

Bringing Nature To You

Spring 2016

AMANDA'S GARDEN

Native Perennial Nursery

NURSERY PROPAGATED PLANTS

◆ Personal Service ◆ Knowledgeable Resource For Planning Your Wildflower Garden ◆ Native Plants For Pollinator Gardens

Native perennial plants are lovely to look at, but more importantly they fill a vital role in nature. Native animals such as butterflies need native plants for food and reproduction.

As native areas such as woodlands, prairies and wetlands become overrun by human infrastructure, invasive alien plants and other disturbances, it is even more important to put at least some native plants in your garden. Using native plants helps to bridge the gaps between forestland, parks and residential areas. This encourages beneficial wild animals and native plants to establish in your area.

Native plants can also be used in the problem areas of the garden, such as shady or very wet areas. This aids you as the gardener to create beautiful solutions to many previously troublesome spots. Think of these areas as an opportunity to promote biodiversity. An ecologically sound landscape benefits you because it is easier to care for. Native plants have adapted to pests, disease, and climate stresses and they cope well with these problems.

Amanda's Garden plants are flowering size and are potted in one quart or larger size pots (except for small flowering plants, such as Bloodroot). Plants may be picked up and garden tours can be arranged (please contact us in advance). Delivery is possible in Monroe, Livingston and surrounding counties.

Please note shipping information:

Plants are shipped only bare root and dormant.

We have many other kinds of native perennials in limited quantities. Please give us a call, e-mail us or send us a note we will be happy to check for you so you can add them to your order. Orders will be confirmed when received if shipping will be later than two weeks. If crop fails or becomes unavailable you will be notified immediately. If you need help in planning your garden please feel free to contact me. We do consultations that will assist you in assessing your site and determining what plants you have and we can give you a list of native plants that will grow on your property. Thank you for your interest in native plants.

Ellen Folts, owner

Ordering and shipping information: We will do our best to fill your order. In the event that this is not possible, we will notify you by mail or email. Please order early to avoid disappointment. Full remittance required at time of order. Please add shipping and handling to your order, \$8.50. Plants are shipped dormant, bare root in late March - May, and September - November. Plants may also be picked up anytime of the year, potted at Amanda's Garden, 8030 Story Road, Dansville NY. Please call ahead to confirm someone is available. (585) 750-6288.

Plants can be ordered on our website: www.amandasnativeplants.com

Woodland Wildflowers

A woodland garden can be developed anywhere there is shade. Shade can be provided by a wooded area, a lone maple tree, a grouping of trees, or the north side of a house. The amount of shade you have will help determine what plants you can grow. Woodland plants also need soil rich in organic matter. If your soil is lacking organic matter you can add leaf compost, peat moss or well rotted manure to the soil. Our native woodland plants are unusual plants that play key roles in the natural local community. They provide food and shelter for native insects, butterflies and birds. Planting woodland wildflowers in our gardens makes them more ecologically friendly.

Black Cohosh, *Actaea (Cimicifuga) racemosa*

This tall stately plant is perfect for a woodland garden that needs a specimen plant to spice it up. The leaves are toothed and cut into threes. The foliage stays clean and green all summer long. The flowers are so white that they glow. Blooms in summer. Partial to full shade. Grows 3 to 6 feet tall.

Price: \$6.00

Red Doll's Eyes, Red Bane Berry, *Actaea rubra*

This plant has excellent lacy foliage that looks much like that of an astilbe. Red berries are formed in July. The berries are poisonous but very attractive. The flowers are creamy white plumes and appear in late May. Shade -part sun, Woodland soil. 1-3 feet tall.

Price: \$6.50

Virginia Anemone, *Anemone virginiana*

Virginia anemone is the perfect plant to add to your woodland garden to provide summer color. The white blossoms really lighten up shady areas. Unlike other Anemones, this Anemone doesn't produce runners, but forms a clump. A group of Virginia Anemone really stands out in July when a lot of woodland plants are not in flower. Virginia anemone also does well in meadow or prairie settings. Deer generally do not eat this plant. Grows 1 to 2 1/2 feet tall.

Price: \$5.50

Maidenhair Fern, *Adiantum pedatum*

Delicate, exquisite, fan shaped fern, very distinctive in appearance. This fern spreads slowly by creeping rhizomes. It can grow to 20 inches but size will vary with the amount of light it receives. It likes rich soil. Maidenhair fern is very shade tolerate but also does well in light shade.

Price: \$6.50

Wild Columbine, *Aquilegia canadensis*

Yellow and red trumpet flowers provide early spring food for hummingbirds and butterflies. Flowers from early May into June. The plant has compound scalloped fan-shaped leaves. It grows 1-2 feet tall. Columbine likes shade or part sun and woodland soil. It will tolerate full sun if planted in rich moist soil, does not tolerate wet soils.

Price: \$5.50

Jack-In-The-Pulpit, *Arisaema triphyllum*

Jack-In-The-Pulpit has unusual flower, a green and brown striped spathe with 'Jack' inside. Flower is produced in late May - early June. Nice foliage in summer, red berries in fall. Jack-In-The-Pulpit is quite easy to grow, given the right conditions. The soil should be acidic and rich. Grows in the shade. Jack-in-the-pulpit grows from a bulb.

Price: \$6.50

Wild Ginger, *Asarum canadense*

Very nice ground cover. Attractive heart shaped leaves over brown flowers. Blooms in May. Plant spreads and forms a dense mat. Plant Wild Ginger with other ground cover such as Green and Gold, Bloodroot, Foam Flower and Woodland Phlox. Grows about 8 inches high. Woodland soil, shade. Plant with early spring bloomers. The leaves last until late fall.

Price: \$6.50

Palm Sedge, *Carex muskingumensis*

The grass like leaves of this very interesting plant whorl around the stem resembling a palm. The plant grows about two feet in height. Use as a bold accent plant. Tolerates moist to wet soil or normal garden soil, in full sun or partial shade. Provides cover for birds and other wildlife. Provides seed for birds.

Price:\$5.50

Green and Gold, *Chrysogonum virginianum*

Yellow five-petaled flowers spread across this wonderful plant. Green and Gold flowers in late May and again in the fall. Green and Gold makes a very attractive ground cover. The leaves are oval-shaped and neat looking. Average soil. Part sun - shade.

Price: \$5.50

Wild Geranium *Geranium maculatum*

Wild Geranium is a wonderful woodland perennial and a must for every wildflower garden. The wonderful lavender blossoms appear in May. They sometimes produce a re-bloom in September, though this is rare. Abundant lavender flowers are produced in late April through mid May, above cut leaf foliage. Forms nice clumps. Grows 1-2 feet. Shade, Moist soil. Wild Geranium can be used in combination with many other woodland plants. I like to use it with Ferns, Wild Columbine, Creeping Phlox, Foam Flower and Violets, to name a few.

Price: \$5.50

Hepatica, *Hepatica acutiloba*

A wonderful woodland wildflower, flowers in the early spring when nothing else is in flower. The blossoms range in color. Color varies; white, pink, or blue. The leaves are 3 lobed, dark green, and heart shaped. The leaves are semi-evergreen in the spring as the flowers unfold the old leaves die back. After the flowers open the new leaves emerge. Hepatica will grow in part-sun or shade in well drained, moist soil. It is best to put them on an incline or build them a small hill for them because the crowns do not tolerate being water-logged.

Price: \$8.00

Twin Leaf, *Jeffersonia diphylla*

Named for Thomas Jefferson, this is a very interesting plant. It has one leaf that looks like two twin leaves on each stem. In the early spring it produces pure white flowers. The seed pod looks like little pots that lift their lids and expose the seeds. Grows 5 to 10 inches tall. Shade, moist soil.

Price: \$6.50

White Wood Aster, *Eurybia divaricata*

Woodland Aster that is sure to bring a bright cheery feel to the late summer garden. The zig zaggy stems add interest and the clouds of flowers add charm. They will grow 1 to 2 feet tall and bloom in shade to part sun.

Price: \$5.50

Blue Wood Aster, *Symphyotrichum cordifolium*, (*Aster Cordifolius*)
Beautiful violet blue flowers on arching stems. Plant grows 2 - 3 feet tall. Tolerates shade to part sun and makes an excellent fall show in the woodland garden.

Price: \$5.50

Goldenseal, *Hydrastis canadensis*

Crinkled maple shaped leaves arise from a yellow rhizome in mid-May. In the center of the leaf one solitary fringed white flower appears. The flowers however are not the really showy part of the plant, it is the berries that form in the late summer that really make this plant shine. Height is about 1 foot. Goldenseal grows best in shade or semi – shade.in rich woodland soil.

Price: \$7.50

Dwarf Crested Iris, *Iris cristata*

Dwarf Crested Iris is an excellent ground cover. This beautiful blue Iris is only six inches high. The blossoms rise above the bright green foliage in May putting on a gorgeous display. This plant forms a dense mat of rhizomes. It grows in part sun or shade, but it is much darker green in shade. Soil should be moist in spring, it will tolerate dry soil in summer.

Price: \$5.50

Interrupted Fern, *Osmunda claytoniana*

This elegant, vase shaped fern has bright green fronds that are upright and lacy. The fronds are “Interrupted” as the plant grows, the fertile leaflets appear in the middle of the frond. As the spores mature the area becomes empty. Interrupted fern likes moist to dry, acid to neutral soils. This fern needs shade.

Price:\$6.50

Woodland Phlox, *Phlox divaricate* ‘Blue Moon’

Woodland Phlox is a magnificent ground cover with fragrant blossom. The foliage is evergreen and shiny and the plants grow from 8 inches with the flowers rising above the foliage from 10 to 16 inches. Great replacement for invasive Vinca minor. Grows in shade or semi shade.

Price:5.75

Woodland Phlox, *Phlox stolonifera*

A splendid low growing plant. Very shade tolerant, an excellent plant for use as a shady evergreen ground cover. Looks very nice with Foam Flower, False Solomon’s Seal, and May Apple. The plant grows about 6 inches tall. Moist soil, Shade.

Woodland Phlox ‘Sherwood Purple’ - Deep purple flowers with deep green foliage.

Woodland Phlox ‘Blue’ - Violet blue flowers with deep green foliage.

Woodland Phlox, Pink - Pink flowers with deep green foliage.

Price: \$5.75 each

False Solomon's Seal, *Maianthemum (Smilacina) racemosa*

Outstanding multi-season plant. White creamy plumes of flowers in May - June. Lovely green foliage in summer arches over the garden. In late summer the fully ripe berries are bright red. When False Solomon's Seal are in berry they are a spectacular sight. 1 –1 1/2 feet tall. Shade - part sun, moist woodland soil.

Price: \$5.50

**Jacobs Ladder, *Polemonium reptans***

Blue - violet flowers cover this wonderful plant from April into May. The foliage consists of evenly spaced leaflets along the stem. Jacob's Ladder forms mounded clumps that are attractive all summer. It grows 8–12 inches tall. This plant does best in moist soil and will grow in part sun or shade.

Price: \$5.50

Christmas Fern, *Polystichum acrostichoides*

Beautiful evergreen fern. Fronds are very dark green. This fern tolerates many soil conditions and can be grown in the shade or fairly open conditions given the right amount of soil moisture. Fronds can grow to 3 feet in length but they bend over so the plant stands about 1 1/2 to two feet tall. Adds year round interest to the garden.

Price: 6.50

**Blood Root, *Sanguinaria Canadensis***

Pure white flowers that are open during the day and close at night, grace this lovely plant. It flowers April to May depending on the weather. When Bloodroot flowers it is a sign of the arrival of spring. While the flowers do not last long, the very interesting scalloped shaped leaves last into late August. Bloodroot gets its name because when the roots are scratched or cut they seem to bleed. Grows 6 to 11 inches tall,

Price: \$6.50

Blue Stemmed Goldenrod, *Solidago caesia*

Blue-stemmed or Wreath Goldenrod is a great plant to brighten up your woodland garden in the summer and into the fall. This goldenrod is not aggressive like other species of goldenrod. It blooms along the stem. Plant it with Cardinal Flower and Bottle Gentian for an awe-inspiring combination. Use it in shady areas with White or Blue Wood Aster to lighten a dark corner. This goldenrod is not fussy about soils or light conditions. Grows 1 to 2 feet depending on conditions, stays smaller in shady areas.

Price: \$5.95

Yellow Wood Poppy, *Stylophorum diphyllum*

Brighten up your woodland garden with Yellow Wood Poppy. Bright golden yellow flowers in spring and sporadically throughout the summer. Leaves are dark green and deeply lobed. Shade - part sun. Grows 1 to 1 1/2 feet tall.

Price: \$5.50

Great Merry Bells, *Uvularia grandiflora*

Yellow bell shaped flowers dance along the stems of this wonderful plant in early - mid spring. Leaves are bright green. This is an excellent woodland garden plant. Unusual triangular shaped seed pod. Grows about 1 to 2 feet tall. Shade, Moist soil.

Price: \$6.50

Little Merry Bells, *Uvularia perfoliata*

Light yellow, bell – shaped flowers grace this unusual plant. The flowers are produced from early- mid spring. The leaves are bright green and appear to weep. Stunning garden plant, it adds a lot of interest to the garden. Unusual triangular shaped seed pod. Grows about 1 foot tall. Shade, moist soil.

Price: \$6.50

Netted Chain Fern, *Woodwardia areolata*

Very nice ground cover. Netted Chain Fern is a deciduous, colony-forming, waxy green fern which stands 1-2 ft. high and has fronds 4-8 in. wide. The sterile fronds are deeply lobed, and the veins in the leaf form a net-like pattern. The fertile fronds are similar but reduced in width. The entire plant maintains a neat, compact form. Fiddleheads are bronzy and appear in early spring. Woodland soil, shade. Plant with early spring bloomers.

Price: \$6.50

Wetland Plants– Most of these plants will tolerate dryer soils too.

Swamp Milkweed, *Asclepias incarnata*

Vibrant pink flowers crown this 2 - 4 foot plant. Very nice background plant or plant for the wet garden. A wonderful companion for tall meadow rue, New England aster, and blue flag iris. Plant provides larval food for Monarch butterfly and the nectar attracts many other butterflies. Blooms in summer. Plant likes full sun. Tolerates many soil conditions.

Price: \$5.99

White Turtlehead, *Chelone glabra*

Creamy white flowers with pink tinge in late summer is shaped like a turtle's head. Turtlehead grows well in moist-wet soils. It will grow well in full to partial sun. Rich dark green leaves add color and texture to your garden. Plant grows 2 to 4 feet. Provides nectar for butterflies, honeybees, bumblebees. Host plant for Baltimore Checkerspot butterfly.

Price:\$6.50

**Bottle Gentian, *Gentiana clausa***

Brilliant deep violet blue flowers top this plant in the fall, usually in September until late October. The color is striking as other plants are starting to get their fall colors. This plant likes moist soil so it is a good companion with Red Cardinal flower and goldenrods. Bottle Gentian grows 14' to 18'. Part-shade or light shade. Deer do not like to eat Gentian.

Price:\$6.50

Joe Pye Weed, *Eupatorium purpureum*

An excellent butterfly plant with umbels of pink flowers. Begins blooming in late July thru September. Joe Pye Weed makes a wonderful addition to a garden, meadow or wet meadow planting. The color of a mass planting in the late summer early fall is awe inspiring. Joe Pye Weed grows 2 - 6 feet tall. Moist soil. Semi-shade or sun. Very versatile as far as conditions it will tolerate.

Price: \$5.50

**New York Ironweed, *Vernonia noveboracensis***

New York Iron is a tall perennial that will attract many butterflies. Clusters of deep lavender to violet flower heads; together, clusters form a loose spray. Tolerates wide range of soils, but prefers rich, moist, slightly acidic soils. Blooms late summer into fall. Lance-shaped leaves (6-8" long). Flowers give way to rusty seed clusters. The source of the common name has been varying attributed to certain "iron-like" plant qualities including the tough stems, the rusty-tinged color of fading flowers and the rusty colored seeds. Birds will eat the seeds. Grows 4 to 6 feet in height with a 3 to 4 feet spread.

Price: \$6.50

Turks Cap Lilly, *Lilium superbum*

One of our native lilies, this plant makes a spectacular showing. It grows to 7 feet tall. It needs a moist rich soil, sun to partial shade. Orange - red flowers with reddish brown spots adorn the plant in July. The bulbs we are offering are about a nickel in diameter. They will probably bloom in 2 to 3 years in the right soil and light conditions.

Price: \$5.50

Red Cardinal Flower, *Lobelia cardinalis*

Stunning bright red, elongated cluster of tubular flowers. Hummingbirds love it! Red Cardinal Flower prefers a moist soil high in organic matter but will do well in the garden in soil that is well amended. 2 - 4 feet tall. Sun or shade.

Great Blue Lobelia, *Lobelia siphilitica*

Blue elongated clusters of flowers of varying hues make this plant an excellent choice for the garden. Nice cut flower. It grows 2 to 3 feet. Flowers August through September. Really nice in combination with Red Cardinal flower, turtlehead, goldenrods, and ferns. Sun or shade and moist soil.

Price: \$5.50 each

Monkey Flower, *Mimulus ringens*

Lavender to bluish-purple flowers that resemble a monkey's face dance along the length of the stems. The stems of this plant are square. Both the flowers and foliage are quite attractive. Monkey Flower is a larval host and nectar source for Common Buckeye and Baltimore Checkerspot butterflies. This plant is native to wet meadows and stream banks but grows well in average to wet soil in part to full sun. Monkey Flower will naturalize by seed and rhizomes when it is happy. Monkey Flower grows 1 to 3 feet depending on where it is planted.

Price: \$5.50

Royal Fern, *Osmunda regalis*

Attractive bright green fronds with rounded leaf blades. When they first emerge from the soil the fronds are an interesting bronze color. Excellent for use in moist areas or around ponds. Needs full or partial shade. Grows about 2 to 5 feet tall.

Price: \$7.50

Virginia Bluebells, *Mertensia virginica*

Blue bells hang over lush green foliage. Blooms in late March-mid May before many other perennials. Foliage goes dormant in summer. The plant grows 1-2 feet. Moist soil in spring, happy in sun or shade.

Price: \$5.50

Green Coneflower, *Rudbeckia laciniata*

Yellow daisy-like flower with green eye. The flower petals are flexed backward. The height, 3 to 12 feet, makes it a nice background plant for the meadow garden. Flowers reliably in moist or dry soil but prefers moist soil. Flowers July – September. Sun - part shade.

Price: \$5.50

Swamp Saxifrage, *Saxifraga penslyvanica*

Very interesting plant that will grow in very wet to moist soils. Swamp Saxifrage starts out as a rosette of leaves and the flower stalk rises above the leaves in the spring. The flowers are greenish white and very attractive. The plant grows to about 3 feet tall. Plant in either shade or semi shade or part sun.

Price:\$6.50

**Blue Eyed Grass, *Sisyrinchium angustifolium***

Blue-eyed Grass has small star-shaped flowers with soft blue petals and yellow centers on long, narrow leaves resembling grass. It is often seen in wet meadows with grass. It is a very dainty flower that may go unnoticed in the wild. Blue-eyed Grass a lovely border plant, put it on the edges of the woodland garden or on the edges of a meadow garden. It likes moist soil and likes part to full sun. The height is 10 to 12 inches.

Price: \$5.50

Tall Meadow Rue, *Thalictrum polygamum*

Butterflies are attracted to the white plumes of fluffy flowers in late August. Excellent lacy foliage, 3 - 8 feet tall, adds texture to the garden all season. Tall Meadow Rue prefers moist soil. Its final height will depend on weather it is planted in sun or shade; grows taller in sun.

Price: \$6.25

**Eastern Marsh Fern, *Thelypteris palustris***

Ferns are wonderful plants they add texture to the garden. This one grows in sunny wet places and will tolerate some shade too. The fronds are dark green and the fern grows to 2 to 4 feet tall. Works well with Joe Pye Weed and New England Aster.

Price \$6.99

Blue Vervain, *Verbena hastata*

Bright blue flowers spikes of flowers in a candelabra formation top this wonderful plant for wet areas. This is a great plant for pollinators such as bees, butterflies and moths. Song birds will eat the seeds. Deer and other mammals avoid this plant because it has bitter leaves. This is a host plant for Common Buckeye. The plant grows to about 4 to 6 feet in Sun, part-shade and shade.

Price: 5.50

Interesting Plants for Sun and Drier Soils

Common Milkweed, *Asclepias syriaca*

This is the road side plant that Monarch Butterflies use a host plant. They lay their eggs on the underside of the leaves. The caterpillars eat the leaves. Common Milkweed has a very pleasant spicy fragrance. Common Milkweed is rhizomatous; it is also aggressive and therefore may not be suitable for small gardens. It grows to 3 feet tall, prefers sun will grow in most soils.

Price:\$5.25

Butterflyweed, *Asclepias tuberosa*

If you have a dry sunny location, try Butterflyweed. It is a host plant for Monarch butterflies and many different butterflies and insects especially bumble bees are drawn to butterflyweed. The best attribute of butterflyweed is it's stunning orange flowers. The color will knock your socks off. The leaves are dark green, lance shaped and really make the flower color pop. The plant is very busy and grows about 1 1/2 to 2 feet tall and is just as wide. It will not tolerate moist or wet soils.

Price:\$6.25

Purple Cone Flower, *Echinacea purpurea*

Big, daisy like flowers with purple rays around a dark orange disk. This is a favorite source of nectar for many butterflies. Provides seed for birds in fall. Blooms July thru September. Grows 1 - 3 feet. in sun with low soil moisture. Very drought tolerant. Use in the perennial border or meadow planting. Companions: Monarda, Black-eyed Susan, Liatris and Tall Meadow Rue. Nice cut flower.

Price: \$5.50

Wild Bergamot, *Monarda fistulosa*

Lavender pink flowers attract hummingbirds and butterflies. Plant has a nice minty smell. Should be part of any meadow garden. This plant likes part shade - sun and moist soil. Spreads reliably even in dry soils. Grows 2-3 feet tall. Flowers in July.

Price: \$5.75

Smooth Penstemon, *Penstemon digitalis*

Smooth Penstemon is a late spring-early summer bloomer with beautiful tubular flowers. These flowers are true white sometimes tinged with pink and adds brightness to the garden. The flowers attract humming bird, butterflies, bees and other insects. Very nice plant to add height and later spring color.

Price:\$5.50

**New England Aster, *Symphyotrichum novae-angliae***

New England Aster is a beautiful dark blue to purple daisy like flower. It is drought tolerant but also naturally grows in wet meadows. New England aster likes sun but also thrives in filtered shade. It is a very versatile plant. The plant grows to about 3 to 4 feet but you can control the height by cutting it back in June. These plants are also great sources of food for humming birds and butterflies. New England Aster is a larval source for the Pearl Crescent Butterfly.

Price: \$5.75

Black-eyed Susan, *Rudbeckia fuglida*

This flower is one you may remember from your childhood. Orange-Yellow flower with a dark brown center. Stays in flower from July - August. Black Eyed Susan is an excellent nectar plant for bees, butterflies and other insects. It provides seed for birds in the fall and winter. This makes a nice cut flower. Grows about 2 feet. Sun or semi-shade will both make it happy. Black Eyed Susan grows well in average to dry soils. It is not fussy.

Price:\$5.50

**Showy Goldenrod, *Solidago speciosa***

This truly stunning goldenrod carries its flowers in dense, pyramidal heads atop strong stems. This makes it a great cut flower. This plant provides pollen and nectar for a wide range of insects and provides seed for birds. Goldenrod does not cause hay fever, the pollen grains are too large to float in the air. It flowers in full sun to part shade. It will grow in moist to dry soils. It stays in tight clumps and looks great with Cardinal Flower, Blue lobelia, New England Aster, and Smooth Aster. Showy Goldenrod grows 3 to 4 feet.

Price:\$5.50

Additional Woodland Plants

American Bugbane, <i>Actaea rubifolia</i> - White flowers in the fall	\$6.50
Goats Beard, <i>Aruncus diocus</i> - White fluffy flowers in early summer	\$6.25
Marsh Marigold, <i>Caltha palustris</i> - Needs wet soil. Yellow flowers in early spring.	\$5.50
Squirrel Corn, <i>Dicentra canadensis</i> - Flowers resemble white hearts	\$7.50
Dutchman's Breeches, <i>Dicentra cucullaria</i> - Dainty plants with white flowers	\$7.50
White Shooting Star, <i>Dodecatheon meadia 'alba'</i> - Unusual white flowers	\$6.50
Virginia Waterleaf, <i>Hydrophyllum virginianum</i> - white bell shaped flowers	\$5.99
May Apple, <i>Podophyllum peltatum</i> - Interesting leaves, excellent ground cover.	\$6.50
Hairy Solomon's Seal, <i>Polygonatum pubescens</i> - Creamy white Flowers	\$6.50
Wild Stonecrop, <i>Sedum ternatum</i> - White stare shaped flowers	\$5.50
Early Meadow Rue, <i>Thalictrum dioicum</i> - Excellent foliage plant	\$5.95
Labrador Violet, <i>Viola labradorica</i> - Purple tinted leaves	\$5.50

Plants for Pollinators

Nodding Pink Onion, <i>Allium cernuum</i> - Summer flowers	\$5.50
Anise Hyssop, <i>Agastache foeniculum</i> - Blue flowers, pleasant anise scent	\$5.50
Showy Tick Trefoil, <i>Desmodium canadense</i>	\$6.50
Blue Flag Iris, <i>Iris versicolor</i> - Likes moist to wet soil, blue flowers	\$5.95
Alpine cinquefoil, <i>Potentilla neumanniana</i> - Yellow flowers great ground cover	\$5.25
New York Aster, <i>Symphyotrichum novi-belgii</i> - Bright blue flowers	\$5.75
Smooth Aster, <i>Symphyotrichum laeve (Aster laevis)</i> - Light blue flowers	\$5.75
Golden Alexanders, <i>Zizia Aurea</i> - Yellow Flowers, Black Swallowtail butterfly host Plant	\$6.50

Grasses, Sedges and Ferns

Indian Grass, <i>Sorghastrum nutans</i> - Larval host for Pepper and Salt Skipper	\$6.50
Upland Sedge, <i>Carex appalachica</i> - Fine textured grows in dry shade.	\$5.50
Bottlebrush Grass, <i>Elymus hystrix</i> - Woodland grass	\$6.50

Amanda's Garden is open weekends in April and everyday except holidays after May 1st. See the website for exact dates and times.

Our Open House weekend is May 7th and May 8 2016.

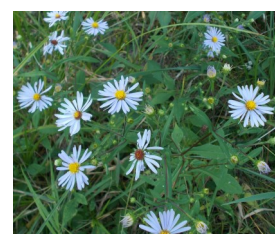

This is peak time to see early spring flowers.
