maximum capability is given. With an approximate 4 second installation/ready to fire time; the Triarii can provide that needed time to any situation. We are honored to have worked with various agencies, officials and customers throughout Europe, listening to their needs and wishes..

- SIG 226 / 2022
- Glock 17/19/20/21/22/23/31/32/34/35
- Walther P99
- Walther PPQ
- CZ SP01
- HK P30
- HK P30L

Colors:

Available Stripped or complete with Magpul Front and Back Flip up sights, Magpul AFG and M4 Stock in our RTU (Ready to use) package.

CPE

The Hera CPE was developed for Mil-Spec 1911A1 into a fully functional carbine. From magazine to front rail and creates a solid platform for optics and other accessories. The CPE can be removed for use with a sling swivel.

With the CPE a 1911A1 becomes a pistol with a carbine assembly, only the grip screws and original grip are removed, housing and refastened. The CPE permits the use of longer barrels up to 16". All AR15/M16 compatible.

- Mil-Spec 1911

1911 pistols. The design gives the possibility to transform a modern polymers the CPE is manufactured with a steel core for accessories. Alternatively the shoulder stock can be

flexibility when shooting in different sport disciplines. For sights must be removed. The 1911A1 is then placed into the use of changing systems, such as; .22 and 9mm as well as different style shoulder stocks can be installed.

Colors:

GCC

The Hera GCC (Glock Carbine Conversion) gives the advantage of a SBR to a Glock Pistol. The pre-installed Picatinny rails on the 12 and 6 o'clock position makes it possible to use aftermarket accessories such as; optics, open sights and foregrips. At the front of the GCC there are points for two additional Picatinny rails, which are located at the 3 and 9 o'clock positions. The charging handle can be installed on either the left or right side for user preference.

- Glock 17/19/22/23/31/32 (only Gen.3)

Colors:

HK-SL8 / G36 Top Rail Set. Replaces the original Polymer Rail with 2 short Aluminium Picatinny-Rails.

Colors: 

Aluminium Bottom and Side Rail Sets

Colors: 

Our one of a kind Buttstock-Grip-Conversion Kit enables H&K SL-8 Owners to use most aftermarket M4 and Bushmaster ACR buttstocks. Weapon owners are now not required to make permanent changes to their rifles. All original SL-8 Parts can be used in your new BCK.

Colors: 

HK USC / UMP Top Rail. Replaces the original Polymer Rail with Aluminium Picatinny Rails.

Colors: 

Our Front End Picatinny-Rails are "Made in Germany" and like all our products we have used the most modern CNC machines.

Colors: 

The USC FSC is a complete grip replacement that allows you to use the H.E.R.A. folding stock; also available is the AR/M4 style stock adapter which will allow you to completely interchange between the two. No other conversion kit allows for such versatile configurations or that real "UMP" styling. Just like all our conversion kits, they do not require any changing to your weapon system.

Colors: 

The 20rd. magazine is made entirely out of high grade aluminum using the best CNC-milling technology available. As not all areas allow for a full 20rd magazine, we have also produced a 10rd magazine to meet local law.

Colors: 

HCL

The HCL, Hera Commercial Lower, is a newly designed standard AR15/M4 lower system. Keeping Hera's high standard of material and CNC machine milling, we now offer a perfect way to add a new lower to changing systems or to get set up for a new rifle build. Designed and manufactured in Germany.

HLS

The HLS v.2 is bringing modern design to functionality. Like always, our products are made of high grade aluminum but this time we decided to take your wishes to the drawing block. The HLS V.2 is now slimmer, without branding and new safe / fire marking. The unique safe / fire markings allow shooters to find the correct positions, without second guessing. Of course it is also compatible with our MPSS (Multi Purpose Safety Selector), which is included with the HLS V.2

- Lower Receiver HLS v.2
- MAGPUL BAD Lever
- MPSS (Multi Purpose Safety Selector)

HCU

Hera's HCU (Hera Commercial Upper) is built of a high grade aluminum and milled using the newest 5 axis CNC machines available. Its new design makes the HCU a streamline and hassle free AR15 upper system. Through design tests and customer feedback, Hera now offers a clean and practical addition to its AR15 parts line. Removing the forward assist and changing the contour of the upper gives that custom look without the hefty price tag.

HUS

The HUS (Hera Upper System) is developed to give customers a newly designed upper receiver and still keep the MIL Spec fit. Using high quality aluminum makes the HUS upper receiver a more rigid platform. We use the best CNC machines available to ensure that all dimensions are met and that the upper receiver has a tight fit, this increases the life and accuracy of the weapon system.

COMBO

The Upper / Lower Combos are modern designed, semi-auto AR housing parts made from high-quality aluminium and are build to handle the hardest use and abuse of tactical and competitive shooting. The Combo is CNC milled from aircraft aluminium alloy and hard coated anodized for added strenght. Available in Black and TAN.

Colors:  

COMBO FULL

Upper / Lower Combos are modern designed, semi-auto AR housing parts made from high-quality aluminium and are build to handle the hardest use and abuse of tactical and competitive shooting. The Combo is CNC milled from aircraft aluminium alloy and hard coated anodized for added strenght. The „full“ version contains a complete Lower-Parts-Kit, Upper-Parts-Kit, a Charging Handle, M4 Buttstock (incl. Spring and Buffer), and a Magpul MOE Grip.

Colors:  

HCL FULL

Lower Sets are modern designed, semi-auto AR housing parts made from high-quality aluminium and are build to handle the hardest use and abuse of tactical and competi-tive shooting. The Lower Set is CNC milled from aircraft aluminium alloy and hard coated anodized for added strenght. The Lower Set contains a complete Lower-Parts-Kit, and a M4 Buttstock (incl. Spring and Buffer).

Colors: 

IRS

The Hera Arms IRS is a modern designed, Quad-Rail Hand-guard made from high-quality aluminium and is build to handle the hardest use and abuse of tactical and competi-tive shooting. The IRS is CNC milled from T6060 aluminium alloy and hard coated anodized for added strenght. Availa-ble in lengths of 7", 9", 12" and 15". The IRS comes with its own barrel nut where the Handguard is clamp mounted with 3 screws for additional strenght. The anti-turn millings prevent rotating even with rough use.

Colors:  

MPSS

The MPSS, Multi Purpose Safety Selector, is introducing a dual purpose safety bolt as well as 5 interchangeable polymer switches in 3 colors; for a total of 15 switches, giving almost endless configuration.

The dual purpose safety bolt may be used in a 45° or 90° fire mode. By easily rotating the bolt 180° you can choose between standard or short fire selections.

Each Polymer switch comes in 5 various lengths and sizes as well as in Black, Flat Dark Earth and Foliage.

LC

Hera Arms Linear Compensator:

.223 / 5.56 Linear Compensator for use on short barreled rifles. The inside design with 12 separate expansion chambers leads blast and noise straight forward to increase shooting comfort and reduce noise at the shooters ears. Available with 1/2 x 28, M14x1 and M15x1 threads.

GASBLOCK

A new addition to the Hera Arms AR15 line is the low profile gas block. Machined using high precision CNC milling and out of a solid aluminum block. The Gas Block is coated with a black oxidization and is fastened from the side with three screws. Easy installation with a great new look.

Inside Diameter: .750

TC Light

The TC Light is a barrel attachment that helps keep the thread of the barrel free of debris when not using flash suppressors, silencers or other muzzle break devices. The TC Light is also a great way to add a better optic to your barrel when muzzle break devices are not allowed. This system does not reduce / change the desible or flash of the firearm.

GASBLOCK

Our Stainless Steel Gas Block is now joining the Hera AR15 family. Machine milled of solid material lets it handle the extreme pressure of long barrel rifles. 100% made in Germany using the best CNC machines.

Inside Diameter: .936

FSA

Franchi-Stock-Adapter for the Franchi SPAS-15. With a simple installation involving a two-part construction using 3x an interior lying stainless steel bolts, we now offer you a new stock adapter that allows the use of a M4 style stock while still staying in the legal length of 95cm (depending on local laws).

A two-part construction including: 1x adapter block, 3x interior screws and 1x cover plate with tread.

Available with or without M4 stock.

MAGCLAMP

Hera Arms Magazine Clamps: used to couple 2 30round Glock (9 millimeter) magazines to each other.

SFU

The SFU, Side Folding Unit, has gained its popularity through our Triarii pistol system and through various agency and customer requests; the Hera Team has now engineered a slim line folding adapter. Using high speed CNC milling we are able to offer a sleek and user friendly adapter for various systems that use the AR15 style buffer tube assembly.

*May not be used in conjunction with any system that uses a buffer or buffer spring that retracts into the shoulder stock

HERA ARMS INDUSTRIAL SERVICE

HIGHGRADE EUROPEAN RESEARCH FOR SMALL ARMS

As the market for billet receivers, rail systems and other rifle components become more popular with Gunsmiths, Dealers and hobby rifle builders; Hera Arms is proud to offer Industrial Services. You may now purchase all our items Blank (without logos) and can add your companies' info, special marking and serial numbers. The laser engraving is done in house to ensure that all markings meet your expectations and standards.

SERVICES AVAILABLE:

- OEM Manufacturing and Sales
- Custom Laser Markings
- Custom Engraving
- New Product Development
- Design and Engineering
- 3D Rendering
- Law Enforcement Solutions
- Injection Molding and Tooling
- Special Coating

THE 15th

The 15th Legion of the Roman Empire, also known as "Legio XV Primigenia", was part of a four year force located in the Mainz district of Germany. After the forward movement to Britain, the legion was disbanded and the troops of the "Legio XV" were erased from the Roman Army's books forever.

Until now....

Hera Arms has been working hard to bring the legend of the "15th" back to life.

Adopting the name of the "15th" has given our team the motivation to produce a high quality rifle that can truly live up to the name. Using in house produced receivers, hand guards and various other components gives the rifle that true "German quality" assurance. Our rifles contain high quality internal parts from world leading manufactures using only original equipment. All machining is done using 4 / 5 axis machines and high quality metals. This ensures tight tolerances, which extends the life of your firearm.

All The "15th" comes with:

- Billet, hard anodized Upper and Lower receivers
- IRS Free Float 4 Rail Hand Guard (Length dependant on model)
- Linear Compensator; either Linear Comp standard (Model4) or TC Light (Model5)
- Chrome Lined Bolt & Bolt Carrier
- Standard Mil-Spec Trigger Group
- MPSS (Multi Purpose Safety Selector)
- MAGPUL UBR or PRS Shoulder Stock
- MAGPUL MOE Rifle Grip
- MAGPUL AFG (only Model 4/5)
- MAGPUL MBUS Sights (rifle dependant)
- Chrome lined Barrels out of 4140 chrome moly, stress relieved with manganese phosphate
- Carrying case
- Models 11,5" (4) and 16,75" (5) are available in both Black and FDE (Tan)

The15th
- Model 4

Typ:	Semi automatic rifle
Caliber:	.223 Rem
Barrel Length:	11,5" (292mm)
Barrel Specs:	4140 Chrome Moly / Stress relieved / manganese phosphate
Twist:	1/9
Barrel Thread:	1/2"-28 UNEF
Comp:	Hera LC
BCG:	Chrome Lined
Handguard:	Free Float 4 Rail Handguard (Hera IRS / 12")
Stock:	Magpul UBR
Trigger:	Standard Mil-Spec / Hera MPSS
Grip:	Magpul MOE / RVG
Magazine:	2, 10 or 20 round Pmag

The15th
- Model 5

Typ:	Semi automatic rifle
Caliber:	.223 Rem
Barrel Length:	16,75" (425mm)
Barrel Specs:	4140 Chrome Moly / Stress relieved / manganese phosphate
Twist:	1/9
Barrel Thread:	1/2"-28 UNEF
Comp:	Hera TC Light
BCG:	Chrome Lined
Handguard:	Free Float 4 Rail Handguard (Hera IRS / 15")
Stock:	Magpul UBR
Trigger:	Standard Mil-Spec / Hera MPSS
Grip:	Magpul MOE / RVG
Magazine:	2,10 or 20 round Pmag

The15th
- Model 8

Typ:	Semi automatic rifle
Caliber:	.223 Rem
Barrel Length:	18" (475mm)
Barrel Specs:	4140 Chrome Moly / Stress relieved / manganese phosphate
Twist:	1/9
Barrel Thread:	-
Comp:	-
BCG:	Chrome Lined
Handguard:	Free Float 4 Rail Handguard (Hera IRS / 15") incl. Bipod
Stock:	Magpul PRS
Trigger:	Standard Mil-Spec / Hera MPSS
Grip:	Magpul MOE / RVG
Magazine:	2, 10 or 20 round Pmag

HERA ARMS **LE Solutions**
HIGH GRADE EUROPEAN RESEARCH FOR SMALL ARMS

Through the continued partnerships with specialists in the LE field, Hera Arms is now working on a few new items to fill their needs. Currently in the engineering stage is our 12-70 Rail Mounted Shotgun. This system gives officers the capability to use a Non-Lethal cartridge without having to carry a secondary weapon system. LE Solutions allows Agencies to purchase full rifle setups, individual firearms and accessories that fit to their departments mission.
