Trailhead (4,318 feet)

HOTSHOTS TRAIL

Spanning 2.85 miles along the ridge, the Hotshots Trail leads to the Observation Deck which overlooks the fatality site and Yarnell to the east.

As you walk along the trail, you'll encounter 19 granite plaques set into rock, each representing a fallen Hotshot. Along the way, you'll see benches, and additional interpretive signs that tell the story of wildland firefighters.

From there, the .75-mile Journey Trail leads down to a memorial located at the fatality site, where visitors can sit to pay their respects and reflect.

This 7-mile round-trip trail includes a 1,200 foot elevation gain and a 5-8% grade. Please plan for a 4-hour plus round-trip hike.
