NOTE: The lifetime scores are calculated and assigned by LABI based on weighted averages, utilizing a 0-300 point scale for the relative importance of each vote in each legislative session. For example, in one year, an 85% score may have been achieved based on only five available votes, while in a different year, the 85% may be based on 100 or more consequential bills. LABI has been using this same scale to score votes since 1975.
