

Millennium **The Old Guys Rule Team**

"THE WHOLE TEAM IS DRIVEN BY INNOVATION"

Luxor Industrial Corp merges with Colt Builder Canada and Mill Frame USA all coming together as one to execute on our plan to Vertically Integrate to shorten our Builders on site framing time as we deliver high quality products that can not be duplicated in the field by piece workers.

The Old Guys Rule Team and Crews are leaders in the building industry and now as all of our planning is beginning to vertically integrate into the Western US offering a solution to all high density multi story wood framed projects that have been impacted by the labor shortage. Since we can technically handle and support pre framing up to 50% of our builders jobs before we even show up on site we are now being asked to pre build more than our own jobs. Our cutting edge team realised the timing is now to build in Canada as we ship finished goods down and across the border into the US using the exchange rate to support logistics cost. With our large fabrication facility only 3 miles from the border we figured we are all better together now than as individual companies. After Many Years Of Building with Lumber We Have Finally Figured Out How To Be Smarter Than The Wood.
