

Corey Pernieda

Corey menyelesaikan pendidikannya di Fakultas Teknik Industri, Universitas Muhammadiyah Jakarta. Dia memulai karirnya di perusahaan manufaktur sebagai production planning inventory control. Kemudian melanjutkan karir profesionalnya dalam bidang Sistem Manajemen Mutu dan Lingkungan pada bagian Quality Environmental System di salah satu grup perusahaan terbesar di Indonesia, Panasonic khususnya Panasonic Battery. Selanjutnya, dia juga turut serta dalam tim untuk mengimplementasikan Sistem Manajemen Keselamatan dan Kesehatan Kerja (SMK3) mulai dari awal implementasi system tersebut hingga diperolehnya sertifikat SMK3 dan penghargaan bendera emas.

Tugas utamanya selama itu adalah membuat, mengembangkan prosedur Sistem Manajemen Mutu serta memonitoring dan mengevaluasi implementasi sistem tersebut sesuai dengan persyaratan ISO 9001:2000. Memonitor, mengevaluasi implementasi system manajemen lingkungan dan K3, serta turut serta dalam pelaksanaan program-program yang ada, tidak terlepas dari tanggung jawabnya, dengan dintegrasikannya system manajemen mutu (ISO 9001), lingkungan (ISO 14001) dan Keselamatan dan Kesehatan kerja (SMK3) di perusahaan tersebut. Tugas rutin lainnya adalah sebagai internal trainer dalam rangka mempromosikan kesadaran mutu dan lingkungan kepada seluruh karyawan.

Pada saat ini, dia adalah seorang konsultan pada sebuah firma konsultansi di Indonesia, kemampuan khususnya di bidang pengembangan sistem manajemen .

Corey Pernieda

Corey has finished her study in Muhammadiyah Jakarta University majoring Industrial Engineering. She started her career in manufacturing company as production planning inventory control, then she continue her professional career in Quality and Environmental Management System in one of the biggest company in Indonesia, Panasonic Battery. She was also part of the team in implementing Occupational Health and Safety Management System

of SMK3, from the beginning until achieving the certificate plus the golden flag reward.

Her main job was designed and developed Quality Management System procedures as well as monitored and evaluated the implementation as required in ISO 9001. Involved in environmental, occupational health and safety program was part of her daily activity and responsible, since it was an integrated management system (ISO 9001, ISO 14001 and SMK3). Other task that's also required in her position was as an internal trainer in order to promote quality and environmental awareness to all employee.

Currently she is a consultant in a consultancy firm in Indonesia, with particular competence in management system.
