Dear Customer,

This brochure outlines all the parts I can supply for the Jaguar Mk.IV. These parts are held in stock. If there is an item you require that is not listed, please let me know and I will make every effort to locate it for you.

Parts can be shipped to any part of the world using post or carriers on a door-to-door service. Orders to E.U. countries are subject to VAT at 20%.

When ordering, please state my reference numbers, which appear on the far left of the page, together with the relevant details of your car – such as chassis and engine numbers, RHD/LHD, etc.

All Jaguar numbers quoted in the brochure are for reference purposes only. The parts listed are unused original or new reproduction unless otherwise stated.

Although not listed in the brochure, when possible second-hand items can also be supplied if they are something I have as part of my stock, or something I can obtain specifically for the customer.

The prices quoted are per item unless otherwise stated and are all in GBP. Whilst every effort will be made to adhere to the prices shown, I do reserve the right to make changes if necessary without prior notice. Any such change will be made known to the customer before sending out the order.

Payment can be made by cheque, debit card or credit card – I am licensed to accept Switch, Visa, MasterCard and Solo (I cannot accept American Express or Diner's Card).

Payment by credit card will incur a charge of 3% of the invoice total. Payments by bank transfer are subject to a £6.00 charge. Please note, these charges are a direct result of those imposed on us by the banks.

All parts remain the property of Worcester Classic Spares Ltd. until payment has been received in full.

Terms & Conditions

Although as good a description as possible will be given of the second-hand items, everyone's idea of condition varies. If there is a known or obvious fault with the part, then the prospective customer will be made aware of it. However, if I supply any second-hand part, be it a single item or a mechanical or mechanised part, or any item that consists of component parts, which is later found to be faulty, unfortunately I would be unable to offer a refund or a replacement part. By the very essence of their nature, second-hand parts are always an unknown quantity, and no guarantee can be given to their condition. It is at the owner's risk that such items are purchased.

I regret that I cannot give discounts, however large the order or regular the custom. I feel it is fairer to price the parts as competitively as possible to give a fair deal to all my customers, some of whom prefer to order all the parts they need at one time, whilst others prefer to order over a period of time.

Liability extends only to replacement free of charge, or a refund, in respect of items incorrectly supplied or found to be faulty (not including second-hand items), and notification must be received within 14 days of despatch of goods, so please check your order as soon as you receive it. I regret I cannot give refunds on parts correctly supplied but no longer required.

Please be aware that it is not uncommon for a car to have been fitted with non-standard parts at some stage, so if the new part you receive is not the same as the part on your car, do not automatically assume the new part is wrong. Let me know if you have a problem and I will try to sort it out.
