How to Measure for Outside Mount Cornices: Measure the width of the window opening or outside mounted window treatment that the cornice will be mounted over. Add at least 2" to the width measurement to provide clearance.

Cornice will need to be mounted approximately 1 1/2" above the window opening or window treatment already installed.

When installing over outside mount window treatment, order either return length 3" to 8" in 1/8" increments.

Color #	Color Name
102	Artic White
165	Soft White
127	Antique White
126	Golden Oak
129	Red Mahogany
172	Chestnut
