Next Meeting

The meeting for November will be held Thursday the 8th at the shop of Bill Kalkbrenner, 1939 162nd Ave, in Manchester at 6:30 PM. **Bring your own chair if you wish to have a place to sit.**

The program will be highlighted by a presentation by Harold Rosauer about rose engine lathes and his probable demonstration of one of his signature pieces, a black wood, rosewood piece with finial.

Bill says he will be at his shop by 3:00 PM and that people are welcome to come early and tryout the Rose Engine, visit, or even turn.

Directions to Bill's shop are as follows: Go north on State highway 13 to West Main street in Manchester and turn right. Go 1.1 miles and turn left on North Franklin Street (highway 13). Go 1.5 miles and turn left onto 195th St. There is a water tower ahead and to the left. Bear to the right at the intersection of 195th St. and Quaker Mill Road to stay on 195th street. Stay on 195th street, about 1.1 miles to 162nd Ave. Turn left onto 162nd Ave and go about .3 miles and Bill's shop is on the left. Feel free to diagonal park on each side of the driveway. There is plenty of space. The lights will be on. This is not Bill's home address.

If you wish to car pool, the plan is to leave the Wal Mart parking lot at the East end of Marion at 5:15 PM. Try to be there about 5PM so we can get everyone organized and be on our way on time.

Last Meeting

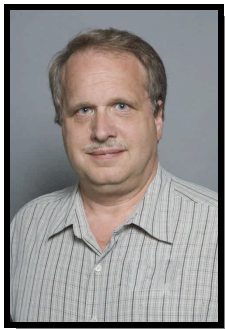

At last month's meeting we viewed a video on making Christmas ornaments from a sea urchin shell. The technique was a bit different than what some have used, however there were a few good ideas presented. The project of the month for November is an ornament and the BFTV tree program is a good opportunity to donate any extra ornaments that you have made.

December Meeting/Christmas Party

The December meeting will be the Christmas party held with the Corridor Woodcrafters. It will be at the Antioch Christian Church in Marion running from 11:AM to 3:00PM on Saturday, December 1st. There will be a show and tell session with plenty of door prizes. The clubs will supply roast beef and ham for the meat and members are asked to bring something to share and your own table service. If you have a project that is too large to bring take a photograph of it and it will be put in a slide show. There will be a sign up sheet at the November meeting to get a head count to determine the number of people to prepare for. If you can't make the November meeting and wish to go the Christmas party contact Bruce at bak515@aol.com

Acme Tools Fall Tool Sale

We have been asked to demonstrate again at the Acme Tools Fall tool sale. This will be on Friday and Saturday the 9th and 10th of November. That is the day after our November meeting. If you are an AAW member you will be able to turn, if not there is plenty of time to talk to those who are there about what is being turned and the club and turning. We have, over the years, introduced many in the community to woodturning as well as gaining new members.

Bruce Kruse

From the President

Get ready for a road trip to Bill Kalkbrenner's Workshop in Manchester for our November Monthly Meeting ! Bring your chair and your Project of the Month - Christmas Ornaments. If you also have any ornaments to donate for the Blairs Ferry True Value Tree, we'll collect them that evening and drop them off to adorn the tree! Bill is pleased to host the meeting where we'll have a discussion / program on the ROSE Engine Lathe lead by Harold Rosauer. We plan to gather at the Marion Walmart on Thursday afternoon to carpool to Manchester, for those inclined to do so. Departure time and further details are outlined later in this newsletter.

BlairsFerry True Value has the Christmas Tree on display. The Corridor Woodturners and the Corridor WoodCrafters are working in conjunction with BFTV (who provided the tree) to provide the ornaments BFTV, so the decorated tree can be offered at silent auction to the highest bidder with proceeds going to Camp Courageous. If you have any ornaments turned after the monthly meeting, feel free to drop you finished ornaments off with Josh (or any staff member) at BFTV. We're looking forward to seeing the 3rd Year tree in all its glory!

The December Monthly Meeting will be the Corridor WoodCrafters/Corridor WoodTurners Christmas Party, Saturday, December 1, 2012 at the Antioch Christian Church in Marion. Details are outlined in this newsletter.

As the year ends, the holidays are creating scheduling issues so the CWT Board concluded to waive the December Board Meeting. The November Board Meeting will be the final Officer meeting for 2012.

Keep in mind, March 2013 brings the election of CWT Board of Directors and Officers. If you are so inclined and want to be considered for an Officer or Board Of Directors position on the CWT, please contact me or any of the Board Members to discuss your interest. The CWT exists because of your interest, input and desire. Please let us know if and how you would like to help the organization.

I am attending the 4th Annual Wisconsin Woodturners Expo in Eau Claire, WI on November 3rd and 4th. I will provide a brief overview of the event during the November Meeting.

If you are aware of any program possibilities, please do not hesitate to forward the information to one of the CWT Board Members.

As Always - Happy Turning!

A Motoring Adventure with a Turning Twist By Paul Rohrbacher

Paul Rohrbacher

On 11 Sept 2012 a trio consisting of Ray Bail (West Virginia), Harlan Johnson, Monticello and Paul Rohrbacher Scotch Grove, aka the Three Medicare riders, departed Monticello IA on a motorcycle trip on the Great River Road to New Orleans.

The Great River Road followed the Mississippi River to Cairo IL. From there on, the river was many miles from the nearest road. Our stops were at Paducah to see the murals painted on the sea wall, Union City to visit Dixie Gun Works, St. Louis to see the Arch, Memphis to see Graceland, and New Orleans to visit Capt. Eddie (of the U-Tube videos) and to ride as far south as possible on Rt. 23 to the gulf. Most of the land and roads in Mississippi were totally flat and running straight as an arrow, mile after mile. When we went south of New Orleans to the gulf, there was a lot of destruction from Hurricane Isaac. Rt. 23 ended under water so we didn't make it all the way. There was a lot of destruction in the low lying areas along Rt. 23, including huge piles of seaweed that contained dead cows, alligators, cars, boats, lumber, and trash piled in huge rows along both sides of the highway.

Our visit with Capt. Eddie was on Sunday, 16 Sept. late in the afternoon after riding to the gulf. He is located just off of the Hughie Long bridge in Old Jefferson, a community of small older homes and businesses. Our ride first missed the turn to the Hughie Long Bridge as road marking is extremely poor in New Orleans. After asking di-

rections, we found the bridge, Old Jefferson and Capt Eddie's home/shop without any trouble. His wife Cindy said that the Capt. was in his shop. Capt. Eddie was at work in his shop experimenting with a new tool for Off Center Turning. His shop is in their back yard. It is a tin shed about 12'x20'. The tin roof extension in the front had been blown off by Isaac and was going to be replaced shortly.

The shop is very small, just enough room for the Capt., the One Way lathe, Lathezilla, bandsaw, grinder, belt sander and a lot of stored stuff in the back of the shop.

The cameras/lights are mounted overhead for making the U-Tube videos. His U-Tube filming is a very efficient set-up as you see when

viewing the videos. He wasn't turning anything while we were there. However, he showed us some of his turnings. They were very thin bowls/vases, some with cutouts. They were too fragile to handle safely. He aims at making videos at a level anyone can benefit from and use the information. He has a thriving business selling tools on line. I purchased a Smock and carbide bits that he sells. Cindy takes care of the mail orders and sends out most orders. They are very down to earth friendly people to meet and talk to.

When we finished our visit the heavens opened up and drenched us most of the ride back to the motel

On the way back north we stopped at Monmouth Springs for the night. Next day, we proceeded on Rt. 19 (Mo.), the most scenic and twisty/hilly road of the trip.

As a side note, where ever we stopped for meals, we were usually greeted by older H.D. riders, our age and up into their 90's that had stories of what bike they rode in their past, and where they rode. They still longed to be able to ride again. One old H.D. rider gave us a "Jesus Is!" button. He had given out over 40K buttons.

For Sale

Have something for sale? Let the club members know about it here. Get the info to John Cox to be added to the next newsletter

Wanted

Don Potter is looking for a lathe and tools for a friend who has shown an interest in turning. He is looking for something in the entry level area. If you have any tools or a lathe that you are no longer using and want to sell contact Don at
doncin23930@Q.com

Dues Structure and Meeting Attendance Policy

Club dues are:

\$25.00 per year for an General membership.

\$30.00 per year for a Family membership

\$100.00 per year for a Supporting membership.

Potential members may attend two meetings as a guest then must either join the club or pay 1/4 of the current general membership fee to attend a regular meeting.
