Regional development & globalisation: Best practices

Saint Petersburg
Russia
26-29 August
2014
Welcome to Saint Petersburg

Greetings from the Co-chairmen of the Local Organizing Committee

Dear Participants of the 54th Congress of the European Regional Science Association,

On behalf of the Local Organising Committee we are happy to see you in Saint Petersburg, at the St.Petersburg State University where regional research of Russia had started in the 18th century.

We are very thankful to the Association for its decision made in Barcelona in 2011 to support the initiative of the Russian national section of ERSA, the Council for the Study of Productive Forces and St.Petersburg State University to hold this great scientific event in our. We are sure that this decision is the result of the collaborative achievements of the Russian regional scholars.

One of the outstanding representative of this group of scientists was the Russian academician, the chairman of the Council for the Study of Productive Forces in 1992-2010, Alexander Granberg. Our Congress is dedicated to his memory. For several decades he had been the indisputable leader of the Russian regional scholars, and organised the first Russian ERSA Congress in 1993 in Moscow.

Regional studies under the era of globalization are especially actual and multi-faceted. Among the major themes of our Congress we can mention strategic planning and creative development of big megalopolises and small cities, contemporary problems of the Arctic regions, natural resource use and sustainable development.

Dear Congress participants! Let us wish you an interesting exchange of ideas in the sphere of regional and urban development, creative discussions at the plenary meetings, at the sessions and round tables of the Congress. And of course we hope that You will have the possibility to know better beautiful St.Petersburg as the city of unique destiny - the cultural and intellectual center of Russia.

Dear friends, we wish you successful work at our Congress!

V.N.Razbegin
Acting Chairman of the Council for the Study of Productive Forces
I.A.Gorlinskii
First deputy Director of the St.Petersburg State University
Greetings from the Chief Scientific Secretary

How to create your own roadmap inside the scientific program of the Congress

The 54th European Regional Science Association Congress is dedicated to the memory of the Russian Academician Alexander Granberg (1936-2010), who had been the leader of the Russian Regional Science for decades.

Our Congress in St. Petersburg can be considered as a “spin-off” from the Moscow Congress in 1993. This Congress is the partnership of two academic institutions – the Council for the Study of Productive Forces and the St.Petersburg State University.

The LOC has tried to realize the idea of a compact Congress:

1) All areas for the plenary meetings and sessions are very close to each other and are concentrated along the axis of Shpalernaya Street – the Tauride Palace (Opening ceremony), the Smolny Cathedral (Closing ceremony), and the Smolny campus of the University (for all sessions and 2 plenary meetings).

2) We are able to have the whole Congress from Wednesday to Friday in one building of three University faculties – the International Relations, the Political Science and the Sociology.

3) We have deliberately increased the number of presenters at each session from the traditional three to four, five, or even six to create the atmosphere of intense communication and overcome the previous congresses’ curse “three presenters-three participants”. Simultaneously, we have expanded the time duration of the majority of sessions from the common 90 to 120 minutes.

4) Arranging the session rooms, we have tried to follow the logic “one area for one thematic block of sessions”.

For instance, in the first area we have the Institutions, planning, evolutionary economic geography and regional finances; the second area is entirely devoted to the urban sessions of different kinds – and realty and housing markets in the cities; the third area is to spatial econometrics and regional economic modelling, agglomeration effect in the cities and clusters, and economic crisis in the regions; the fourth area to the regional and urban labor markets, infrastructure-transport-communication, and cooperation/competition among regions; the fifth area is to the Arctic/Northern and Russian regional research, natural resources/environment and climate change, and knowledge spillovers, innovations and human capital; sixth area is to the regional entrepreneurship, small and big business, location, social segrega-
tion, and tourism; and finally, the sessions in the seventh area are devoted to the themes of regional economic growth and development, transitional economy, and migration.

To give the participants the knowledge of the Russian school of Regional Science and the Congress we have decided to organise the special closing plenary session on the Russian school in the regional dimension, a round table on St.Petersburg as the global city (August, 28, at 16.15-18.15).

We have received unprecedented number of requests for the special sessions during the preliminary stage of preparation of the scientific program. It is up to you which session you wish to attend.

To simplify this process, we have structured all the special sessions into several blocks:

1) Knowledge, innovations, and information.
2) Urban development – we recommend you to pay your attention to the session on the small and medium cities of Europe, which was not at the previous congresses.
3) Arctic as the last frontier in the regional science looks like unique block of themes but is natural for Russia as the Northern country.
4) EU, border cooperation, economic transition in the regions
5) Theoretical block of various topics – here our colleagues are involved in innovative search inside the field of regional science.
6) Entrepreneurship and firms – please pay attention to the last one where themes of productivity, structural factors of efficiency not very often at the ERSA congresses are elaborated.
7) Methodical and practical issues of regional development.
8) St. Petersburg Congress is unique for the two Memorial sessions dedicated to Alexander Granberg, Piet Rietveld, and 100th anniversary of the Council for the Study of Productive Forces.
9) Finally, let us not forget the infrastructure block of some sessions and the new special sessions devoted to the climate challenge in the regional economic development.

And what about the Ordinary Sessions?
What new details have we tried to add in the traditional topic structure of the O-sessions?

1) For each meeting of every Ordinary session we have stressed the umbrella topic uniting to the presentations of 4-5 panelists. We have deliberately selected papers to make this happen.
2) We would like to highlight the complicated dialectics of regional development in the names of our sessions, trying to give not only one, but
two-sided phenomenon: urban sprawl and shrinkage, social embeddedness and alienation of the multinationals, regional cooperation and competition.

3) We would like to underline the issue of best practices and benchmarking in several sessions following the title of this years’ Congress.

4) In each session meeting we have tried to focus questions connected to knowledge, innovations, human capital considering them as priority topics for contemporary regional science and community of regional scholars.

5) We have united the phenomena of economic clusters and urban agglomerations in one session as the result of common increasing returns effect.

6) Some topics are here for the first time like aging in the regions, tourism as regional experience economy etc. It is natural for the ERSA Congress in Russia to stress the theme of natural resources.

7) In each meeting of the Ordinary session we have tried to follow the logic from the general to the particular: first reports on the most general issue, then more concrete and peculiar.

8) To provide unity in the plot, the LOC has tried to create a thematic “chain”, when all the meetings of the one session are organised in one room successively, even when we have a Special and Ordinary sessions of the similar plot.

9) In our own innovative search we have tried to create unexpected merge/combination of old elements and themes: for example, mountains and urbanization – special meeting on the 28th of August at 18.30, or a special meeting on all kinds of territorial capital on the 28th of August at 18.30, or a special meeting on comparative institutional analysis on the 28th of August at 16.15, and finally a special meeting on happiness on the 29th of August at 11.00.

10) During the Congress we are eager to give the broad panorama of different national schools of regional science, national experience of regional policy. Therefore we have created special meetings with umbrella topics such as “Italian Tourism”, “Human capital in Greece”, “Romanian experience in economic restructuring”, “Russian school of Regional Science”, “Dutch perspectives in the regional research”, and much more.

“A Plurality in Unity” – is the LOC’s slogan.

11) We have tried to create a broad inter-country and an inter-regional comparison perspective even when the presenters are not inclined to. For this reason we have constructed umbrella topics like EU-Russia works on regional economic growth, or India-Russia works on regional finance.

We are sure that these approaches are truly natural at this years’ Congress with the general theme on “cooperation and competition between regions under the globalization”.
What strategy should we recommend for you to follow the scientific program of the Congress?

Your roadmap should not be a highway on one topical session forever. Please, allow yourself to venture and be innovative to create your own Congress platform on different sessions, and meetings. Only when you do this, you can get this unique taste and atmosphere of the St.Petersburg Congress!

We ask you to follow the scientific leaders on their talks and not to omit such rare and inspiring possibility to be closer to our scientific colleagues from around the world.

I wish you every success in your choice!

Professor Alexander Pelyasov
Chief Scientific Secretary of the 54th ERSA Congress
Words from our New ERSA President

On behalf of the European Regional Science, I am very delighted to welcome you all to our 54th European Congress on ‘Regional development & globalisation: Best practices’ in the historic city of Saint Petersburg.

For this year’s conference programme I am proud to say that we have participation of delegates from across the world with the representation of our ERSA sections going stronger. With around 800 presentations scheduled for this Congress, St Petersburg from 26-29th August, 2014 will be another momentum for Regional Science. ERSA’s main objective through this year’s congress is to foster a stronger relationship with our fellow scientists in research and project excellence.

Having taken on this new position as President of ERSA and working closely with our new Vice-president André Torre, we are looking forward to enhancing the membership of ERSA and its future activities in Regional Science. The co-operation with organisations and institutions continues to grow, through the economic growth and social development across Europe. We aim to maintain and improve the high-level of our Congresses, Summer Schools, Workshops and other events, through fostering research excellence as well as supporting promising young scientists.

I am very pleased to announce the launch this year of the new online and fully Open Access diamond-status journal REGION as the official scientific journal of ERSA. Diamond Open Access is the highest and most preferred Open Access status, because it is freely accessible to all readers, there is no submission or publication fee for authors, it is inclusive of peer review and REGION hosts the final version of the article. REGION aims to strengthen ERSA’s role in facilitating the free dissemination and creation of high-quality research on issues in Regional Science.

I also would like to thank Alexander Pelyasov, chair of the LOC and his team for their two years of careful planning and enthusiastic hard work of which we are now enjoying the results.

I would like to take this opportunity to wish you a fruitful participation! Enjoy your stay in St Petersburg!

Opening Ceremony – August, 26, 17:00-19:00
Welcome reception: 19:00-21:00
Tauride Palace (4 Potemkinskaya str.)

No shuttle service is arranged for the Opening Ceremony.

The opening ceremony will be carried out in the Tauride Palace which is one of the biggest and well-known palaces in St.Petersburg.

In 1783 Prince Grigory Potemkin of Tauride commissioned his favourite architect, Ivan Starov, to design his city residence in a rigorous Palladian style. Considered the grandest nobleman’s residence of 18th-century Russia, Tauride Palace served as a model for innumerable manors scattered across the Russian Empire.

In the 19th century, the palace was refurbished by Carlo Rossi and Vasily Stasov as a residence for minor royalty. It had been used to host balls and exhibitions until 1906, when it was transformed into the seat of the first Russian parliament, the Imperial State Duma. Immediately after the February Revolution of 1917, Tauride Palace housed the Provisional Government and the Petrograd Soviet.

Since 1990s the Tauride Palace was the homeland of Interparliamentary assembly of Member countries of the Commonwealth of Independent States and also serves as one of the main meeting places for the congresses in the city.
27-29 August:
Smolny Convent,
1/3 Smolny street

The Congress sessions will be held in the historical premises of Smolny convent. All buildings in the complex are architectural monuments of the 18th century. It has influenced the location and size of lecture-halls (former classrooms and bedrooms), width of corridors, passages between floors and buildings, and, of course, the decor.

Despite its name, it was never used for religious purposes.
In imperial Russia it became well-known Smolny Institute of Education for Noble Maidens. Now it serves as the complex of lecture hall buildings of the St.Petersburg State University, that possesses all the modern conference facilities. There are three departments in the complex: Faculty of International Relations, Faculty of Political Science and the Faculty of Sociology.

Closing Ceremony – August, 29:
Smolny cathedral (1 Rastrelli sqr.)

The magnificent Smolny Cathedral will host the Congress’ closing ceremony. This stunning blue-and-white cathedral of the Resurrection is the heart of the Smolny complex. It is considered one of the architectural masterpieces of the Italian architect Rastrelli, who also created the Winter Palace, the Grand Palace in Peterhof and many other St.Petersburg sightseeings. Smolny Cathedral was never used for church services. Now it is used primarily as a concert hall.
How to reach the Congress Venue

By Public Transportation:
The Congress venue can be reached by metro and city bus. Council for the Study of Productive Forces (SOPS) under the Ministry of economic development and Russian Academy of Sciences is one of the oldest scientific organization of Russia, created in 1915 under the initiative of Academician Vladimir Vernadsky as Commission of the natural productive forces (KEPS). In 2015 the Institute will celebrate its centenary.

In 1920-1930s SOPS had played the invaluable role in creation of the mineral base of the country. SOPS was one of the elaborators of the GOELRO famous national plan of economic development.

On the basis of SOPS divisions and comprehensive expeditions new scientific institutions, centers, local departments of the Academy of sciences were created in the Soviet republics and regions.

One should mention the role of SOPS in the Great Patriotic War in organization of the successful work of the commission to mobilize the resources of the Urals, Western Siberia, Kazakhstan, the Volga Region for the defense of the country.

The peculiar place in coordination of the scientific research of our country held the General scheme of location of productive forces firstly elaborated at SOPS. It had demonstrated the possibilities to increase the efficiency in solving the major economic problems of the country, in creation and organization of the biggest territorial industrial complexes.

Now the major directions of the scientific research of SOPS are connected with elaboration of strategies, programs of territorial development including problems of economic safety. SOPS has initiated the idea to create federal okrugs, has elaborated the strategies of macroregions, including Arctic zone of the Russian Federation.

Today the leading directions of SOPS activity are the studies of infrastructure, transportation, rational resource use, marine activity, and international relations.

The chairmen of SOPS were world known scientific leaders – academicians V.Vernadsky, I.Gubkin, V.Komarov, L.Shevyakov, N.Nekrassov, and A.Granberg.

“The Underground World of St. Petersburg”,
SUE “Vodokanal of St. Petersburg”

Price: 30 EUR per person
Date: August 26, Tuesday
Meeting time: 13:45
Duration: 14:00 – 16:00
Meeting point: 56, Shpalernaya str. (just opposite the Taurida palace - the Opening Ceremony Venue)

The multimedia exhibition “The Underground World of St. Petersburg” and a large-scale map of the Neva river with up-to-date equipment to show a hydrological regime and an environmental situation in the city is situated in the left extension of the old Water Tower. In the spacious hall there is a large model of the historical center of St. Petersburg created by the Institute of Architecture by the order of SUE “Vodokanal of St. Petersburg”. The model gets alive and lightened by opalescent lights; at the same time, a film shown on the screen above the model tells about a current state of the water supply and wastewater treatment in St. Petersburg and Vodokanal’s role in the city life. An unforgettable trip to the installation “The Underground World of St. Petersburg” gives an opportunity to follow the whole way of water going under the streets and houses.

During the excursion you will get acquainted with construction peculiarities of deep stations, will learn to differ stations according the their construction type: columnar, pier, single-vault types etc. You will discover which stations work as horizontal lift type, what is under a station platforms. The technology of tunneling, the tunnelboring shield system, the chute construction, the escalator operating principle, how much it costs to build 1 meter of tunnel, why ground for metro construction is better in St. Petersburg than in Moscow. Wagons of Petersburg metro: types, structure, weight, capacity and special marking. What is the speed of a train, operating principle of wagons with rotary-field motor. Episodes of competitive “battles” between production plants. For those who want to know: from what does the metro start? For what screen doors were installed at the platforms of some stations? For what Sportivnaya station was built as double-decked? How did a metro wagon develop? Belt-line: to be or not to be? And other interesting facts from St. Petersburg metro life.
Tour to the construction of the second exit from Sportivnaya station of St. Petersburg Metro

Price: 30 EUR per person
Date: August 28, Thursday
Meeting time: 13:45
Duration: 14:00 – 19:30
Mode of transportation: by bus from the Congress venue

The construction of Sportivnaya station second exit is provided by “Metrostroy” OJSC. As part of construction was created a transition tunnel under Malaya Neva, which connects a functional Sportivnaya station situated on Petrogradskaya Side with Vasilyevsky island. Due to the fact that the territory for surface structure constructions is absent on Vasilievsky island, the underground variant was chosen for station vestibule location. Metro ticket hall and staff rooms are situated under the ground just outside Malaya Neva. Technologies of grouting as a wall in a ground and jet grouting were used during their construction.

MONOMAX Congresses & Incentives Professional Conference Organizer

Monomax Congresses & Incentives offers full expertise in meeting and event management since 1991. The professionals of Monomax have a vast experience in different aspects of the MICE industry. They are always eager to manage meetings and events with their greatest personal care to guarantee the highest standards of service.

Why contact Monomax Congresses & Incentives when planning your meeting or event?

TIME is a valuable asset. You get a remarkable time cost reduction by handing over technical tasks of conference management to our team.

COSTS SAVING – The rates for services offered by our company can be lower than the rates negotiated by you as an independent party. We have already got a large network of proven suppliers, so why not benefit from our resources?

PROFESSIONAL BUDGETING AND FINANCIAL MANAGEMENT – We provide qualified assistance in draft budget planning and registration fee estimation, account management and payments handling, liaison with vendors and many other aspects of financial planning and management.

ADVANCED TECHNOLOGIES – Company's in-house integrated conference management software – Alternative Events – is the modern instrument of conference administration. It offers mechanisms of delegate on-line registration, abstract handling and Internet payment processing. For conference secretariat it is a useful tool for conference Web site support, customized reports generation and cash flow management.

QUALIFIED SECRETARIAT MANAGEMENT – Company's experienced staff with excellent English language skills are able to accomplish all the tasks and duties of conference secretariat with maximum efficiency and accuracy.

ON-SITE MANAGEMENT – Our team will provide professional on-site coordination throughout the conference to control all services and to resolve any possible emergencies. Our personnel speak good English and we supply all the necessary equipment for registration.

PROFESSIONAL TRAVEL SERVICES – Being experts in logistics handling we guarantee efficient organization of your conference social aspects – visa support for the delegates, cultural program, hotel accommodation management and transportation.

EXPERIENCE AND QUALITY – Our staff has experience in managing dozens of conferences, we know how to organize a conference on step-by-step basis and how to cope with underlying potential problems in the organization process. We work as a team with constant exchange of knowledge and experience. We work only with proven and most qualified conference services vendors – they know our needs and are flexible to deal with.

Monomax Congresses & Incentives is proud to be a member of International Congress & Convention Association (ICCA), the Netherlands, in MEETINGS MANAGEMENT category, being the only PCO presenting Russia on international professional arena.
