NexGenPlank, an American made fiberglass scaffold plank, provides for a safer, lighter weight scaffold structure, is corrosion resistant, not subject to environmental rot, fungus or water retention, is UVA/UVB resistant and fire retardant. There are no special storage requirements and requires lower inspection and maintenance time as compared to wood and LVL plank. Today, fiberglass is an ideal material for use on many commercial and industrial projects with its high level of mechanical properties (resistance to weight ratio). NexGenPlank offers a 5-year manufacturer's warranty from date of purchase for shape and corrosion.

KEY BENEFITS

- Customers name can be embossed for full security
- Quicker to erect and dismantle - increasing productivity
- Contamination can be washed away
- Substantially longer life than wood plank
- Lower maintenance or storage costs
- Long-life asset - not a commodity
- Rust, rut and fungus proof
