

# Sounds Good

## Mobile Production

### Playing music at the shows!

We are a large production company that specializes in Cheer Competitions all over the nation. We want to make playing your music at a competition faster/easier!

We understand that **EVER** company uses a different system. If you follow our simple rules, it will make your team look good and sound even better!

- Our first rule is to please **NOT** bring a broken or bad file. please make sure all files/MP3's are in perfect working order.
- The back warm-up CD player/Audio Source is **COMPLETELY** different than used on the competition floor. **DO NOT** tell us "well it worked in the back" We are **NOT** Responsible for the Warm-up audio.
- We ask that a coach comes to our music table **ONE** team prior to their competition. This will give us both time to make sure all audio is played correctly and smoothly.
- IF YOU ARE USING A PHONE!! We have seen a few gyms using an internet based app/website to share music and can only run with service. **PLEASE NOTE** we are **NOT** responsible for phone interruptions(**Phone calls, Texts, Emails, Alarms, Alerts, ect**). **WE ASK** that every Gym/Coach puts their device in "**Airplane Mode**". This will block all texts, phone calls and emails **BUT** will not block Alarms/Alerts.
- Devices you can use are: **iPhones, iPods, iPads, Android Phones/Devices and Laptops**. These Devices must have a **HEADPHONE JACK** on them in order for us to receive the audio. **WE ASK** that your **VOLUME** on your device be turned all the way up. The sound board we are using is set for your volume to be all the way up. If it is **NOT, DO NOT** yell at us to turn it up.
- All Device used **CAN NOT** have a **CASE/COVER** on it. Our audio jack is Larger and won't fit most cases. Prior to coming to our table we ask you **REMOVE** the **CASE**. **ANY** cases left behind will be added to Sounds Good inventory.
- IF YOU ARE USING A CD!! Again the CD player in Warm-up is **DIFFERENT** than

the one being used for competition. Your CD **CAN NOT** have **Scratches, Marks or any other Blemishes**. If it does have blemishes and you still try to use that CD, We are **NOT** responsible for anything that happens to that Disc (**Skips, Audio-Loss/Distort and/or unable to play**). Our CD players **DO NOT** read Folders or files with audio inside, They think that there is a wall and **WONT** read the CD. The CD Player **DOES NOT** start until you push **PLAY**. Once the first track is over, it will stop and pause at the next track waiting for you to push **PLAY** again.

**Thank you for reading our rules.  
We hope this makes your competition run smoother and faster.**

Thanks,  
Evan Fitzgerald
