

AQUEOUS 3001B

CASE AND CARTON

TECHNICAL DATA SHEET TECHNICAL DATA SHEET

Characteristics

A premium grade adhesive designed to provide rapid setting on a variety of paper and paperboard stocks.

Application Methods

Excellent machineability is achieved when applying 3001B on roll coating systems.

In-Service Parameters

Bond failures are not present between a standing temperature range of 10° C to 50° C.

FDA Status

Will provide this information upon request.

Test results listed have been conducted in a controlled lab environment with set standards, results may vary based on application, conditions and substrates utilized.

TYPICAL PROPERTIES

FORM:	Liquid
TYPE:	Vinyl acetate polymer
COLOUR:	White
VISCOSITY:	Brookfield RV#5-20 rpm
@ 24 °C:	2900 ± 300 cps
SOLIDS:	56 - 60%
pH:	3.5 - 5.5
SHELF LIFE:	3 months minimum
RUNNING TEMPERATURE:	15 - 30 °C
FREEZING:	Store above 15 °C
CLEAN UP:	Warm water
WATER RESISTANCE:	Moderate
