WHY ELECTRICAL PHAETON

In this century we need to protect the environment without losing our past and culture. The Fayoto is consuming only 1 euro for 80 km of distance which is making this product the most green and economic of his category.

In the big cities where people are looking for a little bit of silence, the Fayoto is not making any noise because of this green electrical energy with which it's working.

WHY FAYOTO?

As REFERANS INC. We are the creator of the Fayoto, also we are producing that product with the most competitive quality and technics.

Custom made Electrical Phaeton 's by REFERANS OTOMOTİV

We are able to make you an identic replica or a custom made electrical phaeton ' s for you .

We want to keep our traditions without forgetting that we are in the 21 th century .

This electrical phaetons is totally hygienic , doesn t make any noise Or pollution to the environment . Olso this save the animals also they right .

With only four hours of charge , this will drive you for 70 km of distance and this one is going about 40 km / h and this cost you only 1 euro .

We are able to fabric you an iron made or on request a wooden one , in all cases , we are using quality materials which have a CE homologation . With that products you will straight make the difference . You can use it in all kind of surfaces .

All of our products are motorized by Curtis brain and Trojan batteries .

**ALL THAT REASONS MAKES FROM FAYOTO A GREEN
PRODUCTS HOMOLOGATED.**
