

ParlorMaster

The ParlorMaster is designed to accurately dilute and deliver concentrated Express Teat Dip to your milking parlor.

The ParlorMaster contains a 3/4 gallon reservoir holding tank to provide "on-demand" dispensing without wasting product. This pump can be used to spray, foam and fill teat dip containers in your parlor.

- Consistent & accurate dilution eliminates manual mixing errors and eliminates waste
- Water driven, non-electric, single system delivery with back flow prevention
- Compact, durable construction holds up to harsh farm environments

ON-DEMAND.

ACCURATE DILUTION.

SINGLE SYSTEM DELIVERY.

With no waste & in just one easy step.

Mix Express Teat Dip on-demand and send it to your milking parlor in just one easy step. Simply hook-up the water supply, put in the metering tips to set the recommended dilution rate, and attach the hoses from the product to the pump. You are then ready to turn the water on for the pump and start mixing the product.
