

The Holy Spirit, 528 and E=mc²

Monday, October 26, 2015 19:04

The Holy Spirit Rejoices in the 528 Frequency that Renews and Sustains Life, As Evidenced by E=mc²

by Dr. Leonard G. Horowitz^{*}

In this article I am going to provide a reasonable understanding of *spirituality*, denied by atheists and many science advocates. This subject is fundamental to who you are, other than what the mainstream media and academia indoctrinates you to believe. My goal is to supply you with knowledge for practical use in healthcare and in cleaning up polluted environments.

I am certainly going to offend atheists and arrogant scientists by this writing. I bridge the gap between science and theology, and draw on science, physics, metaphysics, biophysics, electro-genetics and Bible verse to alert you to these most important matters of life versus death.

Science relies on the field of physics to demystify forces of energy. Physics characterizes phenomena according to mathematical laws that apply universally.

The word *spirit* implies a mysterious energy. The *Holy Spirit* is used in the Bible to define what spirituality is and does. It is associated with the breath of life, or the breath that gives and sustains life. And since this article also deals with “medicinal music,” my functional description of the word *spirit* comes from the healing harpist King David. He wrote to “the chief Musician” in Psalms 36:9. “For with thee *is* the fountain of life: in thy light shall we see light.” David’s *Psalms* 104:30, adds: “Thou sendest forth thy spirit, they are created: and thou renewest the face of the earth.”

So besides rejuvenation and renewal of life as a function of the Holy Spirit, let us consider the energy of spirituality that rejuvenates, heals, and sustains you. This article necessarily delves into creationism, and what has been overlooked, neglected, or suppressed in both science and religions concerning all that the Holy Spirit is and does. This *force* or energy does all the healing regardless of what medicine you take. And this article considers what is wrong with the way people think and governments operate, that reasoned analysis might cure.

This article assumes that the media and academia have powerfully influenced the way you think and act. Academic “programming” of your brain is the second most influential factor in modeling your repetitive behavior or habits. Most influential is the media, particularly television and movies, according to massive scientific evidence published by Albert Bandura. The way you think, what you believe, your attitudes, state of mind, points of view, and most importantly your “self-concept” impacting self-esteem, self-efficacy and self-mastery, are all shaped by your experiences in life. Vicarious learning experiences broadcast in “living color” and “larger than life” through hypnosis machines you call televisions and computer screens actually model behavior more powerfully than your parents and peers. Traumatic experiences, including news

headlines, horror films and real life events involving pain, loss, threats and distress impact your worldview, and contributes to social standards that influence geopolitics, economics, and even man's laws.

So what you know about the Holy Spirit or $E=mc^2$ sources mainly through the biased, unrighteous, and deceitful media moguls who control online services such as Google, YouTube, and *Wikipedia*, and broadcasting networks such as ABC-Disney, FOX and MSNBC. You never learned from these sources of "intelligence" that Einstein's theory of relativity and energy-mass conversion evidences creationism and holy spirituality.

Most importantly, this topic addresses spirituality versus physical chemistry. I conclude in this writing that you can use this intelligence to restore your health and happiness. The energy of 528Hz frequency central to universal design and Holy Spirit expression can accelerate your healing and defense against ignorance and corporate malice. Making and listening to 528Hz music can extend your life.

Hopefully you will share this life-saving and paradigm-shattering knowledge with others to co-create a better and healthier world, scientists and atheists included.

Moreover, science and religion has divided people, races, cultures and society. Examples include forced homeschooling of children who refuse vaccinations for spiritual or religious reasons. Other examples include rifts between Jews and gentiles, Christians and Muslims, even Protestants versus Catholics. Capitalists challenge Communists. Chinese Communists discourage every religion, persecute Tibetan priests, and encourage female infanticide; while Capitalists, in the business of poisoning things, such as with antibiotics, conceal sterilizing agents in vaccines such as the anti-pregnancy hormone "HCG." Drug companies also put nonoxynol-9 spermicide into vaccines to reduce populations. So this intelligence about healing by the Holy Spirit and LOVE of God resonating therein presents practical solutions to "Babylonian madness" involving bioenergetics and "medicinal music" in the frequency of LOVE/528.

(2) Provide a simple solution to complex world problems.

The solutions to civilization's greatest problems I affirm rests in the "528LOVERevolution." I have witnessed the exponential growth of this grassroots movement that began with a mass movement of people in the music and natural healing industries coming together in 2009. The Concert for the Living Water, "LIVE H2O" heralded this opportunity on the Summer Solstice of that year. Groups from seventy-six nations participated and celebrated much of the information contained in this article. Since then, millions of people have joined what a hundred thousand of us began, persuaded by information in my book *LOVE: The Real da Vinci CODE* published in 2008, and *The Book of 528: Prosperity Key of LOVE*, available since 2012. These books have turned people on to the secrets of 528Hz frequency. That is the third note of the original Solfeggio musical scale that was traditionally used in Gregorian chants to produce *miracles*. That's why the 528Hz pure tone was referred to as the "MI" note in the scale. It was called "Mira gestorum" in Latin, meaning *miracles* in English. It was believed by priests for millennia to be associated with miraculous manifestations, including healings. The mechanism by which this pure tone operates, along with the benefits of 528nm of greenish-yellow light, is superficially explained in this article. My readers have found more information online and in my books VERY helpful. (So please share it to spread the good news.)

I begin below by explaining how and why you are still here, still surviving, with many people thriving, on this poisoned, dangerous, and deceptive planet. You can thank God's Holy Spirit for your presence and sustenance.

This is the Age of Denial

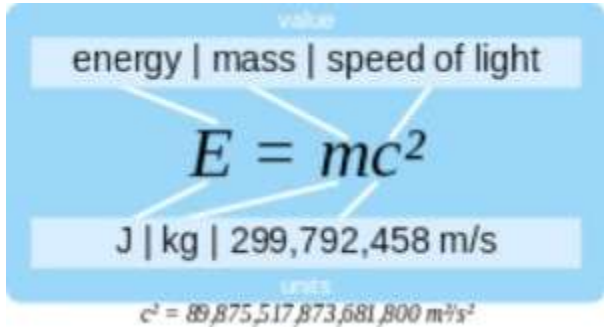

A lot of people have lost faith in God and science. Both seem to have brought civilization to the brink of extinction. The majority of people now question the legitimacy of both corporate controlled science and dogma-delivering religions. Both belief systems have undoubtedly led subscribers to premature death. Many people now argue for terminating reliance on both ideological systems that have obviously abused and controlled people, and are now clearly competing for "market shares."

Shall we throw these babies out with their bath water? Should we neglect the lessons learned and taught by heroes in science and scripture? Shall we reject science and philosophy/theology that seeks to understand the secrets of life and the cosmos? Shall we abandon ethics and laws fundamental to civilization, such as those asserted by the Ten Commandments? Must we reject the Prince of Peace’s distillation of righteous living—to LOVE God with all your heart, and LOVE and treat your neighbor as you would want to be loved and treated yourself?

Both science and religion share a common denominator that is the focus of this article, and remedy for our collective ignorance. That common denominator, and treatment for what ails us, is the ELECTRON. This is the primordial energy carrier of life operating in the Holy Spirit. Designated “e”—forenergy— all energy universally is mediated by this single empowering agent called the *electron*.

This energy electron, a most common factor central to the laws of physics and metaphysics (or spiritual dynamics), keeps our universe moving and miraculously manifesting itself before your eyes. I further assert that electrons vibrating at the special frequency of 528 nanometers of light, and cycles per second of sound, provide the wherewithal to solve the world’s greatest problems.

Introduction to Electron Energy and the Physics of Spirituality

In [physics](#), Einstein’s equation “E=mc²” is most famous. But what does it mean? Most people have no clue. That is a sad fact.

The freeing truth about E=mc² has been recklessly secreted from the world despite the equation’s wide renown. E=mc²’s meaning in the world of religion has likewise been neglected, as has its applications in medicine. The fields of biophysics and energy medicine depend on this knowledge, yet children and the world’s brightest doctors are unaware of this good news. The results of neglecting the meaning of this equation in society, or the operation of electron energy within the Holy Spirit, have been deadly. In clinical medicine, secreting this information is arguably genocidal.

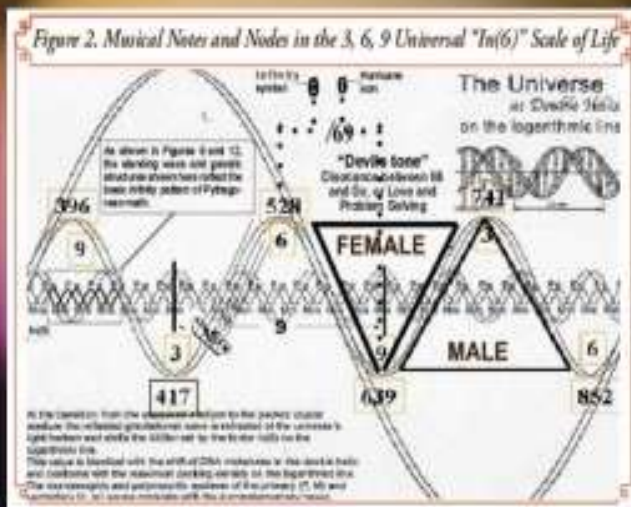

The E=mc² equation should be widely heralded in the context of science *and* religion, or physics and metaphysics. This equation is especially meaningful if you need proof that you, above all, are a spiritual (i.e., energetic) being, more than mere flesh and blood. Your body is composed of approximately 80% ocean water and 20% lava rock. Your blood plasma and lymph fluid is virtually the same as sea water; and your organic chemistry is made up of elements all sourcing from volcanic matter. These two ingredients—ocean water and lava rock—form the basis of your body mass.

Yet your most powerful animating ingredient is your electron-rich Holy Spirit. That is, your physical body would not exist were it not for the electron(ic) component of your Holy Spirit.

From what we can surmise about this miraculous and miracle-working phenomenon, these subatomic “particle/waves” of energy vibrate at certain frequencies, especially the frequency of what I call “LOVE/528.”

Like ocean waves that rise and fall, ebbing, flowing and crashing ashore, energy, like everything else in nature, comes in cycles. (“To everything there is a season.”) Frequencies of these cycles are commonly measured within a certain time period, such as a second. Sound energy varies by what is called “Hertz (Hz) frequencies” characterizing the number of energy waves coming and going in “cycles per second.” One cycle of electron-rich (electromagnetic and acoustic) wave energy is shown in the larger wave within the diagram below. (Three small waves are shown within the larger wave in the diagram. Adapted from Hartmut Mueller’s “In 6” model of universal scaling.)

Light energy is measured in terms of distance, such as a meter or nanometer (nm). This measure characterizes a color, such as 528nm of electro-energy. This greenish-yellow color vibrates at the 528 wavelength of the electromagnetic visible light spectrum, that is the heart of the rainbow.

528nm is also the color of a baby leaf budding in springtime, full of life and the potential to activate its solar energy producing pigment called chlorophyll.

Like ocean waves crashing to shore generating oxygen (O_2), plants, via chlorophyll, generate oxygen-rich vibrating electrons. Specifically, due to its color, common sense tells you that O_2 carries “electrons of LOVE/528” vibrating in greenish-yellow color central to sunshine.

Light energy is measured in terms of distance, such as a meter or nanometer (nm). This measure characterizes a color, such as 528nm of electro-energy. This greenish-yellow color vibrates at the 528 wavelength of the electromagnetic visible light spectrum, that is the heart of the rainbow. 528nm is also the color of a baby leaf budding in springtime, full of life and the potential to activate its solar energy producing pigment called chlorophyll. Like ocean waves crashing to shore generating oxygen (O_2), plants, via chlorophyll, generate oxygen-rich vibrating electrons. Specifically, due to its color, common sense tells you that O_2 carries “electrons of LOVE/528” vibrating in greenish-yellow color central to sunshine.

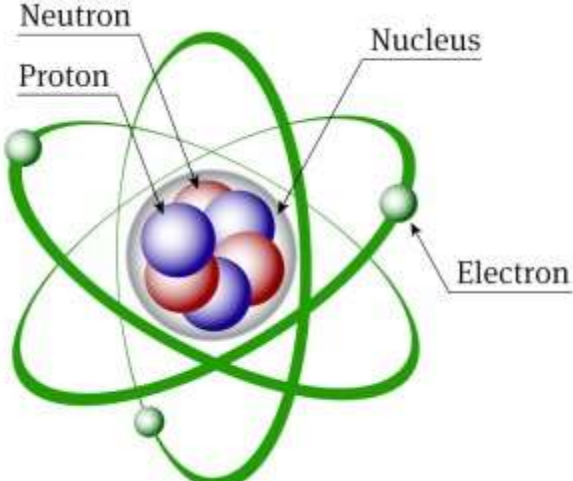

Or is it central to God’s heart? In fact, it is clearly both, according to a massive amount of evidence that I compiled in [The Book of 528: Prosperity Key of LOVE](#).

This electron-rich Holy Spirit is both mysterious and revealing. It is a paradox that scientists and religious persons have yet to understand. No one can produce electrons. These tiny vibrating particles are paradoxically also waves. They are called “wave-particles,” and are most important in universal construction and animation.

For instance, when you look at yourself in a mirror what you see is a reflection of your electrons. You don't see protons or neutrons that are much larger particles within the atoms comprising your chemistry and physical mass. All you witness is electrons—"wave-particles" that form "electron clouds"—producing your body image and mass.

Science can't figure out this mystery surrounding electrons. Yet many scientists and atheists have the arrogance to deny what they can't conceive in their ignorance. Scientists know every action and reaction in the universe happens because of electrons. The entire universe operates "piezo-electrically"—that is, for every action and reaction, or interaction between forces of nature, these tiny electrons empower all physical and chemical reactions.

The fact that faith-filled people can manifest and direct the Holy Spirit to perform healing miracles trumps science's arrogance. Faith is a value or property of the heart, that is related to bravery or a brave heart. How brave are scientists to go up against those who fund their grants? Not very brave or faithful at all. Consequently, the light of truth is dim or gone from the heart and mind of many, probably most, "scientists." This inherent bias in their brains, called a "scotoma" in medicine and psychology, certifies science is run by hypocrites. Scientists claim they seek to understand the mysteries of the universe, yet blind themselves to the greatest animated healing mystery involving electron-rich free energy instantly available anytime to help them!

	<p>Moreover, in your body, the presence or absence of electrons determine your acidity or alkalinity, health and vitality versus disease and lethargy. Acidity or alkalinity are measured by "pH" (i.e., "parts Hydrogen). Consider the chemical equation for water:</p> $\text{H}^+ + \text{OH}^- = \text{H}_2\text{O}$ <p>The reason the H^+ carries a positive charge is because it has lost an electron. That means the hydrogen has lost its energy carrier. That also means its effectively dead, acidifying, damaging, degenerating.</p> <p>This is what happens to human bodies and the environment when electron energy is lost as a result of pollution and intoxication.</p>
--	---

Notice in that water equation where the electron goes. It partners with Oxygen (OH^-). Here is more evidence that the Holy Spirit, akin to the Holy Breath (from the Hebrew "Rauch Ha Kodesh"), features the animating energizing ingredient called the "negatively charged electron." This, again, is why Oxygen renews and sustains life. It delivers "the life that is in the blood"—the animating enlivening electrons.

In our solar system electrons mediate electromagnetism, even gravity of physical bodies throughout the cosmos.

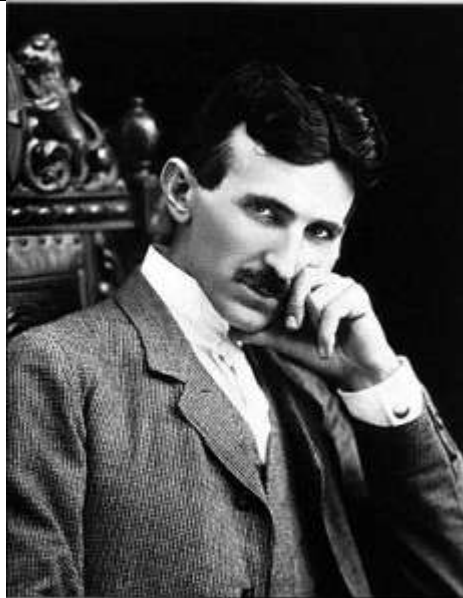

Yet, despite the importance and omni-presence of electrons, scientists cannot even produce them without destroying things. Physicists and militarists don't create, only "liberate" electrons by bombarding atoms in costly and destructive "experiments." The nuclear bomb is one such example. Burning things such as environment-destroying acidifying fossil fuels, including coal, oil and gas, can generate currents of electrons to light homes and businesses, but at what cost? Alternatively, electron energy (i.e., "electro-energy" or electricity) can be made "green" (in the color of LOVE/528nm) using photoelectric cells that convert the electrons coming from sunlight into electricity to power homes and industries.

Within this spectrum of electron(ic) energy conversions, "free energy" capability is purposely neglected by utility companies and bribed government regulators. These agents and entities of evil permit the illegal and

enslaving monopoly administered by the energy industry for purported “progress” and “better quality of life.”

Introduction to “Free Energy,” Physiology, and Bio-physics

Nicola Tesla was the Twentieth Century’s greatest genius—smarter and more productive than Einstein. Tesla invented the alternating current electrical system used today, as well as amazing conveniences such as the radio—a technology stolen by Marconi.

Tesla once said, “If humanity only knew the power of the 3s, 6s, and 9s, it would be a completely different universe.” (The ancient Pythagorean mystery school mathematicians added the “8s.”)

Evidencing the malicious intent and criminal negligence of energy industrialists, Tesla died penniless after revealing to leading energy industrialists that “free energy” is available everywhere, at any time, by simply using a little bit of electricity to generate a massive amount of *free energy* through a system involving copper coils.

Tesla and Einstein correctly reasoned that a massive amount of free energy exists naturally in the ambient air. It also moves through solid mass including planets.

Lightening bolts strike earth to ground electron currents that Tesla sought to harness and commercialize. He was purposely defamed, put out of business, and had his life’s work suppressed.

Today medical imaging equipment makes use of related electromagnetic technologies, but this intelligence too remains generally neglected and suppressed to disadvantage people who would otherwise realize energy, more than chemistry, controls everything, including what is happening in your body, and how such free energy can be used to treat every disease, besides helping to diagnose diseases.

I theorize that every disease is rooted in the deficiency of electrons and electron(ic) energy required for vital immunity, normal physiology and metabolism.

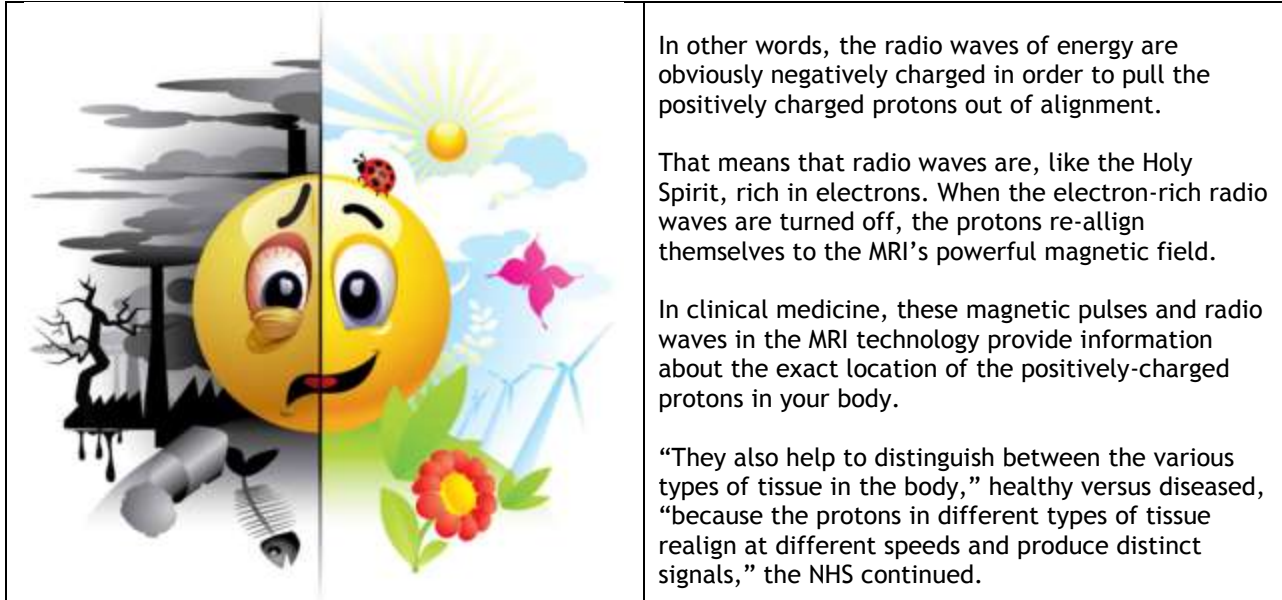

Cells and tissues need to be recharged continuously with electrons of energy. Cell membranes are electromagnetically polarized to function properly. The best example is a nerve cell or muscle fiber. Both relax and contract due to shifting electromagnetic polarities along the cell membranes. The relaxation and contraction is fundamentally due to the ebb and flow of electrons associates with certain metabolites, such as sodium, potassium, or magnesium available to your system through foods and water. (This is why sea salt is much healthier for you than table salt, since sea salt supplies the full array of electron rich minerals, whereas table salt supplies only sodium and chloride.) This knowledge is used in medicine, but it is rarely explained to people who need the information most.

Modern medicine makes use of this rare intelligence. The best example is MRI equipment used to diagnose diseases. (Officials have generally suppressed therapeutic advances using free energy because it could put drug industrialists out of business.) According to the British Government, and their National Health Service (NHS), “[d]uring a magnetic resonance imaging (MRI) scan, you lie in a strong magnetic field and radio-frequency waves are directed at your body. This produces detailed images of the inside of your body.”

Here is how this works, according to the NHS: “Most of the human body is made up of water molecules, which consist of hydrogen and oxygen atoms. At the centre of each hydrogen atom there is an even smaller particle called a proton. Protons are like tiny [positively charged] magnets and are very sensitive to magnetic fields.

“When you lie under the powerful scanner magnets, the protons in your body line up in the same direction, in the same way that a magnet can pull the needle of a compass.

“Short bursts of radio waves are then sent to certain areas of [your] body, knocking the protons out of alignment. When the radio waves are turned off, the protons realign and in doing so send out radio signals, which are picked up by receivers.”

This is very much the “same way that millions of pixels on a computer screen can create complex pictures, the signals from the millions of protons in the body are combined to create a detailed image of the inside of [your] body.”

Similarly, this is how your mass of energy electrons generate your image in a mirror, instead of a computer screen. The main difference is that your monitor is your eyes and brain that is interpreting the image you see in the mirror; and rather than pixels on a flat video display, you see electrons.

What you are witnessing, therefore, as you view yourself or others in life, is a “bio-holographic electron(ic) precipitation, crystallization, miraculous manifestation, of Divine frequency vibrations, coming out of water by the grace of God, administered according to Her ingenious musical-mathematical matrix of Divine design and universal creation.” That summarizes the best of “life-science.”

Musical Mathematics, Water resonance, and Electro-genetics.

The aforementioned facts, published by the Western World's most intelligent public health service, compounds evidence favoring 528Hz music that I published in *The Book of 528: Prosperity Key of LOVE*. It compounds evidence that today's jarring music played in A=440Hz “standard tuning” is unhealthy. If the NHS asserts that radio waves alter the position of your body protons that are positively charged, how do you think dissonant music impacts negatively charged electrons in your body? It obviously repulses them. It certainly alters electron(ic) normalcy in your body.

I argue that the imposition of $A=440/F\#=741\text{Hz}$ “standard tuning” not only degenerates the quality of music, but this conversion was done in bad faith by the Rockefeller Foundation in 1938 in service to the Rockefeller “energy family.” The Rockefeller Foundation commissioned Josef Goebbels, Nazi propaganda minister for the Third Reich, partnered with Rockefeller Standard Oil Company in the development of the concentration camps during World War II, to persuade the British Standards Institute to adapt $A=440\text{Hz}$ “concert pitch” for all Western music. This (arguably demonic) conversion to $A=440\text{Hz}$ from $A=444\text{Hz}$ (that generates $C=528\text{Hz}$) was opposed by Europe’s finest conductors, composers and musicians. This conversion clearly changed the quality and spiritual resonance of the music; but in my opinion, it further sickened and enslaved people to Babylonian-style geopolitics and commerce. I conclude music made in $A=440\text{Hz}$ spiritually suppresses people, blocks natural creative inspiration, and restricts their awareness or “consciousness” to the frightening and distressing commercial reality imposed and reinforced by the mainstream media that controls the music industry along with Hollywood.

I draw this conclusion since $F\#=741\text{Hz}$, is dominant in the D-major chord in $A=440\text{Hz}$ “standard tuning.” This $F\#=741\text{Hz}$ frequency is widely known in musicology as the “Devil’s Tone” (augmented 4th and diminished 5th, or “Tritone”). It is absolutely antagonistic (or dissonant) to 528Hz —the energy of LOVE, peace, harmony, electron-rich oxygen, and Holy Spirituality.

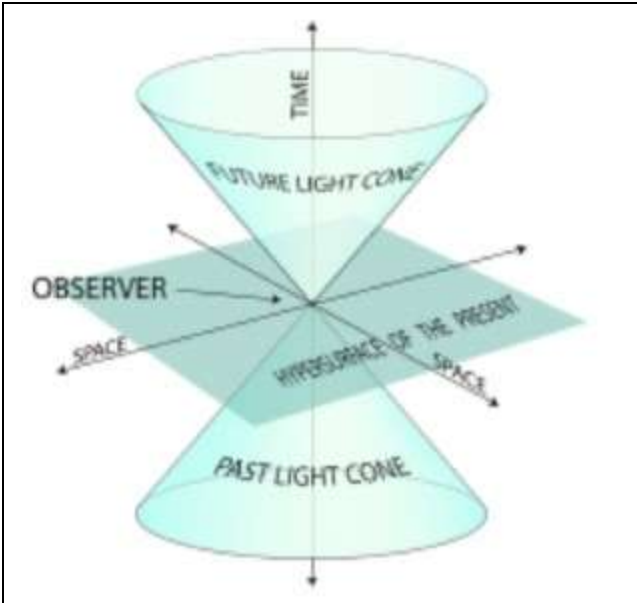

Furthermore, based on Oriental medicine and chakra system energy dynamics, $F\#=741\text{Hz}$ stimulates pineal gland activity and ego-centrism suitable for fear induction and fueling markets for what I call the “military-medical-petrochemical-pharmaceutical, banking cartel.” This multi-national corporate monopoly directing the media and “free world economies” is fascist. The monopoly advances neo-colonialism, terrorism, nuclear weapons and “Star Wars” developments, atomic energy versus free energy, and drug industry ploys to sell lethal pharmaceuticals that pollute people and the environment, and cause costly deadly side effects promising expanded markets for new investments and enslavements. This psychopathic energy cartel influence, and change in the music industry, chemically intoxicated and spiritually-suppressed the Western world, and eventually the whole world as Western music and multi-national corporate greed spread East.

The resonant energy of $A=440\text{Hz}$ impacting people’s body water (and protons) actually distresses and damages people bio-energetically. Extrapolating the NHS’s explanation of functioning MRI, the $A=440\text{Hz}$ “concert pitch” not only knocks body protons out of “normal position,” but also alters the electro-dynamics of water resonance in your body that can have a damaging impact on your DNA.

Genetic expression is scientifically established to depend on a special kind of water called “structured water” (a.k.a., “clustered water”). Snowflakes form from structured water. Snowflakes always form with six-sides (i.e., hexagonal shaped). These hexagonal shaped water rings contain millions of H_2O molecules in each snowflake. This kind of “structured water” within and around your DNA enables “genetic expression,” also called “cellular up-regulation.”

The diagram below published by *Wikipedia* depicts the principle of relativity, or “special relativity” that essentially says that the speed of light in a vacuum is constant (i.e., “ c ”). Also, “[t]he laws by which the states of physical systems undergo change are not affected” by observers.

In other words, the laws of physics, metaphysics, universal creation, balance, harmony, and healing are constant. These universal constants, like the speed of light in a vacuum, operate regardless of your point of view, state of mind, limiting belief, attitudinal system, frame of reference, or observation point. Energy follows the same laws of attraction and repulsion as negatively charged electrons do in your body in response to sound and light.

Given the absolute constant power in the laws of nature, dictating the energy-mass equivalency and special relativity reality, this truth evidences the absurdity of ongoing poisonings by the “healthcare professionals” serving the petrochemical-pharmaceutical monopoly.

Medical industrialists who neglect and censor this intelligence aid and abet genocide. And by keeping people ignorant to these facts, people willingly give their ill-informed consent to being poisoned and murdered.

Chemical and pharmaceutical poisonings of *We The People*, and widespread pollution and intoxication of other species in our dying degenerating environments, evidence shocking criminality and psychopathology.

This lethal insanity is intolerable to civilized people. We must consider alternatives to this madness for disease prevention, health promotion, clinical care, and environmental clean-up that honors nature and the Holy Spirit more than chemistry. The primordial power and formative energy of electrons resonating in LOVE/528 manifests the masses. Needy people, plants, and animals worldwide await emancipation and restoration with the frequency vibration of LOVE.

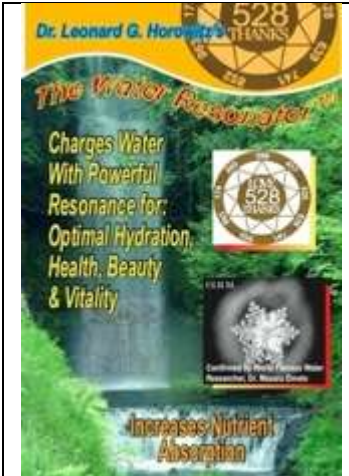

Closing Comments and My Top Ten Recommendations

People ask me all the time how they can apply this knowledge in everyday practice. I recommend they:

1) Become a daily listener, supporter, and promoter of 528Radio.com. This service operates by donation. So long as we are not hacked or have a power outage, 528Hz “medicinal music” broadcasts here 24/7/365.

 <p>HealthyWorldStore.com Holy Harmony CD</p> <p>MUST HAVES!</p> <p>528 Tuning Forks</p>	 <p>528 Auto Energizers</p> <p>SAFER, MORE RELAXED & HEALTHIER DRIVING. GAIN BIOMAGNETIC RELIEF for ACHES & PAINS.</p> <p>TESLA-CHARGE Your Car with the Vibe of LOVE/528Hz for Electromagnetic Therapy</p>
<p>2) Transpose your MP3 music from A=440Hz into A=444Hz using the 528Records.com website. This too operates by public support. The service suggests a small donation for each track you remaster. Recording artists and engineers can re-master entire albums for less than the cost of one CD.</p>	<p>4) Place a “528 Auto Energizer” in your vehicle or next to your bed. This helps make driving time or sleeping more rejuvenating. These and other 528 Orgone Generators are described at 528OrgoneGenerators.com</p>

 <p>Dr. Leonard G. Horowitz's 528 HZ WATER RESONATORS</p> <p>The Water Resonator</p> <p>Charges Water With Powerful Resonance for: Optimal Hydration, Health, Beauty & Vitality</p> <p>Increases Nutrient Absorption</p>	<p>5. praying over your water containers. This method can be enhanced using “528 Water Resonators.” These are stickers that you can affix to your glassware. Add fresh squeezed organic lemon or lime juice that contains a lot of calcium, and you will increase your water’s pH, making it more alkaline. This is important for natural healing and optimizing immunity. Remember, the higher the pH, the more energy electrons are in your drink.</p>
--	--

6) Take nature walks and breathe deeply surrounded by greenery. The oxygen in forests and along beaches is electron rich, with electrons naturally resonating in 528nm/Hz. (Remember, water is a liquid crystal superconductor of sound and light. It receives, stores, and transmits the heart of sunshine, just like green plants, that is, 528nm.)

7) Walk barefoot on your lawn wet with morning dew. Deep breathe as you do. Imagine all distress and disease being conducted down through the soles of your feet into the earth. The damp dew connects your body water through your damp skin to the earth, and electrons rich in 528nm/Hz will flow down through the top of your head (i.e., crown chakra), throughout your body; and like a lightning bolt, this practice transmits and transmutes your toxic (acidified) energy into Mother Earth. This therapy will reduce aches and pains, and should also be used with thanks-giving and faithful prayer.

	<p>8) Use foot reflexology on your painful and tender spots by pressing those skin reflexology points against damp smooth rocks that you can gather at the beach or river. Even better, do this at the beach or river as you deep breath into your painful points on your bare feet. Use your body weight to press against your painful reflexology points adjusting your pressure to your pain tolerance. Enhance the therapy by imagining white light pouring down through the top of your head, cleansing your body, and then pouring out through your feet into the damp rocks. (We careful not to slip or fall on rock algae.)</p>
---	---

	<p>9) Baptise yourself in your bathtub using a 528 Tuning Fork and 528 Tuning Fork Holder available through CureShoppe.com.</p> <p>The Tuning Fork outputs the 528 frequency of sound. The 528 holder outputs a 528 resonating electromagnetic field. Stir a cup of Epsom salt into your bathwater.</p> <p>While bathing and relaxing strike the tuning fork on the rubber edge of the holder and immediately submerge the tuning fork handle into the bathwater allowing the fork to continue vibrating the 528Hz frequency.</p> <p>Add faithful prayer to release your stresses and strains over to the light of LOVE/528, and thank God for enabling you to better serve others in optimal health.</p>
--	---

10) Use [OxySilver](#) with 528 immediately at the first sign of a cold or flu. Take three (3) capfulls with faithful prayer. Close your eyes when you allow this product to sit under your tongue for 15 seconds, and pray for continued health. Notice the brighter white light expanding in your body when you take and swallow your [OxySilver](#). This product comes with a full money-back refund if you get sick. Very few people do. This product produced in 528 light and sound demonstrates the power of natural healing using electrons of LOVE/528 in superconducting mineral water made with microfine silver bonded to the oxygen in the water. This is a unique product unlike other silver hydrosols or colloidal silver. There are no risks from using this product as recommended, unlike antibiotics and vaccinations.

*** About the Award Winning Author, Filmmaker, and Whistleblower:**

[Dr. Leonard G. Horowitz](#) is the world's most prolific, best credential, and most controversial drug industry critic.

This music industry revolutionary, natural medicine expert, pharmaceutical industry whistleblower, and intelligence industry analyst has published eighteen books, five documentary films, and dozens of peer reviewed scientific articles.

After receiving his Doctor of Dental Medicine degree from Tufts University, and a Master of Public Health degree from Harvard University, Dr. Horowitz went on to publish the first of three American bestsellers, [Emerging Viruses: AIDS & Ebola-Nature, Accident or Intentional?](#).

This book is largely credited by Centers for Disease Control (CDC) officials for prompting the global vaccination risk awareness movement. Dr. Horowitz's monumental text caused several governments to reconsider their "immunization" policies, and it became the center of political debate in 2008 when Barack Obama's minister, Rev. Jeremiah Wright, credited Horowitz and this book for evidencing HIV/AIDS as a genocidal weapon of mass depopulation targeting Africans and African Americans courtesy of covert U.S. military contractors named in the publication.

Dr. Horowitz's second bestseller, [Healing Codes for the Biological Apocalypse](#), prompted a revolution in the music and natural healing industries.

The retired dentist and naturopathic physician's consumer health guidebook, [Healing Celebrations: Miraculous Recoveries Through Ancient Scripture, Natural Medicine and Modern Science](#), pioneered the protocol adopted by thousands of natural healers and doctors worldwide.

His 2007 decryption of Leonardo da Vinci's most famous drawing revealed the mathematics of [LOVE: The Real da Vinci CODE](#); and his follow-up text, the most monumental of his 30-year career, [The Book of 528: Prosperity Key of LOVE](#), reveals "God's creative technology," available for revolutionizing music, recording artistry, healthcare and medicine, environmental protection, natural resource restoration, along with civilization's transformation as an "enlightened species" choosing peaceful sustainable collaboration versus murderous degenerative competition and lethal consumption.

From Dr. Horowitz's books, video productions, and documentary films, Hollywood filmmakers have drawn many ideas, including the 2010 movie [INCEPTION](#), and several others.

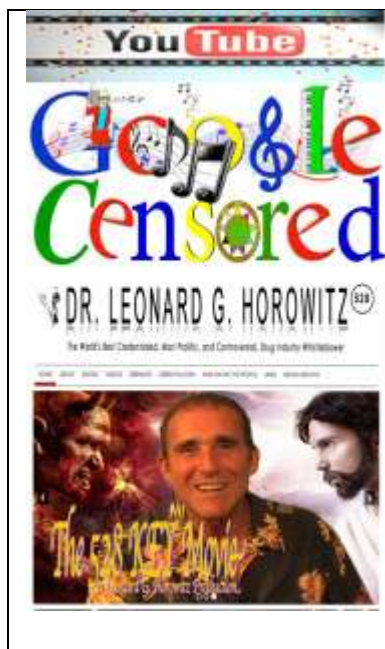

International acclaim and widespread acceptance of the doctor's works revealing Solfeggio frequency physics and metaphysics has prompted the "528LOVERevolution," which Dr. Horowitz and his partner, journalist and activist, [Sherri Kane](#), has commercialized in the rapidly growing [528RadioNetwork.com](#) and through his private television station, [LOVE528TV.net](#).

Dr. Horowitz's and Sherri Kane's 528Radio.com broadcasts "medicinal music" transposed into the "LOVE frequency" of 528Hz, that resonates the heart of rainbows, 528nm of greenish-yellow light, precisely why grass is green, and the air is full of electron-energized oxygen vibrating in the energy of LOVE/528.

Dr. Horowitz's film presentation, the [528KEY movie](#), provides an explanation of the great opportunity provided by the 528 frequency for advancing unprecedented benefits to civilization.

The Controversial Dr. Horowitz

There is no more knowledgeable, credible, credentialed, and prolific professional in the world addressing the duplicity of geopolitics and economics influencing "healthcare," and the solutions to these and other urgent problems affecting global populations, than Dr. Horowitz.

The veteran media commentator and professional speaker has been especially critical of the Rockefeller-financed World Health Organization (WHO)-an entity of the United Nations created to advance and legitimize Western medicine, what critics call "Big Pharma"—what this Harvard-trained expert in public health and behavioral science refers to irreverently as the "military-medical-petrochemical-pharmaceutical-banking cartel."

In an effort to counter the blatant unlawful monopolization of Western medicine by the WHO, its regulatory agents, agencies, and actions (advancing to terminate consumer access to natural healing products such as herbs and vitamins called "Codex Alimentarius") and the complicity of American agencies including the FDA and CDC to this illegal (Sherman Anti-trust Act prohibited) activity, Dr. Horowitz and colleagues developed Healthy World Organization (HWO)—a non-profit enterprise sustained by members, "grass roots consumers," HWO Affiliates, and HWO Ambassadors trained in natural medicine and certified by accredited academic "partners" in the [World Organization for Natural Medicine](#).

Cellular up-regulation is the process by which your *mass* (viewed as a biohologram) is actually formed instantaneously and reformed miraculously every instant, by the electron(ic)-energy (i.e., electromagnetic and bioacoustic forces) being received and transmitted by your DNA.

This field of science is called "electro-genetics." And electro-genetics interfaces with the field of biophysics.

Electro-genetics considers sound and light signaling to and from your DNA. That is, genes are turned on and off **electronically**, electromagnetically or bio-acoustically by tiny packets of radio waves or *phonons* of sound, as well as tiny packets of light called *photons*. Contrary to popular belief, genetic expression is not mainly administered chemically, but energetically, or bio-spiritually.

Now consider how stupid it is for lab scientists to develop mutant viruses to infect humans in order to cause certain genes to be expressed or suppressed, when genetic expression is naturally administered **electronically**, and can be influenced by even radio waves and certain music. Given the high risks and costs, this field of creating new infectious agents to turn genes on and off (called "geneto-pharmaceuticals") should be *banned*.

Health science is just beginning to report on increased cancer rates caused by genetic alterations from electrical systems that vary from high powered energy stations to cell phones. Of course, much of this data has been suppressed by special interest groups dictating policy to agencies such as the National Cancer Institute (NCI) or Centers for Disease Control (CDC). In my opinion, these organizations simply can't be trusted.

Add to these circumstances the risks of genetic damage from radio waves delivering A=440Hz dissonant music and you have a recipe for disaster in cancer control.

E=mc² Confirms Your Spiritual Existence

In review, frequencies of sound and light mediated by electrons vibrate inside and outside of your body at certain rates and distances, or in "space/time."

Similarly, electron-mediated spirituality energizes your body cells and tissues. This spirituality depends upon the quantity and quality of light and sound within and around you. This system, called *biology*, is especially dependent upon the water within you, and the resonant energy of sound and light signaling affecting every water molecule, and part of you at every moment. The virtually instantaneous whole body impact of a specific sound or light energy hitting you is assured by your body water, since water is a liquid crystal superconductor of sound and light. (This is how and why homeopathic medicines impact your entire body instantly, shifting your whole body energy in sync or harmony with whatever resonance energy is contained in the homeopathic medicine.)

Based on the aforementioned facts, I also conclude that electrons comprising packets of sound and light energy that is manifesting your mass, as seen by your reflection in a mirror, restores your physical body repeatedly every instant. This is how you stay alive, and appear in this earthy dimension of space/time. This also partially explains how and why the Holy Spirit works to administer miracles, curing people of incurable diseases following faithful prayer. Simply put, the metaphysical power of LOVE/528 blows out physical ailments, energy imbalances and blockages, we label diseases, giving them special names to multiply and diversify medical and pharmaceutical sales.

The take-home lesson in all of this is that electron energy, akin to spirituality, is fundamental to your life and natural healing. You are fundamentally a spiritual being (albeit dumbed-down and spiritually repressed). What is spirit but energy? What is energy—the force generated by electrons. And where do these electrons originate? For humans and animals inhabiting Earth, the energy comes from sunlight, oxygen produced by chlorophyll, and water.

In the world of physics, E=mc² reflects the aforementioned facts. The "mass-energy equivalence," or the concept that the [mass](#) of an object or [system](#) is a measure of its [energy](#) content, proves the theory that you are a spiritual being before you manifest as a physical person.

Explaining E=mc², *Wikipedia* considered adding 25 kilowatt-hours of *any* form of energy to any object to increase its *mass*. Scientists report that 25 kilowatt-hours increases mass by 1 [microgram](#). That amount of energy also increases the weight and [inertia](#) of any mass even though no [matter](#), no atoms, no protons nor neutrons, was visibly added. ***Only electrons of light or sound produce this increase in body mass.***

Is this magic? How can you increase your mass without adding any matter? That is again the scientific paradox of electron(ic)-spirituality—a dilemma that argues that God's genius far outweighs scientists' arrogance. You don't add any matter, simply something you can't grasp with your limited senses, and suddenly you gain weight?

A lot of people might claim this helps explain why they gain weight just looking at food. In fact, this may not be completely far-fetched. Just thinking thin, or worrying about gaining weight, generates mental energy that does seem to impact physical reality.

Typically, no sight, taste, feel, smell, or hearing can sense this transformation of energy into matter. The process is mysterious, but is best explained by the facts presented in this article that argue you are a spiritual being as much as a physical being.

 <p>Partnership for New York City</p> 	<p>I conclude that your physical existence and well-being depends on the energy and bio-energy you receive and transmit.</p> <p>I further conclude that <i>this basic knowledge shatters the medical-pharmaceutical paradigm</i> that is most profitably administered by the aforementioned multinational corporate con-artists who live in denial and can't see what is right in front of their scientific geniuses.</p> <p>Drug pushers and prostitutes neglect these facts for the “powers that be,” and paid advertisers, media moguls, Hollywood producers, and Internet trolls conceal and discredit the aforementioned freeing truths.</p>
--	---

Returning to [Wikipedia](#) that repeatedly misrepresented and censored this author's biography to disparage my reputation and conceal my works, $E=mc^2$ editors reported that the theory of “[m]ass-energy equivalence arose originally from [special relativity](#) [studies] as a paradox . . . The equivalence of energy E and mass m is reliant on the [speed of light](#) c and is described by” Einstein's famous equation: $E=mc^2$.

“A [physical system](#) has a property called energy and a corresponding property called mass; the two properties are equivalent in that they are always both present in the same (i.e. constant) proportion to one another.

Thus, $E=mc^2$ —this mass-energy relation—asserts that there is a “universal proportionality factor between equivalent amounts of energy and mass that is equal to the speed of [light](#) squared.” This equation is used to [convert units of mass](#) to [units of energy](#), no matter what [system of measurement units](#) are used.
