

HOW GREEN
IS MY CITY?

NEW SUSTAINABILITY UNPLUGGING ALL SICK

**What**

UA Cityplaza, a concept cinema with modern art

Where

Hong Kong

Who

Asiacity Architects

Why

Because never before has a multiplex cinema teamed up with the Museum of Modern Art anywhere in Asia.

How

To create an original and unique attraction, Asiacity Architects used the work of various artists as inspiration for each space. The Oyster3 restaurant/concession bar is a three-dimensional manifestation of American abstract artist Barnett Newman's painting 'Adam', while the all-white box office at the entrance takes its design from the minimalist works of artist Donald Judd, American pop art guru Ed Ruscha and abstract painter Frank Stella. The Crimson Room is reserved for private viewings and functions, while the skylit Galleria serves as a platform for artwork, guest receptions for movie premieres and other special events. The Tunnel Gallery acts as an exhibition space for moving images and the L-Shaped Gallery displays both artworks and moving images from the latest films which are projected on diaphanous screens
