

Mercy Update Story: "THE MIRACLE of AVIV BAR"

One year has passed since the tragic terrorist truck-ramming event overlooking Jerusalem where the lives of four young IDF cadets were brutally murdered, leaving fifteen injured for life!

One courageous 19-year old survivor was Aviv Bar who fought for her life many weeks in the hospital until her prayers were answered. Our 'Hands of Mercy' team plus Chinese friends were honored to share in this special 'Miracle', as can be seen from the attached 'original' story.

MERCY UPDATE:

After a year of recovery, Aviv (Hebrew: for Spring) is now a new person, thanks to all your concern and faithful prayers!

Aviv has remarkably recovered and now returned to serve in the IDF...giving much praise to G-D for His mercy and healing!

So "Thank-You" for the special role you and your congregation play with our IDF (Israeli Defense Forces), as you pray for their continued protection, in the face of our enemy's daily attempts to take the lives of innocent civilians and courageous young soldiers like Aviv, in their heinous plans to destroy this Covenant-Land and People!

***For Israel's Promised Redemption...
Ye'shi Reinhardt and our Mercy Team***

Should you and your congregation wish information on how you can symbolically 'Adopt' a courageous 'lonely IDF soldier' who struggles without a supportive family in Israel, "Click Here" for Details.

HANDS OF MERCY ISRAEL

VICTIM STORY: AVIV BAR (19)

JAN 8, 2017 JERUSALEM TRUCK-RAMMING

A bus of young Israeli soldiers in training was at a scenic overview of Jerusalem to hear a professional tour guide explain about the unique history of the area. As the group exited the bus, a big construction truck, driven by an Arab from the nearby village of Jabel Mukaber, suddenly without warning, swerved his rapidly moving vehicle from the roadway, ramming into the group of standing soldiers.

Amid the tragic confusion, it took a few seconds for the soldiers to realize what actually was happening...that this was not just a tragic accident but a terrorist attack...as the driver continued to recklessly ram his truck into and over the stunned and injured cadets.

Many tried to run for safety while others were brutally crushed by the rampaging truck, leaving four tragically murdered and fifteen seriously wounded before the driver was shot and killed by other nearby soldiers. Among the critically injured was young 19 year old soldiers named, Aviv Bar from Modiin who was critically injured, unconscious and rushed to a nearby hospital.

Hearing of the tragedy, our 'Hands of Mercy' team hurriedly traveled from Sde'rot to visit her and the other injured soldiers, yet was not allowed due to the security procedure of only allowing immediate family in the Intensive Care unit.

Connected to a breathing machine, Aviv struggled between life and death for three long weeks, surrounded by her family and their prayers. While waiting, we kept in communication, praying with them for a miracle in Aviv and her other soldier friend's conditions. At long last, on Thursday, January 20th, she began to breathe on her own.

Following a series of treatments, she was transferred to the Orthopedic Department, allowing us to come and visit her with other family and close friends who stood around the bed and prayed for her recovery.

The young soldier, Aviv was very excited and warmly thanked everyone, saying "You gave me the strength to get back to where I am...thanks to you all...for together we will continue to live in Israel."

On Monday Aviv's mother called us to tell us that Aviv was transferred to the Recovery department, where she was able to get out of her bed and walk for the first time after the terror attack! Halleluiah, our prayers were heard and we keep accompany her with our calls and visits.
