## **BUpH-IT**

### **SPRAY TANK ACIDIFIER / INDICATOR**

BupH-It is a spray tank acidifier which corrects the alkaline hydrolysis of pesticides and certain fertilizers, neutralizes bicarbonates in spray tank water, and corrects hard water conditions in the spray tank solution. BupH-It has a built-in indicator, making pH adjustments easy. pH levels can be determined simply by observing the color of the spray tank water as shown in the chart below.

#### Ingredients:

20%.....	Acidifiers
0.5%.....	Emulsifiers
1.0%.....	Color indicator
78.5%.....	Inert ingredients

**DIRECTIONS FOR USE:** mix BupH-It into the spray tank before adding pesticides or fertilizers. Determine the pH of the spray tank from the chart below. The typical rate for BupH-It is 4-8 oz per 100 gallons of water which will decrease pH from 8.5 to 5.0 depending upon the water source.

**Pale yellow: pH = 7.0**

**Golden yellow: pH=6.0-6.5**

**Red: pH = 4.5-5.0**
