Keywords¹: ← 10pt, Times italics

Instructions for a Medinfo panel, Medinfo 2013.

Tutorial description

This author kit is designed to assist you in preparing your submission. A template in Microsoft Word is available on the Medinfo 2013 World Wide Web server at <http://www.medinfo2013.dk>. This example provides all the information you require to comply with the Medinfo 2013 submission standards for tutorials.

The official language of the Medinfo 2013 Congress in Copenhagen, Denmark is English. Values should be in *International System* units.

To ensure that the greatest opportunity for participation in Medinfo 2013 is made available to researchers and institutions, authors may appear in multiple submissions but may have only ONE submission per category considered where they are the primary or first author.

The tutorial submissions should include

General topics - describing the aim and scientific content of the tutorial

Tutorial structure and arguments – describing how the tutorial will be organized

Specific educational goals - describing the dissemination goals of the tutorial

Expected attendees – describing to whom the workshop is devoted

Submissions will be evaluated on the anticipated educational and participant benefits, presenters' qualifications/credentials and on audience engagement strategies proposed.

Please note that Tutorials are part of the Pre-congress program and participation will incur additional fees.

Tutorial teacher ← 12pt, Times bold

Please include

- The names, academic degree(s), affiliations, and locations (city, state, and country, if international) of the workshop organizer and all participants

Document length restrictions

Tutorial submissions are limited to **three pages** of two-column format as in this document.

Deadlines

Tutorials conforming to these guidelines must be submitted electronically through the Medinfo 2013 Web site by 10 January 2013.

First authors of tutorial submissions will be notified by Mid-March 2013 of acceptance or rejection.

Tutorials submissions should be prepared as Microsoft Word .doc files and should be submitted online according to the instructions available on the Medinfo 2013 web site at:

<http://www.medinfo2013.dk/>

¹ Keywords should, preferably, be drawn from the MeSH thesaurus
