Brooklyn, Age 5

Dance Recital 2014

Zombie Run 2013

OUR OWN ST. JUDE MIRACLE

For every good run, there should be something beyond the fun to inspire you. Table Rock Zombie 5K is teaming up with St. Jude Children's Research Hospital to help children fight very real diseases. All participant entry fee money will be donated to help them in their battle to make a difference.

A special member of our Dance Branson School of the Arts Family, Brooklyn Grace, was diagnosed with Acute Lymphoblastic Leukemia at the age of 3. Since April 2012, she has undergone chemotherapy at St. Jude's Research Hospital to rid her of the horrible disease. In May of 2012, Brooklynn had quite a setback. She suffered from reverse flow of her liver due to 6TG, a chemo drug. This was so rare; St. Jude had only seen one other case of this effect. After being on a breathing machine and in a medically induced coma for ten days, she pulled through. It was a miracle...her spirit was so strong! As of June 12, 2013, Brooklynn is cancer FREE! She is now attending school, taking dance classes and being a kid! Brooklyn is such an inspiration to all of us at Dance Branson and we are grateful that St. Jude Children's Research Hospital has been one of her saving graces.
