

» CONSCIOUS LEADERSHIP CIRCLE

Conscious Leadership Circle is for a select group of mindful leaders to provide a guided, roundtable platform to challenge and widen their perspectives resulting in stronger, conscious leadership.

Participants will grow in their ability to positively influence their companies to perform at exceptional levels. Each leader in our circle believes that the success of their business and their lives is a direct reflection of their thoughts, feelings and choices they make, thus their personal growth is a requirement to create an extraordinary life and an extraordinary business.

The intention of this forum is to bring a unique perspective of conscious awareness to the issues of the group members. The forum will also function as a peer group of leaders who support each other's growth and success through

conversation and relating while engaging in an ongoing process of learning and discovery. Mental and emotional development does not come automatically with age or achievement. It requires ongoing rigorous work on ourselves. It involves looking at our deepest truths, our greatest fears and facing the issues of our relationships with others. It involves "getting real" with others and ourselves.

Members support each other within the context of the forum to lead with integrity, act with greater awareness, perform better in their current roles as leaders and to achieve greater results with their teams. The forum will challenge members to grow as individuals and to discover new perspectives and practices for meeting difficult challenges and to better serve their clients, employees and families.
