"Fundación Casa Ronald McDonald" Fundraising Campaign

"Fundación Casa Ronald McDonald" and HGSCA understand that helping a sick child fight their illness takes a huge emotional toll on a family. Adding a financial strain can make it all almost too much to bear.

"Fundación Casa Ronald McDonald" helps to address those problems, whether it be housing near a hospitalized child, the expense of staying together in another city, or even getting basic medical and dental care in a vulnerable community. The organization has sheltered approximately 300 families and its main goal is to build other houses in Cuenca y Quito.
