

## Water Purification System

Obtaining laboratory ultrapure water never seemed so easy

- Fully automated water treatment with a user-friendly design
- Semen dilution water requires a pH value of 7.0-7.6, obtained through the calibration of the pH acidity meter
- An imported US nuclear grade resin is installed to make the filtering more extensive
- High production rate of 8L/hour is fully sufficient for the reproduction procedure
- Customizable volume, automatically deliver the requested volume.

We provide a wide range of equipment along with leading breeding solutions
