

The Terrell ISD School Nutrition Department will be implementing “Lunch Money Now”, as an addition to our point-of-sale software effective March 1, 2013.

Lunch Money Now permits parents to access their student's cafeteria account via the Internet. Linked from Terrell ISD's home page ([www.terrellisd.org](http://www.terrellisd.org)), it provides the ability to view the student's account balance, view/print the student's recent purchase history and make deposits to the child's meal account using a debit/credit card. Parents are also able to subscribe for e-mail warnings when their child's account falls below a specified level. Deposits are recorded on a secure (SSL) site. Deposits are typically available on the student's account within 30 minutes of the transaction. Lunch Money Now allows deposits to multiple accounts with a single credit card transaction fee of \$2.50.

Terrell ISD joins more than 140 school districts using Lunch Money Now. This service has been popular with students and parents alike because of its convenience. District employees like it because it saves time and reduces the need to handle cash. With the help of Lunch Money Now, Terrell ISD is now ready to ‘serve’ our customers!

- Low Balance notice setup to include up to 2 email accounts and/or text notices to a mobile device
- Unified command center to access all features for all students on a single screen
- View last 30 days of purchase history with a running balance
- The ability to setup recurring automatic payments
- Optimized layout for mobile devices

Parents will need their students ID number to set up their Lunch Money Now account. Please call the Terrell ISD School Nutrition Department at 972-563-7504 for help with this process.
