

The body gets loaded down with toxins

The body gets loaded down with toxins from the many foods we eat that have been sprayed with all kinds of poisons. The toxins cannot be released because the pores of the skin are stopped up from the many oils and soaps that are made from animal fat. Miracle II Soap is the only body cleanser that will clean all the sweaty, waxy residue from the pores of the face, body and scalp. When this happens, the body is able to detoxify itself naturally through the skin the way it's meant to. When toxins cannot get out of the body, these toxins settle in the joints, and it is called arthritis, which leads to many other problems.

The inside of the body becomes coated with additives, fillers, dyes, yeast and acids in the food that we eat. They coat the stomach walls like syrup. Most of the nutrients that are in the food cannot get through the walls of the stomach. We have to eat more food to try to satisfy what the body needs. This creates many problems for people. But by ingesting Miracle II Neutraliser, it neutralises all the toxins and cleans the walls in the stomach so foods can be processed the way they are supposed to be.

When you use the soap and neutraliser, yeast acids and toxins are removed or stabilised in the body, so the immune system works the way God made it.

To have a healthier body and mind, you must change what you wash your body, hair and clothing with. Get away from animal fat, alcohol and petroleum bar soap products.

"The formula for Miracle II was given to me in 1980. It was perfect then and has not changed. You will never read New and Improved on a bottle of Miracle II". Clayton Tedeton

MIRACLE II products contain **only natural and organic ingredients, no synthetics, are gluten free, are non toxic so human safe**, which means that they are not harmful if ingested and contain no known irritants

The basis of the MII formulations is that the water is first put through an **electrical process known as eloptic energy**. This process transforms it to include **highly charged mineral clusters**. Studies show that toxic chemicals would literally be broken down and transformed into benign or usable beneficial by-products by the action of the charged clusters. (This process is an extension of Nikola Tesla's scientific gift given to the world).

People have found that when they take the Miracle 11 Detoxification Baths and Neutralizer Liquid it **takes the pressure off the detoxification organs - kidneys, liver lungs and bowel**. Studies have shown that **toxins in the body are positively charged**. The Miracle II Soap and Neutralizer have a **high negative charge** which pulls the toxins out. Then the minerals in the Neutralizer can be absorbed into the body, often reducing the body's toxic load.

Miracle II products have been shown to create increased oxygenation in the cells. These products are highly alkaline:

- the Soaps have a pH of 8.4
- the Neutralizer Liquid has a pH of 8.5
- the Neutralizer Gel has a pH of 7.4 - 8.4
- the Skin Moisturizer has a pH of 7.4 - 8.4

1. What is the foaming agent in the soap?

A. The foaming agent used is Laurel and it's organically derived from the coconut husk. It's stabilised with a fatty acid taken from the coconut husk called Ash of Dedecyl. 100% natural and is not processed. It is not related to SLS, or the synthetic processed form of Sodium Lauryl Sulfate (SLS) or Sodium Laureth Sulfate (SLES).

Sodium Lauryl (Laurel) Sulfate (SLS) or (SLES).

Harsh detergents and wetting agents used in garage floor cleaners, engine degreasers and auto cleaning products. SLS is well known in the scientific community as a common skin irritant. It is rapidly absorbed and retained in the eyes, brain, heart and liver, which may result in harmful long-term effects. SLS could retard healing, cause cataracts in adults and keep children's eyes from developing properly. Material Safety Data Sheets (MSDS) recommend wearing self-contained breathing apparatus, rubber boots and chemical resistant gloves, safety goggles and chemical fume hoods while handling for personal protection.

2. Does Miracle II contain Sodium Lauryl Sulfate (SLS) or SLES?

A. Miracle II products are Organic in nature and **DO NOT** contain processed chemicals (SLS): sodium lauryl sulfate or (SLES): sodium lauryl ether sulfate. These industrial chemicals dry the skin by stripping the protective lipids from the cellular membrane so it can't effectively regulate moisture. Inside the lipids are the communications (electrical)

channels the body relies on to receive and send vital information through-out the body. By destroying the lipids, those cells break down and can no longer receive proper instructions and eventually either will die, or start relaying incorrect communications to other cells in the body.

3. **What can the soap be used for?**

A. It's a soap ... cleaner ... degreaser ... and deodoriser... all in one! Miracle II Soap cleanses your skin, your hair, and your home -- including the laundry. One of the most amazing products that has ever been presented to mankind! Most of this spiritual product is from the dust of the earth, without the drawbacks and harsh ingredients of ordinary soaps and detergents.

Naturally concentrated and decontaminating. Dilute it to create solutions for light, medium, or heavy cleaning... Revealed to Clayton Tedeton more than 30 years ago, new uses are discovered all the time!

4. **What is the Neutraliser Gel used for?**

A. Neutraliser Gel is a natural God given blend of organic ingredients.

It's similar to Neutraliser liquid but formulated for topical use, and it's considered about 4x stronger than the liquid for skin penetration qualities.

Miracle II Neutraliser Gel can soothe your skin while protecting it from the irritation often associated with shaving and other skin irritations. It's a great soother for sunburns and it's known for providing your complexion with an energising fresh glow of radiant health. A wonderful hair gel and detangler, it also helps keep mosquitoes at bay, and serves perfectly as a healthy carrier for essential oil applications.

5. **Are the Miracle II products all natural?**

A. Yes the Miracle II products are all natural and organic in nature. We do not test on animals. However animal lovers say the use it on their animals with great results, in a way our customers test it for us. There is nothing synthetic in Miracle II. Nothing is derived from animals or fats or fish etc. Our products are derived from Sea Water, Sea Plants, Earth Vegetables, and minerals from the Sea and Earth. That's it.

6. **What is Eloptic Energized Oxygenated Water?**

A. "Eloptic" was a word invented by Clayton Tedeton to be used in reference to the process in which he passes an electrical charge through the water molecules and tunes their frequency to vibrate at the same frequency as Aloe Vera molecules. Since this process was not commonly used 30 years ago... Clayton created the phrase called "Eloptically charged" to describe to others what he was doing. Many of you have heard of ultrasonic cleaners used in the medical industry, and also dentistry to sterilise utensils, this is a similar form of charging the water molecule, to a specific rate of frequency which in this case kills germs, disease, bacteria etc... In the case of Miracle II it's adding the frequency of Aloe Vera.

7. **What is dehydrabiethylamine?**

A. Dehydrabiethylamine is a chemist's designation word for the hydrogen-oxygen combination created when passing an electrical current through the water used in the Miracle II products.

8. **Are Methyl, Propyl, Butyl and Ethyl Paraben Parabens used in Miracle II?**

A. Miracle II is organic in nature and **DOES NOT** utilise processed or synthetically engineered additives.

9. **Can I use Miracle II soap to wash clothes?**

A. Depending on the mineral content of your water, you should only need about 1 tablespoon of the original Miracle II soap for a full load of clothes. Pre-treat laundry if needed.

10. **What ingredients are in the Miracle II Skin Lotion Moisturiser?**

A. Organic cold pressed oils and emollients obtained from apricot, almond, coconut, and natural vitamin E in a luxurious white cream lotion. Provides the same detoxifying benefits as our Miracle II Gel. You'll love the feel of it on your skin... and the way it makes your skin feel! Fragrance free and no preservatives added.

11. **Can I use the soap in my dishwasher?**

A. No. Miracle II is not formulated for the dishwasher. Normal dishwashing detergent is high in scrubbers (silica) and utilise anti-foaming agents. Miracle II is high in foaming, with no scrubbers. It is not advised for usage in an automatic dishwasher

12. **Why do the soaps have a green colour?**

A. The colouring is derived from dehydrated sea-weed. It's full of trace minerals and provides benefits over artificial colourings. It also helps buffer the soap for an alkaline pH.

13. Does Miracle II contain Propylene Glycol?

A. No In skin and hair care products propylene glycol works as a humectant, which is a substance that retains the moisture content of skin or cosmetic products by preventing the escape of moisture or water. Miracle II **DOES NOT USE** processed ingredients, Miracle II is organic.

14. What is Diethanolamine (DEA)?

A. DEA works as an emollient in skin softening lotions or as a humectant in other personal care products. When found in products containing nitrates, it reacts chemically with the nitrates to form potentially carcinogenic nitrosamines. Miracle II is organic and **DOES NOT contain** DEA.

15. Tell me about the Miracle II Soap with moisturiser?

A. Nature's Miracle for the Face, Skin & Hair. It's the wondrous Miracle II Soap formula, this time with a moisturiser that makes it perfect for personal use and pets. Fabulous oils and emollients from cold-pressed apricot-Sweet almond, coconut oils, and vitamin E will leave your skin and hair soft and silky as can be naturally balanced pH. Contains NO animal fat, detergents or additives. Concentrated, so it works with the smallest amount in the shower or bath.

Ingredients:

Regular Soap: Electrically-engineered eloptic energised stabilised oxygenated water, Ash of Dedecyl solution, Dehydrabiethylamine [a safe substance that chemists cannot correctly identify, thus the reason for the misnomer - not to be confused with Dehydrobiethylamine], Calcium, Potassium, Magnesium and Natural Foaming Agent.

Moisturising Soap: Electrically engineered eloptic energised stabilised oxygenated water, Ash of Dedecyl solution, Dehydrabiethylamine [a safe substance that chemists cannot correctly identify, thus the reason for the misnomer - not to be confused with Dehydrobiethylamin], Calcium, Potassium, Magnesium, Natural Foaming Agent, Cold pressed Apricot, Sweet Almond and Vitamin E.

Neutraliser: Liquid, gel, the ingredients remain the same . . . Electrically Engineered Eloptical Energised Stabilised Oxygenated Water - Ash of Dedecyl solution - Calcium - Potassium - Magnesium.

Skin Moisturiser: Energised stabilised oxygenated water - Ash of Dedecyl solution - Calcium - Potassium - Magnesium - Almond oil - Coconut Oil - Apricot - Vitamin E.
