

Ellen Addison's *Code of Ideals*

An **Essence**, or **Ideal**, is by definition an attribute of the human experience.

The essential essence of Ellen's art lives in each piece's embedded, coded Ideals. These Ideals, identified by Ellen in partnership with the Angelic Realm, make up its Code of Ideals™ or Alchemy of Essences™. Because all Ideals, alone and when combined into Alchemic Essences, are attributes of the human experience, the art acts as a portal through which they can be actualized. In this way, each original painting (as well as all Essences™ prints, Reflections™ prints, Healing Art Folios™, Healing Message Audiofiles™, Childrens Grid™ prints, and Transformational Art Grid™ prints) supports you in identifying and realizing your specific desires within your human experience. Energetic Essences are expressed not only through the painting's title (which has a code separate from that of the painting's purpose), but through every element of the art, including its size, colors, and construction materials.
