

Medical Peels

Medical peels are used to reduce fine lines, wrinkles, and age spots. They also aid in improving the appearance of mild scarring. Medical peels are performed on the face, neck, and hands. Skinplicity Rx provides a variety of chemical peels, including TCA (Trichloroacetic Acid), Salicylic Acid, Lactic Acid, GlySal Peel, Apelle, and the Vi PEEL, Cool Peel, to name a few.

“Skin that is properly maintained with regular peels and proper skin care regime stays healthy, youthful and radiant at every age.” – [Vitality Institute](#)

- **Vi PEEL**

A seven day process that includes 3 to 4 days of peeling, with no real down time. Make-up may be applied over peel after a few days. *Who can benefit?* Anyone who wants to revitalize and quickly improve their skin appearance. ...[Vi Peel Featured on NBC 5](#)

- **TCA (Trichloroacetic acid)**

TCA medical peel is used to treat fine wrinkles, brown spots, and blotchy skin. Used for skin lightening, removal of fine surface wrinkles and age spots on the face and body. TCA minimizes pores and reduces hyper pigmentation. *Who can benefit?* Anyone who wants to improve their skin texture and remove superficial blemishes.

- **Vitamin-C Peel**

One of the benefits of the Vitamin C peel is - there is no visible peeling. Used to brighten skin, strengthen collagen and capillaries. The Vitamin C peel creates a stimulating, anti-oxidant mask. *Who can benefit?* Anyone seeking to have smoother skin.

- **ENVIRON Cool Peel**

A versatile system that can be fine tuned and controlled to the needs of the individual client. ENVIRON Cool Peel is an alternative to aggressive peels. Formulated by gel, gives its cooling effect as the water evaporates off the treated skin. *Who can benefit?* Anyone who wants to gradually improve their skin.

- **Gly-sal Peel**

The Gly-Sal peel from Edge System Corporations, comes in varying strengths, and is a combination of glycolic (from sugar cane) and salicylic acids. *Who can benefit?* Anyone who is looking to minimize superficial lines and improve skin texture.

- **Salicylic Peel**

Salicylic Peel, is a high intensity treatment that rapidly exfoliates helping to improve fine lines, wrinkles, pigmentation, large pores, acne and acne scars for more resistant/resilient type skin. *Who can benefit?* Anyone who wants to reduce oil production to stop acne from recurring, and enjoy clear, firm, brilliantly youthful skin.
