

MOBILE ANCHORING SYSTEM SYAM®

Use (see installation and operating instructions)

The **SYAM** (Mobile anchoring system) is a temporary anchor point located above the user that prevents any risk of a fall.

Technical specifications :

- Standard PPE Category 3 – EN 795 Class B
- Usable by two people
- Light weight (15kg)
- Pressure free on ceiling (can be used on any type of ceilings or false- ceilings)
- Up to 4m20 height
- Patented
- Résistance up to 2,7 tons

Training :

Mandatory technical training (4 hours) provided by the supplier on your premises or on site (training certificates provided)

Inspection:

PPE Category 3 is inspected regularly in a defined time period - **at least once a year** (European Directive 89/656/EWG)

Benefits :

- Installs in less than one minute
- Rucksack-transportable mobile equipment
- Site remains clean
- Allows to work with both hands free
- Can be used whatever is the configuration : directly in front of the place of intervention or remote
- Also secures the equipment during its handling.

Related products :

SYAM+ : Derivation option that allows to work safely from the top of a ladder and attach both the scale and the operator deriving the anchor on the outside.

Can't be used without the SYAM
