

prestalia[®]
perindopril arginine/
amlodipine besylate tablets

Effective FDC for African-American Population

Proportion of Responders* at Day 42 by Race¹

Unadjusted proportions and standard errors from subjects in the intent-to-treat population.

*A subject is defined as a responder if they achieve a value of 140/90 mmHg, or 130/80 mmHg in subjects with diabetes (JNC 7).

WARNING: FETAL TOXICITY

- When pregnancy is detected, discontinue PRESTALIA as soon as possible
- Drugs that act directly on the renin-angiotensin system can cause injury and death to the developing fetus

Symplmed is pleased to announce that it is now providing patients with a valid Rx complimentary atorvastatin with their Rx for PRESTALIA[®].

Intervention studies, including ASCOT-LLA, confirm the benefits of statins in the prevention and reduction of acute coronary syndromes in hypertensive patients with average to lower-than-average cholesterol concentrations.²
