MYCO FUSION

RELEASE THE POWER OF MYCORRHIZAE

GREEN 150

CONTAINS NON-PLANT FOOD INGREDIENTS:

LIVE ORGANISMS

Active Ingredients:

Glomus intraradices.....104 propagules/gm
Glomus deserticola..... 9 propagules/gm
Glomus etunicatum..... 9 propagules/gm
Glomus clarum..... 9 propagules/gm
Glomus claroideum..... 9 propagules/gm
Glomus mosseae..... 9 propagules/gm
Gigaspora albida..... 9 propagules/gm

Trichoderma harzianum.....152,000 propagules/gm
Bacillus brevis.....148,000 propagules/gm
Bacillus subtilis.....129,000 propagules/gm

Application Methods and Rates: This product is designed to be used in soil system as a dry application. Endomycorrhizae have been shown to benefit over 90% of all plants. For a complete list of plants and their mycorrhizal associations, contact the manufacturer.

For Transplants: Apply product directly in contact with plant roots. For trees and vines, apply 2 tablespoons (30 ml) per plant. For vegetables, strawberries, and other row crops, apply 1 teaspoon (5 ml) per plant.

For Planting Seeds: Apply product in the furrow beneath the seed at the rate of 1 tablespoon (15 ml) per row foot, or broadcast at the rate of 2 tablespoons (30 ml) per square foot and rake into the upper soil layer before planting.

Cultural Conditions: This product contains living micro-organisms that are sensitive to certain cultural practices. To avoid inhibiting or killing the organisms, do not use high rates of inorganic fertilizers, especially those with a high proportion of Phosphorus (P). Avoid application of fungicides with PCNB, thiophanatemethyl, or soil fumigants. For technical information contact the manufacturer.

Storage Conditions: Store in a cool dry place with prolonged temperatures not exceeding 90°F (32.2°C). Avoid direct sunlight. Product should be used in a well-ventilated place.

NET WEIGHT 16 oz
EXPIRES: 31 DEC 2016

GREEN 150 was formulated with the indoor gardener in mind. Delivering multiple endomycorrhizal species and a variety of compatible bio-based organisms in one power packed product is the result of over 17 years in the business of commercially producing mycorrhizal fungi. No other group in the U.S. has a longer track record.

Green 150 is a dry inoculant that can be used in soil or as a dusting agent prior to planting.

Package Sizes: 1 lb and 3 lb

12 packages per case
