

Introduction/Contents

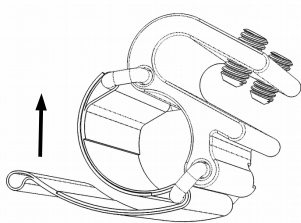

GUTS HM1™ mounting system provides versatility to mount a variety of double A and triple A flashlights, cameras or tools to your helmet or hardhat. The QuickStrap™ is constructed from are NFPA fire rated materials.

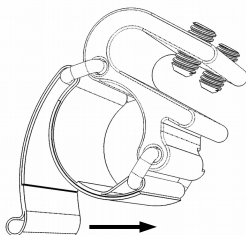

Instructions

The optional adhesive backed securing square can be used to secure the QuickStrap™ when holding smaller diameter items.

The QuickStrap's™ rings are interchangeable. This enables the user to choose if the strap is pulled up or down when securing items.

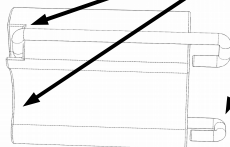

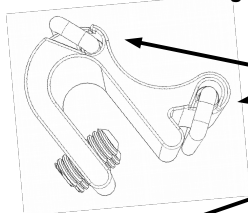

Standard Pull

Reverse Pull

Change QuickStrap™ Pull Direction

- 1) Align the spring loaded strap ring with the notch in the aluminum body
- 2) Push the spring loaded strap ring into the slot which frees the opposite end
- 3) Now remove the strap ring.
- 4) Use caution not to lose the internal spring if it should come out.

Installing and Using GUTS HM1™

CAUTION: Do not over tighten set screws when securing GUTS HM1 to the helmet as it could damage the helmet.

GUTS HM1 is uniquely designed for installation on the top or bottom of the brim on the front, back, left or right side of the helmet. It does what YOU need.
