Applicant's Signature: _____ Date: _____
Submitted by (check one) [] Property Owner [] Contractor

Building Inspector: _____ Date: _____

An ongoing work inspection is required whenever 6 months has expired since last inspection

Required Building Inspection

1. **Footing Inspection:** To be made after the trenches are excavated, forms are erected and all reinforcement is in place. If site mixed concrete is to be used, all materials must be on site.
2. **Foundation Inspection:** To be made after the trenches are excavated, forms are erected and all reinforcement is in place. If site mixed concrete is to be used, all materials must be on site.
3. **Pier and Anchor Inspection:** For mobile structures. Made before skirting is applied, but after the structure is on the site and blocked.
4. **Underground Plumbing Inspection:** Made for all piping before covering with earth or concrete.
5. **Framing, Mechanical, and Rough Plumbing Inspection:** Made after the roof, all framing, fire-blocking and bracing are in place and all pipes, chimneys and ducts are complete.
6. **Insulation and Vent Inspection:** Made before any lathing and/or wallboard is in place. Ceiling coverings may be in place with approval of the Building Inspector.
7. **Lath and/or Wallboard Nailing Inspection:** Made before any plaster and/or wallboard taping or mud is applied.
8. **Final Inspection:** Made after the building or structure is completed and ready for occupancy or service. For mobile structures this inspection is made after the skirting, stairs and landings are complete, but before occupancy.
9. **Ongoing Work Inspection** is due every six months when no other inspections have been scheduled to verify that work is progressing.
