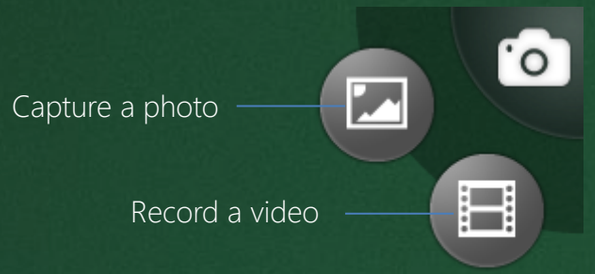
Capture Photo & Record Video



Click the camera icon, the Photo and Video icons show up.

- Click the photo icon to take the current screenshot.
- Click the video icon to record the current screen. Also the sound can be recorded at the same time if the microphone device is installed. (for more how to setup the sound recording, please see the page 32)

If the video recording has to be stopped, click the "STOP" icon to stop the recording.

To find the captured photo or recorded video, please go to the "More Files" from the main menu.

Broadcast

Broadcast your screen and interact with the people who are in your interactive room.

- Tick: select the person to broadcast. To cancel, click the name again.
- Unlock/Lock: when a person is selected, you can unlock and pass your screen control to the person. So the user can control the content screen that you broadcasted.
  To switch lock or unlock, click the icon again.
  No more than one person is unlocked.
- Select All: select all to broadcast your screen to everyone on the list.
- Stop: Stop all the broadcasting

Select Color

Click the rainbow color icon, the color palette shows up.
Select a color to change your pen color

Windows Version

Interactive Room

Interactive Room

you can broadcast and interact your screen to whom are in your room.

Networking Requirements
802.11n Wireless or 100Mbps/higher Ethernet network

Broadcast Performance:
The maximal allowable number of users for broadcast is:
LAN(100Mbps) < 10
Wi-Fi (802.11n) < 10

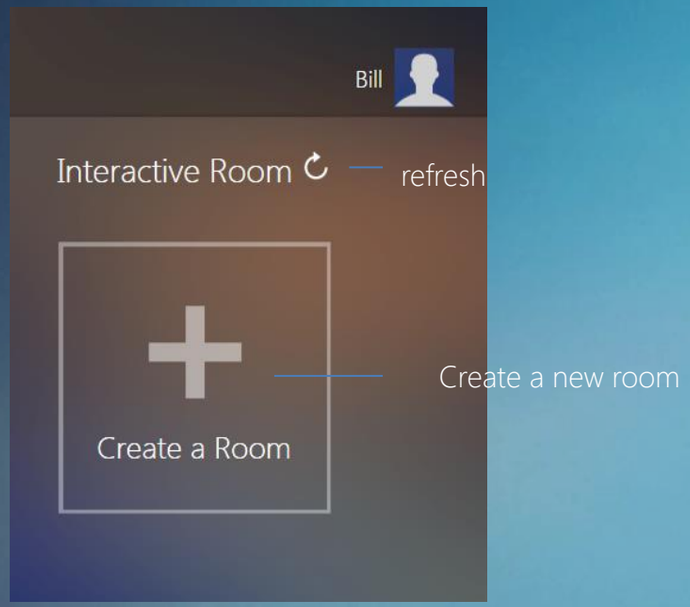
Windows NB

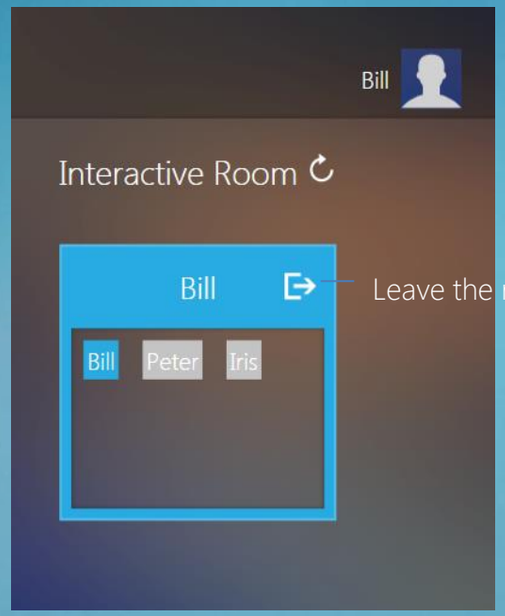
Devices have to be in the same local network.

Android tablet

How to Broadcast

Step 1
Click the button" + " to create a room, then other people can join your room.
Devices have to be in the same local network.

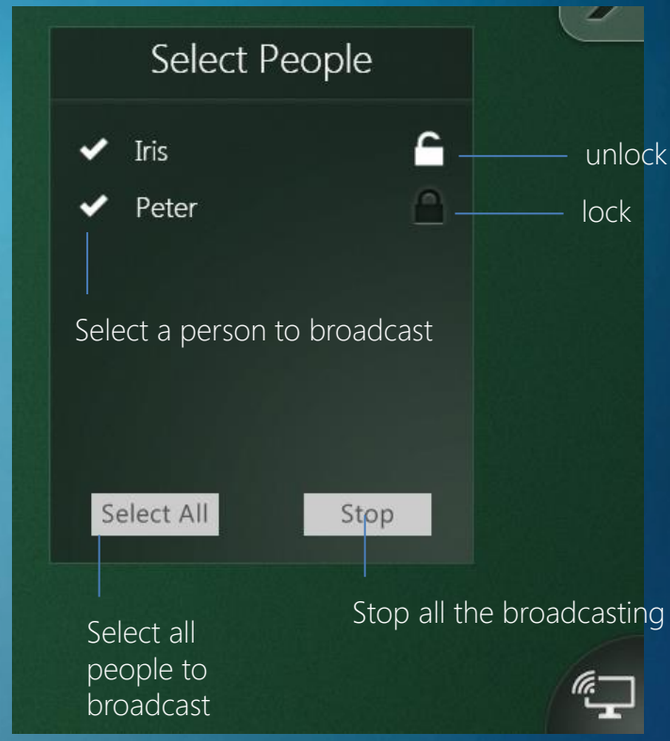




- Refresh: click the button "refresh" to refresh your list.
- Leave: click the "leave" button to leave the current room.

Step 2
Click the broadcast button in whiteboard screen. You can start to broadcast your screen to other people who are in your room. Also, you can unlock one person to pass the control. So the user can control the content that you broadcasted.

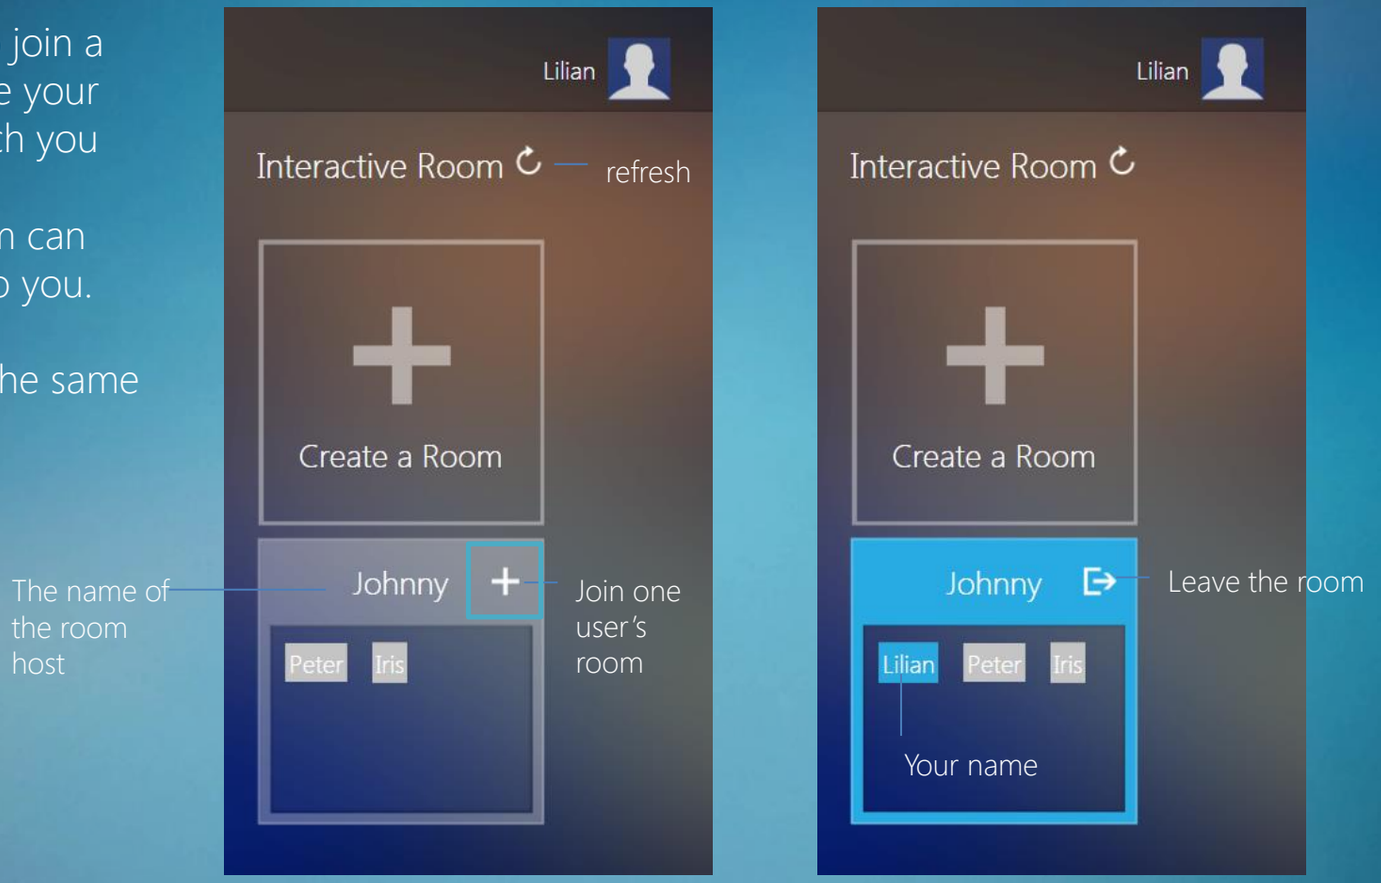
No more than one person is unlocked.



How to be Broadcasted

Click the button" + " to join a room, then you can see your name in the room which you have joined.
So the host of the room can broadcast the screen to you.

Devices have to be in the same local network.



- Refresh: click the button "refresh" to refresh your list.
- Leave: click the "leave" button to leave the current room.

Android version

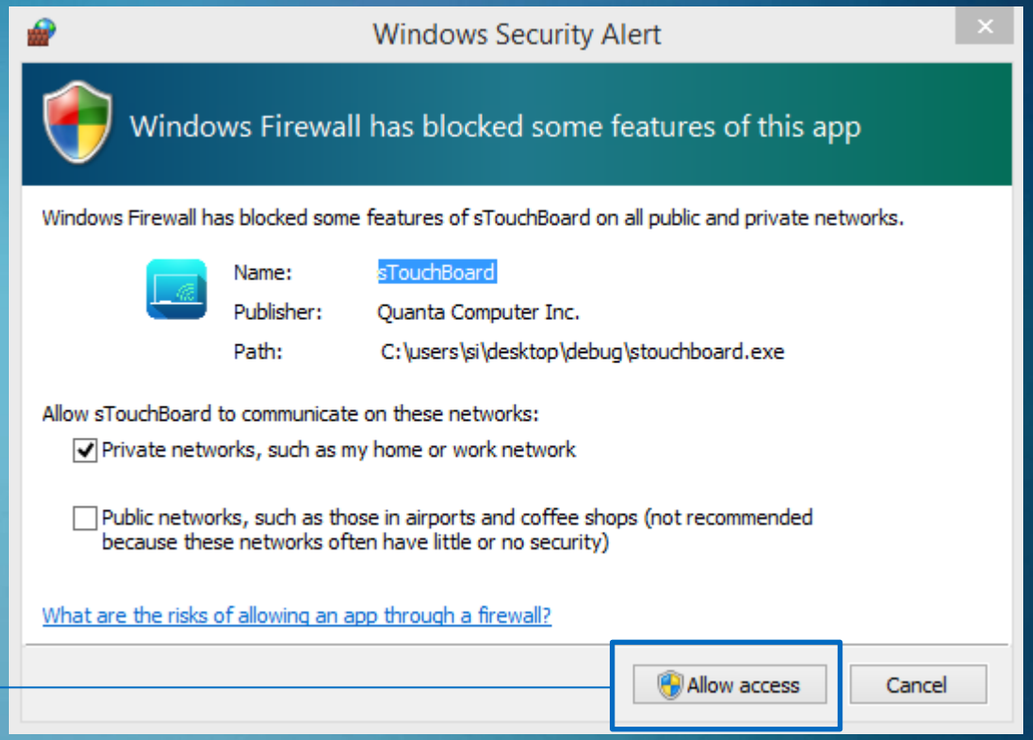
After joining a room, the user will see the words “ waiting for broadcasting...” . That means the user has joined the room successfully and ready to be broadcasted.
Then the room host can broadcast the screen or pass control to the user.

Troubleshooting

Why my host room can not be found?

1) Checking your devices are in the same local network.

2) When the APP is opened at the first time, the windows system will ask you to allow the APP to communicate through Windows Firewall or not. Please chick the "Allow access" button for the APP.

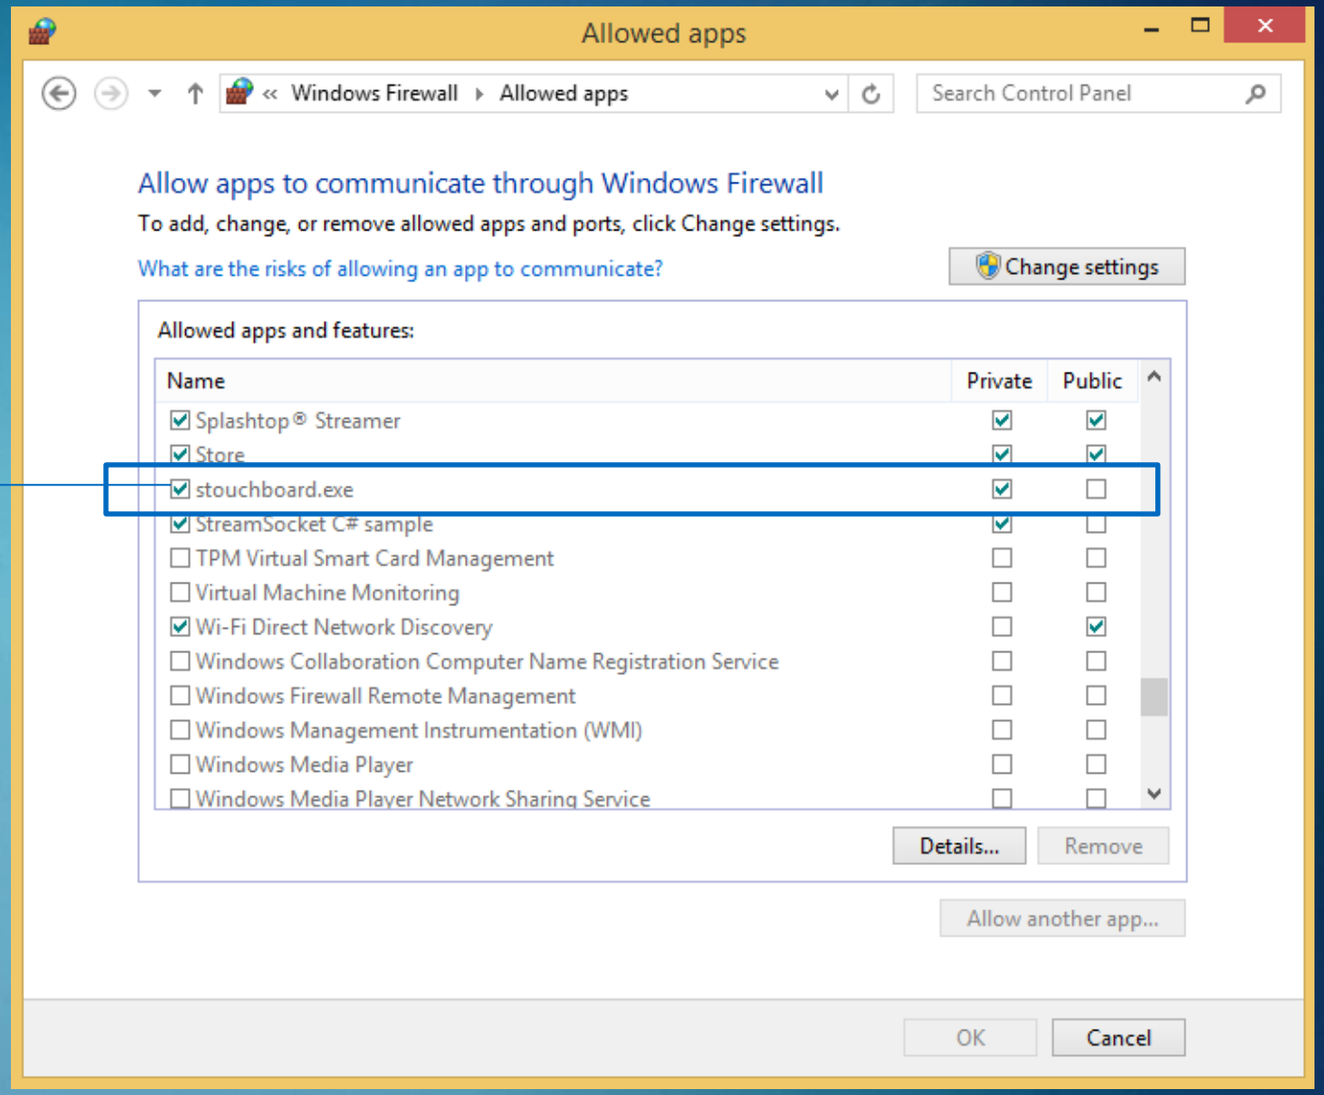


select

Why my host room can not be found?

3) Go to " control panel/ all control panel items/ windows firewall/ allowed apps" and allow sTouch Board APP to communicate through Windows Firewall.

Tick



Why is the broadcasted screen lagging?

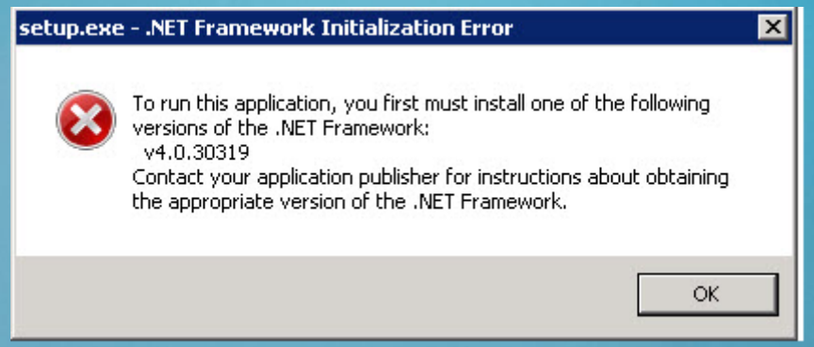
The broadcasted screen performance depends on how many devices are connected. The fewer devices are connected, the higher performance you get. So the devices are sharing the total network bandwidth.

The actual speed of a network connection depends on many factors, such as the end devices being used, the quality of the cable, and the amount of network traffic.

Error message “.NET Framework Initialization Error”

If the .NET Framework is not installed on your computer, a message will appear on the screen.

You can download from Microsoft's site:
http://www.microsoft.com/en-us/download/details.aspx?id=17718

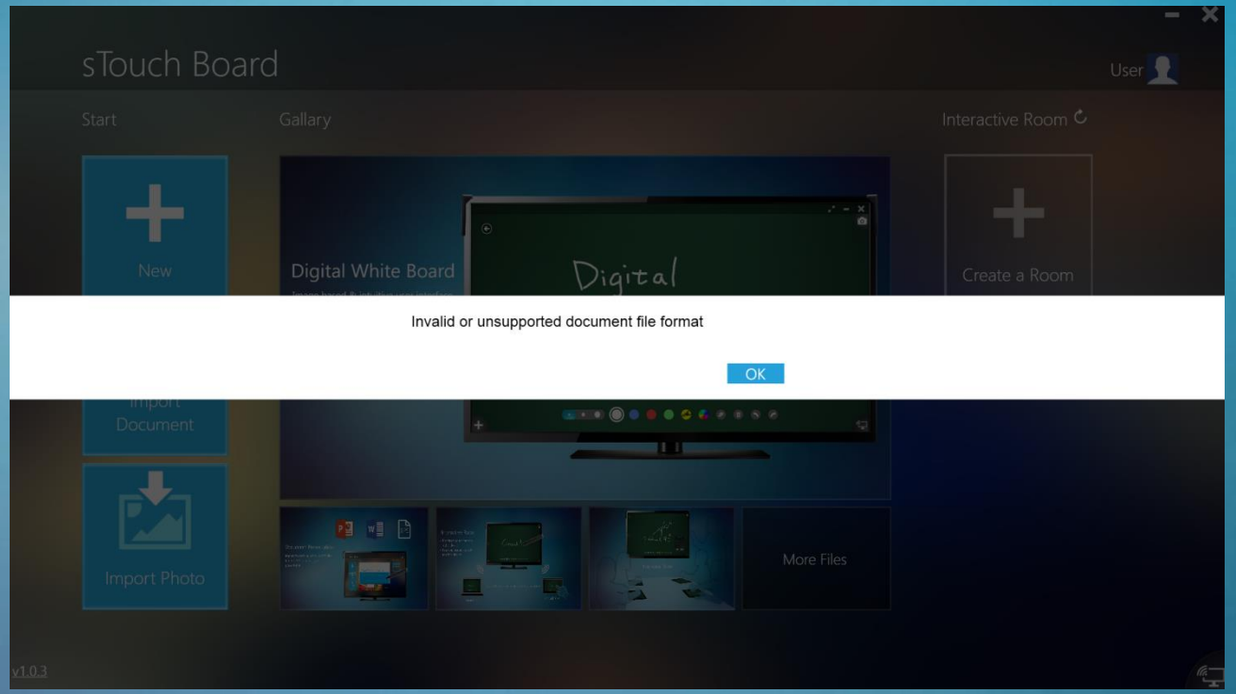


Documents can not be imported

Before importing documents, please make sure Microsoft Office has installed in your computer. PowerPoint, Word and XPS file formats are supported.

If your Microsoft Office version is 2007, you must have the Microsoft Save as XPS Add-in for 2007 Microsoft Office installed to convert files.

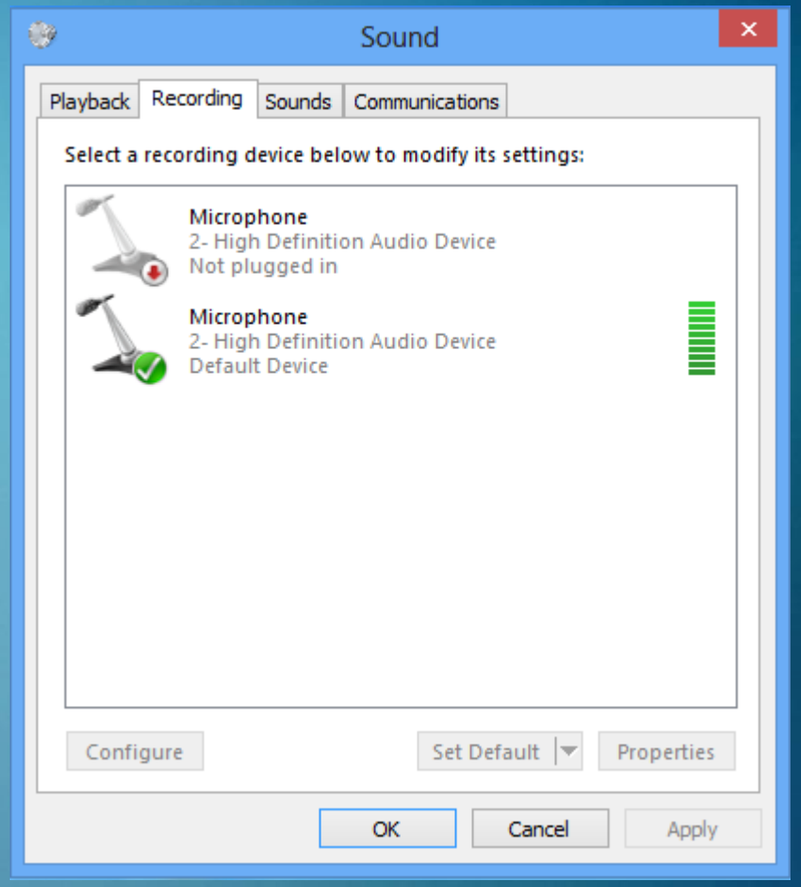
Download Microsoft Office 2007 Add-in: Microsoft Save as XPS:
http://www.microsoft.com/en-us/download/details.aspx?id=4791



Why is the recording video mute? How to change the microphone device?

Step 1

Go to desktop tool bar, right click on the sound icon and select “Recording devices”.

Step 2


You can choice one microphone device for the sound recording. If the microphone is not installed, please use an extra microphone devices.
