

Graphic Designer

ArchieMD seeks an ambitious Graphic Designer to create professional and innovative content for medical applications. Successful candidates will work directly with the team to create high quality UI designs for a variety of mediums. Candidates must have a solid knowledge of design best practices, latest trends, and available tools to augment the user experience. The position offers a unique opportunity to work on creative applications that challenge the state-of-the-art.

Position Requirements:

- 3 to 5 years experience using Adobe Photoshop or Illustrator.
- Strong knowledge of UI/UX design. Mobile UI design experience is a plus.
- 2 to 4 years web design experience. CSS and Dreamweaver experience a plus.
- Ability to work in a team environment to take direction, develop, and implement designs.
- Ability to assist in the decision making process for the overall look and feel of the various applications.

ArchieMD, based in Boca Raton, FL, is a growing technology company (~20 employees) that develops interactive and immersive applications to teach medical concepts to wide array of stakeholders (students, doctors, nurses, patients, jurors, military personnel). These applications seek to use visual and interactive techniques to teach complex medical concepts. Currently the company is developing state-of-the-art immersive environments (using augmented reality), 3D simulations, series games, and interactive applications.
