		Line	Accuracy	Uptime
Gold-Barrick-U.S.	6 mos.	CIL Feed 16 in. Vertical	0.1% (lab samples)	100%
Potash – U.S.	1Yr.	Rotary Conditioner Discharge 10 in. vertical	0.2 % (full Scale)	100%
Gold – Kinross – U.S.	1Yr.	Flotation Feed 16 in. horizontal Flotation Con 4 in.	0.3% (full Scale)	100%
Copper - Congo	30d	Leach Feed Thickener 10 in. horizontal	0.31% (full Scale)	100%

Ultimo Measurement, LLC is a privately held industrial process control technology development company dedicated to inline, real-time, non-invasive measurements using our proprietary Percussion technology. Years in development and field tested on five continents by a dedicated, global team of experts in their field and the support and input by some of the leading process control instrumentation companies.

Our first products allow process manufacturers to avoid using nuclear radiation and invasive methods to make online density measurements. These and future products will allow process manufacturers to further optimize their operations by being able to make other high precision, high accuracy critical measurements automatically, online and in real-time.
