# “STORIES DON’T NEED WORDS”

A unique, interactive continuing education conference  
for professionals and consumers.

## **For Professionals:**

### **Enhancing Patient-Centered Care and Patient Experience**

Patient experience and patient-centered care is the future in health care. What tools does a speech-language pathologist need to implement patient-centered care that improves patient experience? How can this be measured for reimbursement and reported to your administration? At this continuing education event, you will learn tools and techniques for improving patient experience.

## **For Consumers:**

### **Making Your Goals Your Own, and Moving On**

Your life is about all parts of you, not just your aphasia. Your rehabilitation, your goals, and your interactions with friends and family should be about who you are as a person, and who you will be. At this conference, you will learn about setting goals and using techniques that move you forward in your life. Share your story and interact with other people with aphasia and professionals in our community.
