

SECTION C

OUTSIDE EDGE PROFILES

OUTSIDE EDGE PROFILES

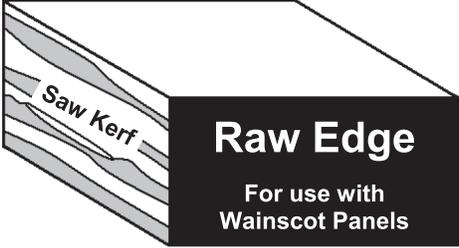

Profiles marked with a * will accept a standard 32mm 1/2" deep hinge bore.

Butt Edges

If you use a particular outside edge profile on a regular basis and it is not displayed in this section, please call us for information regarding the possibility of adding it to our library.

Please check the "Butt Edge" box on the order form and indicate in the "Specifications" column which edge (left or right) is to be the butt edge. The butt edge will be an E-1.

Raw Edge

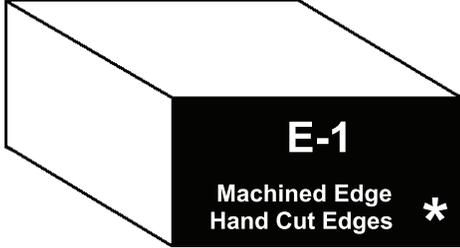

Raw Edge
For use with
Wainscot Panels

Raw Edge

This outside edge option is for use with wainscot panels and cabinet end panels. With this option, panels are sized on our panel saw and will have a saw kerf with sharp edges.

E-1

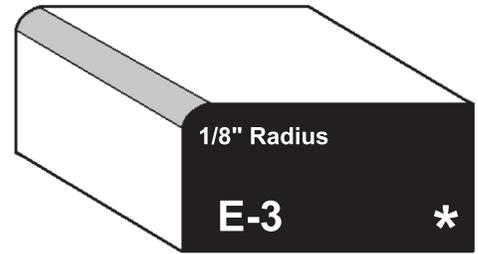

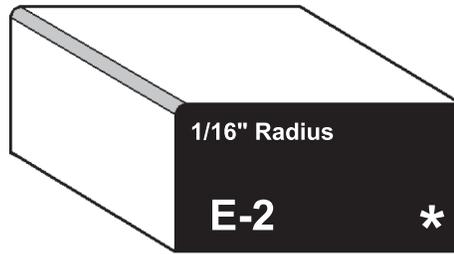

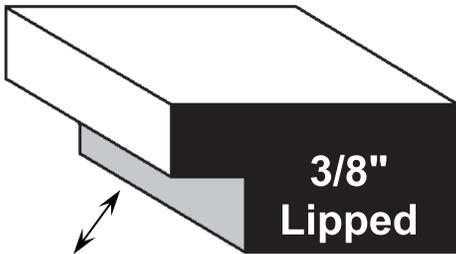

E-1
Machined Edge
Hand Cut Edges *

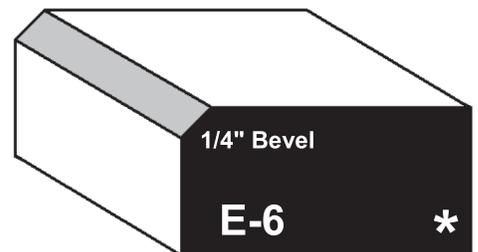

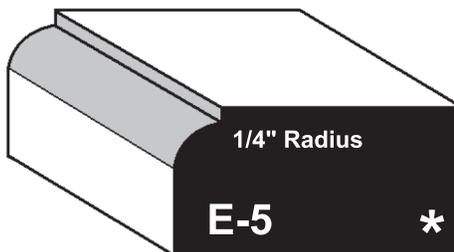

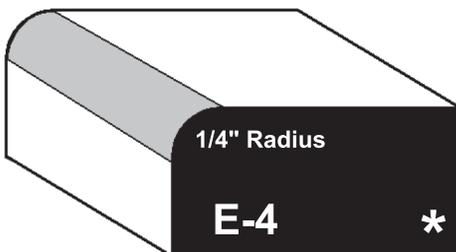

E-1

This outside edge option is a machined edge. All the outside edges and corners are hand cut with 180# sandpaper to soften the edges.

3/8 Lipped (add 15¢ per lineal inch)

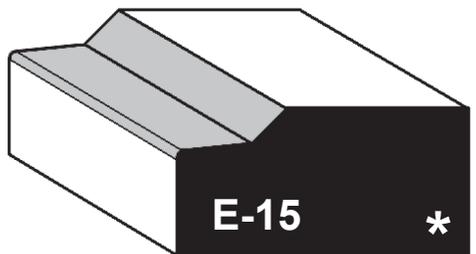

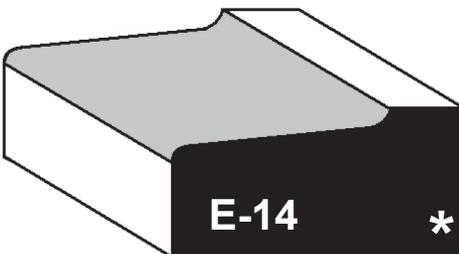

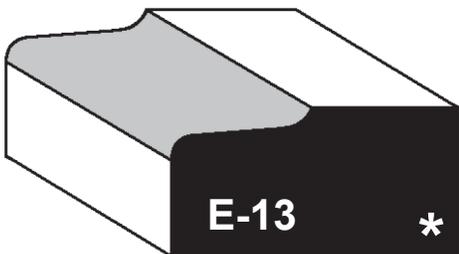

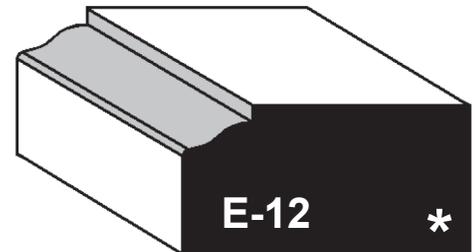

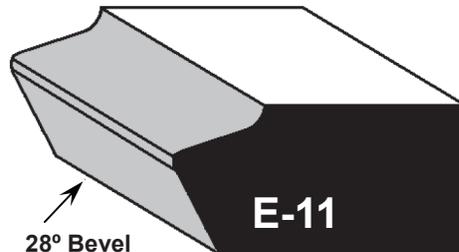

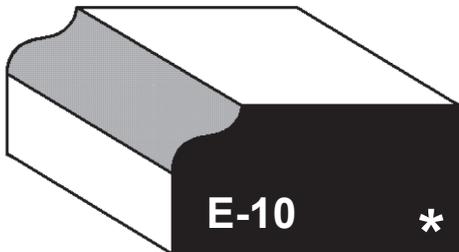

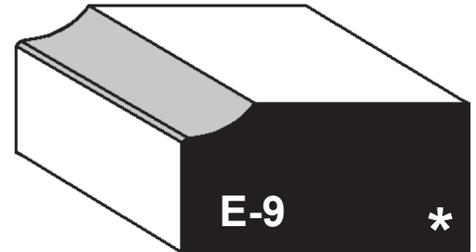

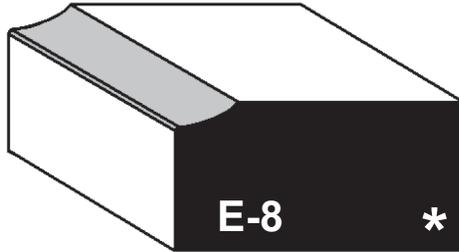

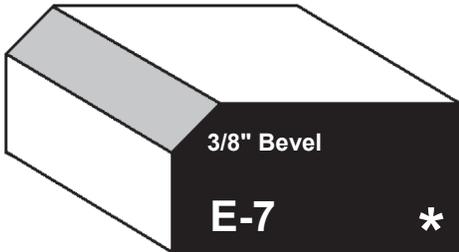

Available in combination with other outside edge profiles
