

**rossman school
creve coeur,
missouri**

Landmark was the Program Manager for the Rossman School addition.

When Landmark was hired, design had begun and the project was projected to be over the original budget. Landmark began managing the design process and value engineering the current design to bring the project within the owner's budget.

The \$4.6 million addition and renovation includes:

- renovations to existing facility
- athletic track
- classrooms
- soccer field
- administrative offices
- parking lot
- library and media center
- maintenance building
- playground

Landmark began *managing the design* to bring **the project within** the Owner's **budget.**

THINK VALUE
