

# ABOUT NJ-REP

The North Jersey Recovery Empowerment Program (NJ-REP) is an Outpatient Substance Use Disorder Treatment Program at the North Jersey Community Research Initiative (NJCRI).

At the North Jersey Recovery Empowerment Program, you can find a skilled, experienced clinician who has helped clients just like you build richer more rewarding lives. All our clinicians are fully certified in drug and alcohol counseling.

Through a combination of therapeutic techniques, your counselor will help you identify limiting beliefs and outmoded coping mechanisms that may be standing in your way.

## OUR MISSION

At NJ-REP we are committed to helping people in recovery build better lives
