

Nutritional / Holistic Therapy

All over the world many potent herbs are able to save cancer patients at various stages.

What is cancer: Cells divide without control create pressure on neighbour tissue and produce chemicals which lead to death.

What is chemotherapy: They are toxic to all dividing cells of body including cells of cancer, stomach, intestine, reproductive organs, hairs, skin, nails, & immune cells. As chemo drugs can't differentiate between good and cancer cells, it kills all of them, making the patient vulnerable to more infections, more cancers and more diseases. Side effects also affect the health of brain, heart, liver, kidney, GIT etc and interfere in normal function. But most of the chemotherapy & radiotherapy patients in advanced stages don't survive as **chemotherapy itself kills at least 27%** patients. Most of the chemotherapy drugs and radiotherapy are proved to be human carcinogens (means **produce CANCER** in humans). After few years you get new cancers.

Holistic Therapy / Nutritional therapy: Research confirmed Plant extracts can kill cancer cells effectively. Main problem in using herbs is pushing the plant's active molecules inside the body at required dose for better action. It is made possible by using latest advanced NANOTECHNOLOGY formulations based on Novel Drug Delivery System which have proved to improve the health of patients in all stages and provide every opportunity to get rid of cancer. Care has been given in selecting herbs, combining them for synergistic action, appropriate dosing, proper timing, possible herb-herb interactions, herb-drug interactions, herb-drug-food interactions, etc. Many ingredients are not just safe & effective, but superior to chemotherapy.

Research experience of 15 years combined with advanced research on traditional herbs has resulted in creating world's first ever formulations which exponentially stimulate the body systems to repair themselves, protecting from chemo/radio therapy side effects, stimulating immune system, and eradicate cancer cells, all happening together.

These potent formulations including chocolate treatment is based on multiple target approach to defeat the cancer. It induces death in cancer cells while it protects the healthy cells of vital organs like liver, kidney, heart, brain from ill effects of advancing cancer & chemo. The benefits of therapy; upregulates p21, p27 and p53 genes and downregulates AP-1, Cyclin D1, and Cyclin E genes, suppress the NF-kb gene signaling pathway, activates proapoptotic factors, potentially stimulates immune system to produce antibodies, activates CTLs, antagonizes free radicals 5000 times more than vitamin C, adapts brain to face the situation, improves psychology, normalize hunger, minimize glucose spikes, reduce lipid peroxidation at all levels of cells, increases mitochondria numbers, breaks the protective barrier of cancer mass, suppress p-gp to promote drug absorption etc. This is only a partial list of numerous other benefits. It is for this reason Brain Cancer is also easy to treat even in final stage.

CHOCOLATE Therapy: It is based on **COCOA Chocolate** comprising 100% herbal origin and extremely potent. There are no side effects even in the highest doses tried. All patients who received the therapy are benefitted (100% efficacy). Just **eat & enjoy tasty CHOCOLATES**, rest taken care by nature.

Even **TUBERCULOSIS / Cirrhosis** patients are enjoying the benefits of this therapy with speedy recovery.

How this holistic approach works to the benefit of **CANCER** patients

Herbs elicit superior effects than chemotherapy

- Nutrients that lower the 3 main cancer promoters: **AP-1**, **NF-kappa-B**, and **IGF**.
- Nutrients that inhibit the main cancer promoting enzymes; **tyrosine kinase**, **m-TOR**, **akt** and **COX-2**.
- Nutrients that convert hormones which promote cancer to hormones that protect against cancer.
- Anti-angiogenic nutrients inhibit angiogenesis (stops blood supply to cancer).
- Anti-inflammatory nutrients reduce tissue swelling and pain.
- Reversing hyper insulinemia through nutrition.
- Nutrients promote apoptosis or cell death, a process by which cancer cells get killed.
- Detoxifying cancer-causing toxins with nutrients & diet.
- Nutrients protects vital organs like **Heart**, **Kidney**, **Lung**, **Liver**, **Brain** from **Chemotherapy** and **Radiotherapy** and provides stability to **fight** against cancer
- **Restore the Digestive tract** ability to maintain hunger, digestion, & grow normal microflora.
- Restore **bone marrow ability** to produce and maintain **LIQUID LIFE - Blood**
- Natural molecules restore the suppressed immunity to normal, and then activate them to fight bad cells.
- Nutrients convert the immune resistant cancer cells to susceptible, which get killed by CTLs
- Potent molecules can **kill cancer cells directly** and potentially stimulate immune system like NK cells (Natural Killer).

All these are done with high safety without causing deadly effects like Chemo/Radio therapy. Thus recovery, extension of life is better than CRT.

EXAMPLES OF HERBS USEFUL IN CANCER THERAPY

Tribulus protects Kidney

Sylimarin protects Liver

Ashwagandha Protects Brain

Spirulina provides energy

Curcumin Protects Lungs

Grape seed fight Cancer

Lycopene protects peroxidation

Andrographis fight inflammation

Tulsi fight infection

Rosemary protects from cancer

Mint cuts blood to cancer cells

Parsley cuts blood to cancer cells

Dil stimulates GIT

Thyme fights cancer

Astaxanthin fights free radicals

Pappaya protects blood components

Green Tea fight Cancer

Echinacea stimulates immunity

Honey protects from infection

Ginger restores GIT

We can also exploit the weakness of CANCER CELLS

to save the patient

Cancer doesn't like OXYGEN

- Provide Excess

Cancer likes ACIDITY

- Neutralise it

Cancer requires GLUCOSE

- Provide Less

Cancer creates free RADICALS

- Scavenge it

Cancer causes INFLAMMATION

- Antagonise it

Cancer causes CACHEXIA

(End of LIFE)

- YOU Act before it

Cancer suppress IMMUNITY

- Stimulate it

Cancer Evades IMMUNITY

- Arrest it

Cancer causes depression

- Alleviate it

Cancer CORRUPTS GIT

- Rectify it

Cancer suppress anticancer gene p53

- Stimulate it

Patient 1: No chemotherapy / No radiotherapy GBM (Anaplastic Astrocytoma)(April 2011)

<https://www.facebook.com/media/set/?set=a.4955941663788.256823.1456352757&type=1&l=f3d444c07b>

Patient 2: Brain GBM recovered and have excellent tolerance for Chemotherapy (Astro/oligodendrocytoma)(May 2012)

<https://www.facebook.com/media/set/?set=a.10200555419035400.1073741826.1456352757&type=1&l=482ddd124b>

Patient 3: Breast cancer awaiting for next scan (Whole body metastasis)(Feb 2013)

<https://www.facebook.com/media/set/?set=a.10200574388069614.1073741827.1456352757&type=1&l=26050704a2>

Patient 4: Child aged 3 years having ATRT (very rare Rhabdoid Tumor) got arrested the growth & shrunken the tumor. As on 15-03-2014 she has no new lesions and got removed the port of chemotherapy. Child has recovered and almost normal like in school.

More data will be made available online over the time.

(Please don't share these patient details)

These proven herbs sure alleviate the problem of cancer patients either with or without chemotherapy.

*Some of them are yet to be validated and none of the herbs are evaluated or validated by FDA.

All, As all of you know Cancer is not an easy disease to cure. Every aspect has to be carefully analysed and decision need to be taken. Being Pharmacological research Scientist engaged in testing drugs for their efficacy for 20 years has spent lot of time in studying, teaching, researching cancer & cancer therapy. Wanted to do more than just teaching, ventured to provide the best possible herbal formulations.

I have opted hybrid system of both Ayurveda and Allopathy systems. Used best of both worlds to make controlled, efficient, synergistic tasty formulations including technological breakthrough Nano formulations from 2011. Herbs are selected based on science studied for their efficacy and then specific extract is selected. Active molecules from herbs has been isolated by best safe techniques and formulated by using latest technology. Thus several barriers of herbal therapy have been overcome easily. Eg: Curcumin is the active from Turmeric and we use Curcumin 95% pure rather than turmeric decoctions. Hence the control over therapy is predictive and better control over the dose.

Patients who stuck to the therapy have all sailed out of danger and almost leading normal life. Only drawback is price as we use high purity extracts, which costs more unlike who use crude herbs.

For details about therapy, documents of patients will be available on request. For a one to one free consultation please call the volunteer 88845 88835 or write to cancerherbalist@gmail.com.
