

From Orielle 12-5-2011 Thanks!

First get the doid number for your invisible destination. You can get this by either the clicking on About for it and looking at the end of the url address for about or use ctrl shift D. In the following URLs replace the ***** with the doid number of your invisible destination.

For teleport link:

*

For the owner to use to edit

http://webapps.prod.there.com/sign/sign?op=edit&id=*****&mode=OT

For others to use to leave message:
