

Valiant[®] Shield

Effective Barrier Teat Dip
for Alternative Bedding

Less tacky. Shorter dry time. Minimal buildup.

Introducing the Next Generation of Valiant® Protection

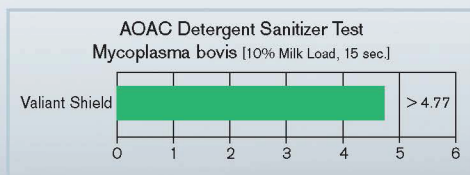

From bedding to parlor and everywhere in between, free-stall cows come in contact with plenty of things. Make sure Valiant® Shield tops the list.

Producers across the country count on Valiant® Shield for proven high-performance ASC germicide with excellent teat conditioning in alternative bedding situations (sawdust, recycled sand, dried manure solids, etc.) The unique formula is specially formulated for reduced tackiness so less bedding material sticks to skin.

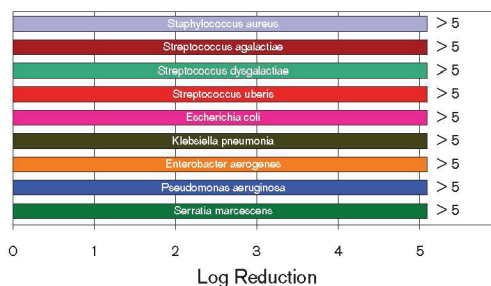

- Simple Removal Ideally Suited for Free-Stall Facilities
- New Generation Dual Germicide System is Fast-Killing and Long-Lasting
- Excellent Teat Skin Conditioning (Healing, Moisturizing Protection)
- Good Color Marking
- Low Drip Rates
- Convenient 7-Day Product Stability (Other ASC Products Must Be Mixed Daily)
- **New!** Less Tacky + Quick Dry Time (As Compared to Traditional Barriers)
- **New!** Easy to Remove with Less Buildup
- **New!** Secondary C-7 Germicide

Field Tested. Field Proven.

The following chart shows results using the Association of Analytical Chemists (AOAC) Detergent Sanitizer Method (10% milk load, 15 sec).

AOAC Germicidal Test: 15 sec Exposure with 10% Milk Load
