

WALLGOLDFINGER | SUMMIT

A RECONFIGURABLE CONFERENCE TABLE SOLUTION

BENEFITS

- A reconfigurable table crafted with such high quality and elegance it meets every need from the conference room to the executive dining room to the boardroom
- An exclusive bridge design perfect for rooms with operable walls
- Diverse materials, including stone, to meet every room design
- Superior leg room around the entire table for uninterrupted comfort and maximum seating capacity
- Seamlessly integrated technology to meet power and data needs

60" x 60" Summit tilt-top tables with quartered light walnut veneer tops and trapezoid bases, and polished stainless steel applied edges and hatch lids

ABOUT

Patent-pending Summit tilt-top tables offer the ultimate in reconfigurability for conferences and more. Tabletops tilt to allow them to fit through doorways and in elevators, and tables are set on casters so they can easily roll to create a new table configuration or to be stored. When the tabletop is lowered, the casters automatically retract for stability.

Most commonly made in a 60- by 60-inch size, Summits are can be made as large as 60 by 96 inches. Tables nest for compact storage. Eight 60- by 60-inch Summits store in just 65 square feet, or a 5-foot by 13-foot space. Summits are constructed with beautiful materials, including veneer, plastic laminate, glass, lightweight stone and stone resin, and metal edging. The tables fully integrate power and data with wire management within the table base. UL listed daisy chaining is available for quick plug-and-use reconfigurability. The table base design further provides exceptional leg room from all sides.

When you need an elegant, reconfigurable conference or boardroom table solution, the Summit, made exclusively in Vermont by WallGoldfinger's fine furniture makers, is your choice.

THE SUMMIT: HOW IT WORKS

CONTENTS

RECONFIGURABLE

Summit tables offer the perfect solution for conference and boardroom meeting spaces requiring table reconfiguration. Group Summits to form a large, attractive conference or boardroom table. Separate tables for breakout meeting space or for dining. And utilize WallGoldfinger's unique bridge design to join two fixed conference tables into one large table.

For your reconfigurable boardroom or conference table needs, WallGoldfinger's Summit tables offer a high quality solution.

BENEFITS

- An elegant solution for rooms with multiple uses
- A unique bridge design joining two fixed tables into a single table for larger gatherings
- Easy for just one person to move, level and lock in place to maximize room turnover and layout options
- Perfect for break-out and executive dining needs, including allowing housekeeping staff complete access to floor care through Summit's unique roll-away design

60" x 60" Summit tilt-top tables with quartered zebrawood veneer tops, hatch lids and three-ply edges, and square bases in bronze colored urethane

SIZES

Offered in square and rectangular sizes, Summits' provide superior leg room and seating and are ideal for dining, conference and boardroom needs. For example, break out Summits in a conference or dining room. Join four Summits into a square for a working discussion. Form five Summits in a line for an impressive conference table for a larger gathering.

And when it's time to store your Summits, they're perfectly sized for fitting through doorways, in elevators and in storage areas.

BENEFITS

- Diverse size options to maximize your room dimensions
- Standalone tables are perfectly sized for groups of eight or more
- Square and rectangular sizes can be easily and quickly ganged to form larger conference and boardroom tables
- Specially designed to fit between two fixed tables to create one large table and use rooms with operable walls to their greatest potential

MATERIALS

WallGoldfinger is a leader in sourcing and laying up veneer, stone, glass and more. Summit tables are uniquely offered in all these materials as well as engineered quartz, faux leather, plastic laminate and resins like LightBlocks and 3form stone. Accent your materials with metal hatch lids and edges.

Whether it's the beauty of veneers, the durability of stone or the modern look of glass, Summit tilt-top tables give you choice, beauty and sophistication.

BENEFITS

- The most diverse materials available to meet every room design
- A reconfigurable table available in stone for clients seeking the ease of a reconfigurable table and the integrity of stone
- Limitless custom options to accommodate your unique color and design palette

60" x 60" Summit tilt-top tables with Travertino Vena porcelain tops, Park Elm plastic laminate square bases, and applied metal edges and hatch lids in brushed medium antique bronze

BASES AND EDGES

Summit's square and trapezoid bases uniquely provide superior leg room and a wire management solution. Choose a base made from a matching veneer, plastic laminate, urethane or custom metal cladding. Then choose an edge detail of veneer, solid wood or metal to match for your unique look.

BENEFITS

- Straight and trapezoid base styles to complement your room and furniture design without compromising leg room
- Diverse base materials to match or contrast your tabletop
- Technology contained, yet easily accessible, within bases for beauty and safety
- Wood, veneer and metal edge styles to transition your table from traditional to modern and match accents like hatch lids

TECHNOLOGY INTEGRATION

WallGoldfinger is an industry leader in technology integration for today's businesspeople, who know that a table is much more than a table; it's a communication tool, it's a media center and it's an active work station. Summit tables' hatch lids and customizable fixture boxes provide the access AV specialists need to provide you the telecommunication and power resources necessary for success in today's business environment.

BENEFITS

- Customizable power and data boxes in single and double sizes, along with microphone options, discreetly meet your technology needs
- Power and data boxes are fixed in the table base with wiring completely unseen inside the base
- Bases each have two lift-off panels to quickly and easily access technology safely stored within
- Aesthetically pleasing hatch lids hide power and data boxes, maintaining the table's highly executive look
- UL listed daisy chained power available for easy reconfiguration and fewer floor cores

POWER AND DATA BOXES

Single power/data box

Double power/data box

UL listed box for daisy chaining

HATCH LIDS

Metal hatch

Wood hatch

COMMUNICATION

Microphones

WIRE MANAGEMENT

Lift off access doors providing access to wiring

Table to table UL listed daisy chaining

FUNCTION AND STORAGE

WallGoldfinger's unique Summit design features a tilting tabletop. Tilt up the top and casters automatically extend so your Summit table can be easily moved by one person to a new table configuration or for storage. Summits nest in their tilted position for compact, easy storage. When you're ready to use your Summit once more, roll it back in place and move the tabletop into its horizontal position. Casters automatically retract and the table is now securely on the floor.

Make the most of your valuable real estate with a Summit table.

BENEFITS

- Easily tilt, roll, reconfigure or store tables with just one person and no tools or lifting required to improve room turnover times and reduce strain on staff
- Tilt and nest tables to fit a room full of tables in a storage closet to maximize use of your valuable meeting space
- Tilted tables fit through doorways and in elevators to utilize or store tables among multiple floors for maximum convenience and use

Fit 200 square feet of 60" x 60" Summit tilt-top tables in about 90 square feet of storage space. These Summits are glass back-painted Polo Blue with Comfort Edge aluminum pan frames and hatch lids in Silver power coat, and silver urethane trapezoid bases.

UNLOCK

Loosen one side of Anderlocks (if using)

Rotate Anderlocks under one tabletop (for easy access later)

TILT

Pull bar under table

Bar releases top into tilted position and engages casters

LOCK

Pull levers to lock casters into position

ROLL

Easily push to a storage area

STORE

Nest tables in tilted position for compact storage
