
THE PROPHETIC CALLING

Designing Anti-cancer Drugs

Upon the completion of His Doctorate from the University of Haifa on Mt Carmel in Israel, the MAN OF GOD THE PROPHET was immediately offered appointment by two leading institutions of Medicine in the United States of America; i) the Centre for Advanced Biotechnology and Medicine (CABM) of the University of Medicine & Dentistry of New Jersey (UMDNJ); and, ii) the Centre for Pharmaceutical Biotechnology of the University of Illinois at Chicago (UIC). The MAN OF GOD THE PROPHET then chose to take up the appointment at the Centre for Pharmaceutical Biotechnology of the University of Illinois at Chicago. That appointment was of a Post-Doctoral Fellow involved in Research and Teaching within the College of Pharmacy, and specifically the Department of Pharmacokinetics and Pharmacodynamics. In that appointment, The MAN OF GOD worked in the area of Drug Metabolism and specifically specialized in Signal Transduction. It is then that He majored particularly in the novel field of Signal Transduction by Cancer Chemotherapeutic Drugs.

It was during this time at the Department of Pharmacokinetics and Pharmacodynamics that He also taught and instructed Doctor of Pharmacy (PharmD) students, and graduate students in the Ph.D program of the College of Pharmacy. The MAN OF GOD THE PROPHET at that time, conducted Cancer Research on Onco-protein Networks, and accordingly instructed students on the Mitogen Activated Protein Kinases (MAPK) super family of proteins. At the Centre for Pharmaceutical Biotechnology, the MAN OF GOD did extensive research on signaling by cancer chemotherapeutic drugs, while examining different kinds of human carcinomas. The cancers He examined, included cervical carcinoma, breast cancer, lung cancer, and HT-29 human colon cancer, and other carcinomas. In that research, The MAN OF GOD examined the MAPK Onco-protein Networks as potential future drug targets. That is when He got involved with a team of scientists who were deeply engaged in front-line Drug Design and Drug Discovery for cancer management. Arising from His cancer works at the Centre for Pharmaceutical Biotechnology, the MAN OF GOD extensively published and co-authored His findings with top-notch cancer scientists, in world class peer review cancer research journals. These included the most coveted Journal for Biological Chemistry (JBC; www.jbc.org), Journal for Pharmaceutical Research, Journal of Carcinogenesis, Journal of Mutation Research, Drug Metabolism Review Journal, Journal Biochemical Pharmacology, Pubmed (NCBI), among other outstanding Scientific Periodicals.

Unveiling Gene Switches in Cancer

After that, the MAN OF GOD was further appointed to the Department of Pharmaceutics at the Ernest Mario School of Pharmacy at the State University of New Jersey (Rutgers). At the Department of Pharmaceutics in New Jersey, He furthered His cancer work by looking at, not only the Cancer Chemotherapeutic drugs, but also got deeper into the field of REGULATION OF GENE EXPRESSION. While it was by then recognized that Acetylation, Methylation, and Phosphorylation are the three main mechanisms through which cancer genes regulate their expressions, the MAN OF GOD however, decided to delve deep into the elucidation of PHOSPHORYLATION as the main mechanism through which cancer Onco-proteins are regulated. It was during then, that He worked deeper into the role of Nuclear Transcription Factors as major gene switches that control the expression of cancer-related genes. Among the Transcription Factors that the PROPHET OF THE LORD examined, was the NUCLEAR RELATED FACTOR-2 (Nrf-2) which turned out to be the master switcher that controls the expression of all the anti-oxidant related

defensive anti-cancer genes in the human body. That is when the MAN OF GOD became very zealous about studying the role of Cancer Chemo-prevention as a method of improving public health. This caused Him to directly become interested in the understanding of why different populations have different prevalence rates for different cancers. For example, why the Colorectal cancers would be more prevalent among the Americans, than among the Chinese populations. This directly pushed the MAN OF GOD, together with the Principal Investigator (PI) of His program, and other research scientists, to become very interested in the differences in eating habits among different populations, and how such difference in lifestyle patterns can predispose different populations to particular cancers. It was during this time that He was able to work with the group of scientists that had discovered that Chinese populations that eat a lot of vegetables like broccoli, and drink a lot of green tea were essentially protected from certain types of cancers. It is then that the MAN OF GOD, together with the Principal Investigator (PI), and other scientists, identified that certain vegetables like broccoli contained important class of chemicals called ISOTHIOCYANATES, and more specifically PHENETHYLE ISOTHIOCYANATES, that protected those whose diet was mainly composed of them. Moreover, for regular green tea drinkers, a major chemical component called PHENOLS, and more specifically POLYPHENOLS of the class known as EPIGALLOCATECHIN-3-GALLATE (EGCG) was found to be of great benefit in protecting those drinkers. The PROPHET OF THE LORD then became interested in the signal transduction mechanisms, and the biochemical pathways that are induced in the human body by those who observe these lifestyles, and most importantly how such biochemical pathways induce the expression of anti-oxidant and detoxification genes in the human body. Detoxification is one of the main mechanisms in which the human body fights environmental insults like exposure to mercury and cigarette smoke, that cause cancer. Other environmental toxicants that became of interest to the MAN OF GOD include exposure to Benzene and other DNA-altering chemical pollutants that today lace-up our environment. The role of these environmental chemicals in igniting tumorigenesis, oncogenesis and carcinogenesis in the human body and the relevant mitigation prevention mechanisms in the body, then became His greatest interest. Such works were covered by the New Jersey Star Ledger and Channel 12 News.

Moreover, at that time, the MAN OF GOD also became a member of the American Association of Pharmaceutical Scientists (AAPS), and presented His research work in extensive international meetings including various pharmaceutical companies such as the Giant Merck Pharmaceutical Company at Weltport Pennsylvania that invited Him to give talks on His novel work in Cancer Research for Drug Design and Discovery. In His research work, He also collaborated with Centocor Pharmaceutical Company, in Marvin Valley Pennsylvania, with whom He co-authored the paper on a drug called QUINACRINE. In that research, the MAN OF GOD was the first person to discover that QUINACRINE as a cancer chemotherapeutic drug induces cell death via the MITOCHONDRIA and CYTOCHROME-C release. In that pathway, the MAN OF GOD clearly showed that, that portent drug killed human cervical cancer cells by targeting and demolishing the ATP energy production systems that sustain cancer cells alive. He also published in the journal for Korean Pharmaceutical Society.

Cancer Institute of New Jersey

A

fter that, the MAN OF GOD the Prophet was appointed to the Cancer Institute of New Jersey (CINJ), in the Department of Surgery, and more specifically the Division of Surgical Oncology, in the University of Medicine and Dentistry in New Jersey (UMDNJ). He was recruited and appointed by the founder Professor of the Cancer Institute of New Jersey (CINJ), himself, as a Research Teaching Specialist-III (RTS-III). His assignment at the Cancer Institute of New Jersey (CINJ) involved doing research and training several surgeons who were involved in Oncology, to understand the processes that lead to TUMOUR ANGIOGENESIS as the process by which cancers grow and spread in the human body thereby evading medication. This was very critical research owing to the fact that several cancers today exploit the process of TUMOUR ANGIOGENESIS in order to evade drug therapy, and lead to the death of many cancer patients. The MAN OF GOD also became interested in this process of Tumour Angiogenesis since it offered Him a very important gateway to understanding the phenomenon of Multi-Drug Resistance (MDR) in cancer therapy. At this

point, the MAN OF GOD got involved in examining the two gene-switches that control this critical process of CANCER ANGIOGENESIS, one of them being Vascular Endothelial Growth Factor a (VEGFa), and Vascular Endothelial Growth Factor b (VEGFb). It was then that He became so much involved in the transcriptional regulation of gene expression by these two major gene switches.

Aerospace Medicine

During His career at the Cancer Institute of New Jersey (CINJ), was when the MAN OF GOD got an appointment to the Civil

Aerospace Medical Institute (CAMI), of the Federal Aviation Administration (FAA), and more specifically in the Department of Forensic Toxicology and Aircraft Accidents. At the Department of Forensic Toxicology and Aircraft Accidents, He was charged with developing a DNA Microarray platform for examining the gene expression and fingerprint profiles of pilots in aircraft accidents. At this place, the MAN OF GOD was charged with the responsibility of examining the human factors that affect the operation of an aircraft in the cockpit among Civil Aviators (Airline pilots). His work involved examining the effect of alcohol, drug abuse and disease among pilots in causing aircraft crashes and fatalities. His work was centred around the fact that alcohol, drugs of abuse, and clinical depression often interfere with SEROTONIN levels in the human brain. Since such dysregulation of SEROTONIN as a neurotransmitter in the brain, was known to account for SEROTONIN deficit in the brain, then the analysis of SEROTONIN levels within human post-mortem brain tissues, could give insight into the condition of the pilot at the time of the crash. However, with the advent of the successful sequencing of the human genome, a big door opened for the corroboration of such forensic post-mortem SEROTONIN levels in brain tissues of the deceased, and their corresponding DNA microarray specific gene expression fingerprints. This kind of corroboration of gene specific DNA microarray fingerprinting into forensic analyses, is what indeed opened up a new front in earlier detection of alcohol abuse, drug abuse, clinical depression, irritability and violent behaviour, among airline pilots, in order to put in place ACCIDENT PREVENTION MECHANISMS to reduce fatalities.

This is because a reduced SEROTONIN level in a pilot's brain forensic tissue often indicated a pilot who may have been under clinical depression, or psychosis, or alcohol abuse, or drug abuse, it hence became most important to also type for gene-specific DNA microarray fingerprints that unveil the up-regulation of either drugs of abuse-related genes, for example, if a pilot was secretly involved in cocaine use, his DNA microarray fingerprint would reveal an up-regulation of cocaine-responsive genes within a forensic tissue. So would be the case with DNA microarray fingerprints of alcohol-responsive genes among pilots who abuse alcohol. This work also provided a novel avenue for studying the DNA fingerprint of the density of SEROTONIN-2 receptors in the post-mortem human brain tissues, as an indicator of whether the pilot was on Selective SEROTONIN Reuptake Inhibitors, such as anti-depressant medication like Prozac and Zorlof. The establishment of DNA microarray fingerprints in forensic toxicology also availed the opportunity to type for receptor-responsive genes within the brain forensic tissue. It noteworthy that during that time, the MAN OF GOD was part of the team that received Recertification with Distinction from the College of American Pathologists of Northfield Illinois. At the Aerospace Medical Institute, the MAN OF GOD was also appointed as a Professor in the University of Central Oklahoma at the Department of Biological Sciences, where He extensively taught several courses in the undergraduate classes.

It was during this laying of the foundation of the most important microarray DNA fingerprinting platform at the Department of Forensic Toxicology and Aircraft Accidents, of the Civil Aerospace Medical Institute (CAMI), that the LORD stepped up the pressure to call His Servant. JEHOVAH THE GOD OF ISRAEL at that time increased HIS relentless visitations to the MAN OF GOD by increasing the frequency of dreams, vision, and by Speaking to HIM by Voice, on the need to step out and serve JESUS the Messiah. Throughout all His Career from Israel into the Civil Aerospace Medical Institute, the LORD GOD Almighty was ceaselessly in a hot pursuit to call HIS Prophet, while the Prophet of the LORD on His part was making serious attempts to flee from the Calling of JEHOVAH, until one day HE indeed finally gave in to the Calling of the LORD. It was then that the LORD sent Him as the PROPHET TO THE NATIONS.

THE CLOUD OF GOD VISITS HIM IN FRONT OF THE ARK OF GOD

After HE gave in to the Calling of GOD, and stepped out of Aerospace Medicine, then the LORD finally appeared to HIM in a Cloud in a Mighty Vision of GOD. From that Cloud, the LORD Spoke to HIM by Voice on the mission that was impending. In one of those visions at the onset of HIS calling, God Almighty lifted His Prophet in the Spirit from the earth and took him to the Throne room in Heaven and presented the Ark of the New Covenant right before Him. In that astonishing vision, the Cloud of the LORD'S Glory then came through the golden walkway that marks the Throneroom in Heaven, and sat on the Mercy Seat of the Ark of the New Covenant. At that place, the MAN OF GOD was then able to see Moses the Man of GOD and Elijah the Prophet of the LORD seated next to one side of the Mercy Seat of the Ark of GOD, and Daniel seating alone next on the other side of the Mercy Seat of the Ark of the Covenant. With Moses and Elijah on one side and Daniel on the other, it was then that God Almighty Spoke to His Prophet by Voice from the Cloud that sat on the Mercy Seat of the Ark of the Covenant and Said these words, "TODAY I HAVE MY FOUR PROPHETS HERE, AND YOU ARE THE FOURTH PROPHET AND POWER HAS TODAY BEEN GIVEN TO YOU." At that juncture, the MAN OF GOD'S bed literally shook like an earthquake had hit HIS house. Upon waking up in shock and scream, the MAN OF GOD looked at the clock that sat on the bedside table and realized that it was exactly 3:26am. It was then that He immediately began to know everything that was going to happen in future, on the earth. That is when He understood what the statement, ' ..AND POWER HAS BEEN GIVEN TO YOU' meant. After a few days, the LORD again visited with His Prophet in a very mighty way in which He appeared in His House in a Mighty vision, and stood at the door to the master bedroom. It was at that place that the MAN OF GOD saw the Cloud of GOD hovering around the door and causing Him to shout, 'LORD, IF THAT IS YOU, PLEASE TAKE ME WITH YOU.' Immediately He finished uttering these words, The MAN OF GOD was terribly shocked in that vision to realize that He had been lifted up above the bed. However, the events that followed that lifting up, have still remained inaccessible to Him todate. The only thing that the MAN OF GOD remembers, is that He woke up in the third bedroom, from where he walked down the hallway to the master bedroom at which He had been lifted up.

THE WRITING ON THE WALL

Nevertheless, it was while back to the master bedroom, that he was slaid by the LORD again and went into sleep, and saw the vision in which the HAND OF GOD placed a plexiplastic kind of board on the wall above and wrote in white the scripture, ISAIAH 43:11, 1. In that shocking vision, the HAND OF THE LORD took another transparent Plexiplastic of the same size and used it to cover the writing on the wall, as in protecting HIS WORD. The second part of that vision, became the part when the MAN OF GOD was lifted up by GOD HIMSELF and taken into Israel and HE saw the place from which John the Baptist was Called, including the drawing of his beheaded head on the wall and that of his prophetic finger. In the third part of this Mega vision, the MAN OF GOD then saw himself preaching to millions and millions of people all across the earth and shouting, "PREPARE THE WAY, THE MESSIAH IS COMING, RETURN TO HOLINESS, PREPARE THE WAY OF THE LORD." That is when the MAN OF GOD woke up and went into the bible and read the scriptures that the LORD had written unto Him:

"I, even I, am the Lord, and apart
from me there is no savior."
(ISAIAH 43:11)

That is when HE read the next one and HE Said;

“But now, this is what the Lord says—

he who created you, O Jacob,

he who formed you, O Israel:

“Fear not, for I have redeemed you;

I have summoned you by name; you are mine.”

(ISAIAH 43:1).

JOHN THE BAPTIST SPEAKS WITH HIM

And that is when THE LORD began to show Him everything that was coming happen in the future to the earth. And the MAN

OF GOD began to know everything, including knowing even when someone was planning to write him a letter in the future, including the thought process that they would behold in that future time as they would write that letter or email. It was indeed overwhelming! Following this astounding vision, then the LORD again visited His Servant in a very mighty way, in which THE LORD took Him and stood Him right in front of HIS Throne Room of Heaven. It was then, that when the Throne was fully covered by the Glory of God like a mountain that JOHN THE BAPTIST came from the Throne and appeared before the MAN OF GOD and Spoke to Him. In that conversation JOHN THE BAPTIST told Him to go to the FOUR ENDS OF THE EARTH AND PREPARE THE WAY FOR THE COMING OF THE MESSIAH. In that conversation, this became the commissioning statement of GOD ALMIGHTY WHO was seated on HIS THRONE. At that point, the Glory opened and HE saw the PERFECT LAMB OF GOD WHO DIED FOR THE SINS OF MEN ALSO SEATED ON HIS THRONE. Following this vision, the LORD then appeared again to HIS SERVANT and He saw Himself conducting humongous meeting across the globe, and many people being healed in record numbers. To each of these meetings, was a red carpet laid, that led to the Altar. And the MAN OF GOD left on a massive mission to the FOUR ENDS OF THE EARTH, on a relentless undertaking to rebuke sin in the church, and across the nations, to this day.
