

## station casino st. charles, missouri

Landmark managed the design and construction of Station Casinos' new \$205 million facility. It included a two-story dockside gaming facility, along with an 18,000 sf restaurant, and a 44,000 sf riverboat gaming vessel.

When slot machines were legalized in the State of Missouri, Landmark sprang into action. Under Landmark's direction, Station Casinos was the first casino to have slot machines in the State of Missouri — 30 days after the law passed.

After the initial gaming facility was open, Landmark managed the remainder of the project, including:

- 4,000 car parking garage
- elevated roadway and entrance bridge
- 25,000 sf covered porte cochere
- 800 foot long barge basin
- 190,000 sf elevated entertainment deck
- new electrical substation and utility corridor

*With Landmark's management,*

**Station Casino was  
the first casino  
to have  
slot machines  
in the
