Archistart doubles your summer!

As from 2017 Archistart gives its summer a makeover: the designing workshop [IAHSummer](#) (1-8 August) will be followed by [IAHconstruction](#) (8-12 August), an extra self-construction session for winning projects of IAHSummer17.

In the new vision IAHSummer becomes an integrated lab of design, experimentation and self-construction.

IAHSummer | 1-8 August 2017

IAHSummer17 workshop will take place at "[Ostello del Sole](#)" in San Cataldo (Lecce) from 1st to 8th August 2017 and will involve 100 young people split in teams and followed by tutors who will provide all the materials necessary to produce the documents required.

During the workshop the participants will deal with methodologies different from digital design: after an initial phase of definition of a concept and a master plan, through sketches, diagrams and drawings, the teams will be asked to produce [one table A2 format](#), where projects realized with freehand will be represented, and a [three-dimensional model](#) in 1:20 scale.

IAHconstruction | 8-12 August 2017

IAHconstruction session will be held at the same location of IAHSummer17 in San Cataldo (Lecce), at "[Ostello del Sole](#)" from 8th to 12th August 2017 and will involve 30 IAHSummer17 participants that will build the 3 winning projects of the design phase.

**All the publications and the authorship of the projects will remain team members property even if they do not participate in the construction of the temporary rooms*

Temporary room

Archistart continues the research and the study in the field of tourism, with a specific focus on youth tourism, a key-resource for the area hosting its summer events.

The theme of IAHsummer17 is the design of a **temporary room**, a "special tent" to be realized in the same hostel where the workshop takes place. The housing unit/temporary room should be designed to be made with simple materials that are also easy to find.

Providing aesthetic quality, identity and functionality to the temporary accommodation units of the hostel, along with the possibility to experiment the construction methods and the use of special materials are the main elements of the workshop, that will give new life to the hosting campsite. The goal is to live an experiential holiday, embracing the creativity of young designers in order to imagine new and not standardized accommodations.

The three temporary rooms realized during the construction phase of the workshop will be rented to tourists from 13th August.

The hostel of San Cataldo has been enhanced by the installations realized during the past editions of Archistart workshops that have characterized the spaces as background of music festivals, events and parties at the hostel.

IAHsummer17 is a further opportunity to develop this place as a dynamic and youthful cultural HUB of the area.
