

Formula Mod Age Clarification

Feb 20, 2017

The intention of the age for Formula Mod, was to allow kids to move up under the rule in Appendix II,

#12 Any driver who will turn 9 on or before May 31st of a racing season, **must move up on their 9th birthday**, but has the option of moving up to and racing in the Senior division at all Local, Regional, and National Events, at any time prior to his or her ninth birthday. Once he or she has made this decision and raced in a Senior division, he or she shall not be allowed to return to the Junior division of that class for any reason. If this option is used USAC National office must be notified and driver card shall be documented.

#8 reads, In order to run a World Formula, or Formula Mod, a driver must have 12 months in an unrestricted class or Senior Animal or obtain the unanimous approval of the Rookie Committee and final approval from USAC and meet the minimum age requirements.

As we all interpret rules a little differently, I read #8 “meet the minimum age requirement”, as the entire rule for age limits. Meaning not only the age chart in App I, but also the Amendments in App II. I put more emphasis on #12 and did not read enough into #8. Whether I interpreted it right or wrong, this was my intention when we made the age 10 for this class instead of 9. Drivers in Formula Mod fall under #12. I will write a clarification to get in the rule book. My apologies as I thought my intentions were covered under #12.
