

MTN Presents Workshop on Harnessing Technology to Maximize Ministry Impact at Association of Gospel Rescue Mission Annual Convention

Orlando, FL- (May 17, 2012)- More than 600 rescue mission professionals are expected to gather in Orlando May 20-23 at the Association of Gospel Rescue Missions' (AGRM) annual convention where Meet The Need (MTN) will conduct a workshop on "Harnessing Technology to Maximize Ministry Impact".

"AGRM member organizations provide some of the nation's most effective and efficient rehabilitation, education, job-training and life-skills programs for homeless and needy men, women and children," said MTN President and Founder Jim Morgan. "The adoption of the MTN platform by many AGRM members across the US allows them to be more effective in transforming the lives of homeless men and women by making church members and the community more aware of their mission's needs."

Morgan's workshop will address the way ministries can make the most of low- and no-cost technology available today, including some programs designed specifically for nonprofits. This workshop will help mission leaders identify and leverage those programs to advance key organizational goals—from [volunteer recruitment and management to case management](#).

About

Meet The Need's mission is to dramatically increase the impact churches and ministries have in their communities by mobilizing more people to loving acts of service. Meet The Need accomplishes that mission by giving each church and ministry powerful tools for managing all aspects of local missions, seamlessly connecting them all "behind the scenes" on a shared platform.
